Visual asset handoff

The current image beside the resolution to supply. Existing artwork, missing illustrations and shared UI parts are all included.

Replace generated art

Title room

CURRENT 1586 x 992

SEND 3840 x 2400 layered master

One room composition, including its seven people.

Replace generated art

Seated opponents

CURRENT 1448 x 1200 each

SEND 2896 x 2400 each

Seven neutrals; Bea can be retired instead.

Check source / finish missing art

Cards and shared UI

CURRENT Mostly 512 x 384 card art

SEND 2048 x 1536 card masters

62 existing illustrations + 26 missing entries.

How to read this guide

CURRENT describes the file or native drawing shown. SEND is the recommended editable master. Runtime sizes are derived by Codex. A screenshot is a reference, not a request to paint its text or controls.

Your chef-hat card back is already supplied at 1620 x 2160. No redraw. Audio and written-copy tasks remain in the spreadsheet; this guide covers visual assets.

SEE YOU AT LOCALS

Title room

ART-001 | Replace the generated background with one human-made composition. The title and menu remain live.

CURRENT GENERATED WORKING ART

Current: 1586 x 992

Send: 3840 x 2400

Layered editable source + PNG

Include the room, people and props. Separate foreground people, rear people and furniture where practical.

Keep the central noticeboard and aisle available for the logo and menu. Avoid critical faces in the outer 5% top/bottom crop bands.

These seven people are part of one scene, not seven extra battle portrait commissions.

SEE YOU AT LOCALS

Seated opponents 1 / 4

Current neutral art is generated. Full portraits, introduction screens and HUD crops reuse each replacement.

Replace generated art

Pip

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Replace generated art

Otis

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Same canvas and pose for optional smile/hurt and 2-3 line-boil drawings. Master arm baseline y=2000; runtime y=1000. White outer edges are added by the game.

SEE YOU AT LOCALS

Seated opponents 2 / 4

Current neutral art is generated. Full portraits, introduction screens and HUD crops reuse each replacement.

Replace generated art

Ines

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Replace generated art

Sana

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Same canvas and pose for optional smile/hurt and 2-3 line-boil drawings. Master arm baseline y=2000; runtime y=1000. White outer edges are added by the game.

SEE YOU AT LOCALS

Seated opponents 3 / 4

Current neutral art is generated. Full portraits, introduction screens and HUD crops reuse each replacement.

Replace generated art

Milo

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Replace generated art

Kit

CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Same canvas and pose for optional smile/hurt and 2-3 line-boil drawings. Master arm baseline y=2000; runtime y=1000. White outer edges are added by the game.

Seated opponents 4 / 4

Current neutral art is generated. Full portraits, introduction screens and HUD crops reuse each replacement.

Replace generated art

Ellis

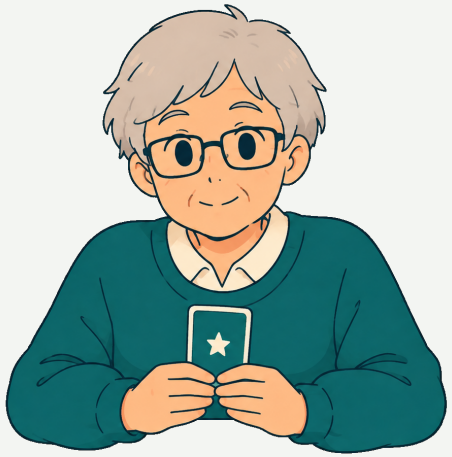
CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Runtime: 1448 x 1200. Separate foreground fingers; leave the live card fan unpainted.

Retire or replace

Bea - unused in normal pool



CURRENT 1448 x 1200; one neutral

SEND 2896 x 2400 transparent master

Only draw if retaining Bea.

Same canvas and pose for optional smile/hurt and 2-3 line-boil drawings. Master arm baseline y=2000; runtime y=1000. White outer edges are added by the game.

Supplied characters 1 / 2

These are source checks first. You do not automatically need to redraw the existing Mina or player portraits.

Confirm supplied source

Mina - battle, intro and shop

CURRENT 701 x 628, two distinct poses

SEND 1402 x 1256 if replacing

Keep original if its source is confirmed. Six timing entries reuse two drawings; 70 ms each.

Confirm supplied source

Spicy player HUD portrait

CURRENT 512 x 512

SEND 1024 x 1024 if replacing

512 x 512 runtime crop. No separate full-body starter-selection painting needed.

SEE YOU AT LOCALS

Supplied characters 2 / 2

These are source checks first. You do not automatically need to redraw the existing Mina or player portraits.

Confirm supplied source

Hearty player HUD portrait

CURRENT 512 x 512

SEND 1024 x 1024 if replacing

512 x 512 runtime crop. Confirm source before commissioning another drawing.

Confirm supplied source

Sweet player HUD portrait

CURRENT 584 x 584 crop of 764 x 1224

SEND 1024 x 1024 if replacing

Preview shows the actual active avatar crop. Runtime target: 512 x 512.

Card back and remaining old wrappers

The selected chef-hat back is reused unchanged. The three old wrapper images can be removed from their brief opening animation.

Reuse existing original

Your sketchy chef-hat back

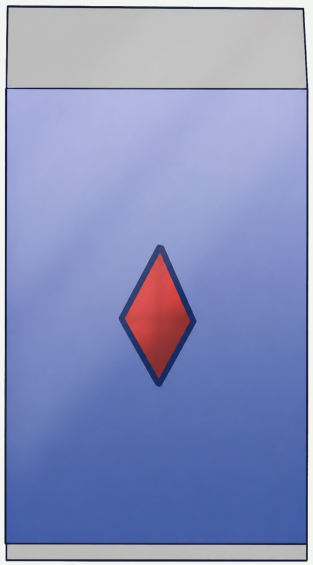
CURRENT 1620 x 2160, IMG_0398.PNG

SEND Nothing new to draw

Already restored for decks, hidden hands and reveals. Creation-method record remains separate.

Confirm or remove old image

Regular reward - old image



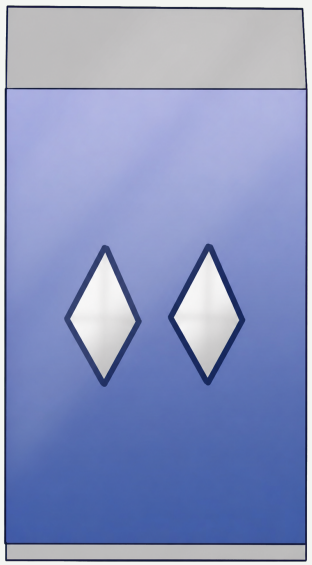
CURRENT 1086 x 1448

SEND No separate painting required

Codex can replace the old opening remnant with the shared native wrapper.

Confirm or remove old image

Top-cut reward - old image



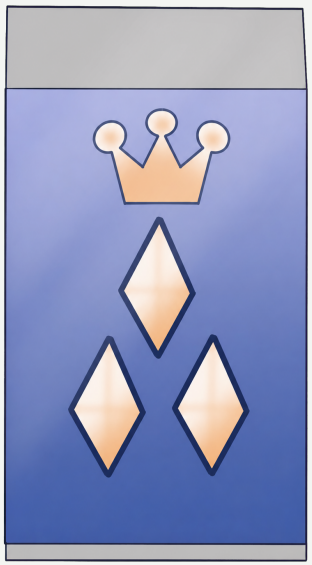
CURRENT 1086 x 1448

SEND Shared wrapper: 1200 x 1600

One new wrapper master and variant stamps cover all three rewards.

Confirm or remove old image

Final reward - old image



CURRENT 1086 x 1448

SEND Same shared wrapper master

No need to commission three separate pack illustrations.

Existing card illustrations 1 / 8

Confirm the originals; send higher-resolution source art where available. Repeated timing frames are not additional commissions.

ART PENDING

NO DEDICATED ART YET

Current: Shared placeholder only

Send: 2048 x 1536

Runtime: 1024 x 768

Art only: 4:3 canvas, full silhouette, 8-10% margin. No frame, name, rules, stats, seal or hover edge. Transparent cutouts; environment plates may be opaque.

Shared UI and packaging

Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

Final See You at Locals wordmark

CURRENT Native / scalable drawing

SEND SVG or 3000 px wide PNG

Current native wordmark on the title noticeboard. Crop shows typography reference, not a raster source file. Keep final lettering separate from the room.

Human design kit

Square identity mark / app icon master

CURRENT Native / scalable drawing

SEND SVG or 1024 x 1024 PNG

Actual app icon selected by project.godot. Legacy filename is retained for compatibility; this is the current textless identity mark.

Shared UI and packaging

Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

Folded-ribbon card frame system

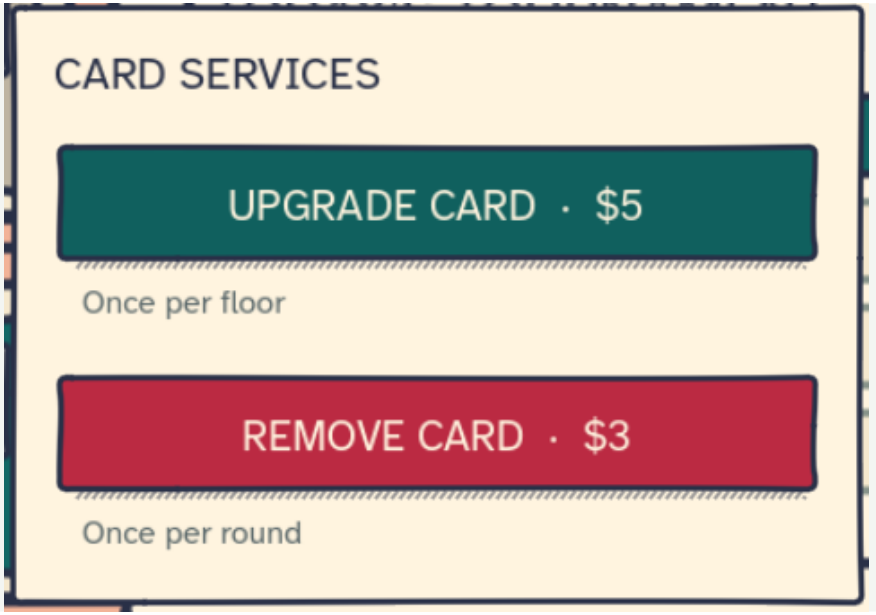
CURRENT Native / scalable drawing

SEND SVG or 1680 x 2480 master

Fresh captures of six real CardFace controls, using existing card illustrations. This is the reusable frame reference; commission one frame system, not these six full card faces.

Human design kit

Paper panel master



CURRENT Native / scalable drawing

SEND SVG / nine-slice or 1024 x 1024

Current native paper panel in the shopkeeper focus. One stretchable panel design serves settings, dialogs, results and card services; leave text live.

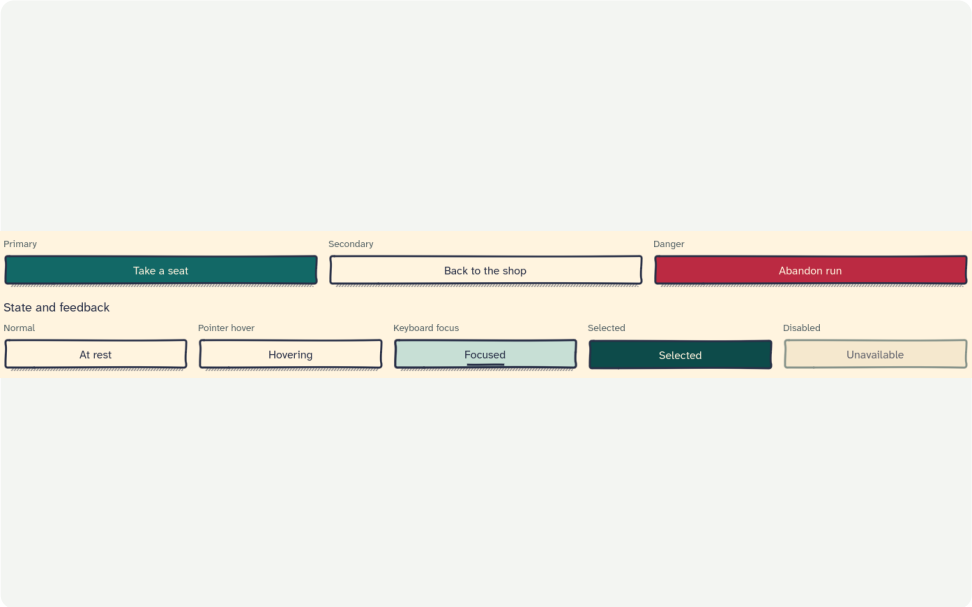
SEE YOU AT LOCALS

Shared UI and packaging

Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

Paper button and tab family



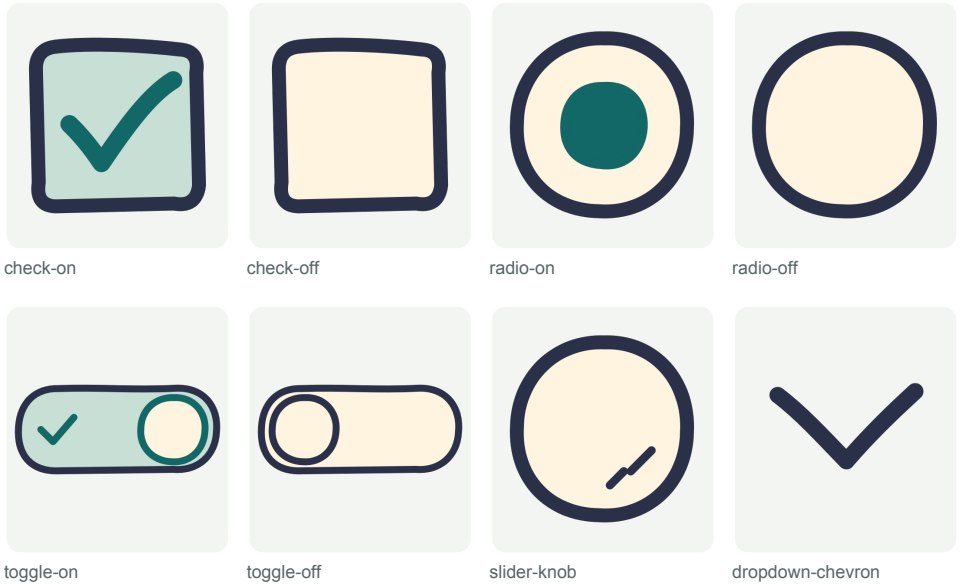
CURRENT Native / scalable drawing

SEND SVG or 1024 x 320 family

Fresh native shared-controls sampler. Button states and sizes come from code; one source design/state sheet is sufficient. Hover column is a sample control, not proof of OS pointer hover at capture.

Human design kit

Control marks



CURRENT Native / scalable drawing

SEND SVG or 256 x 256 per mark

Eight base marks; existing disabled/highlight/mirrored variants are code/state derivatives. Fresh PNG previews are exact rasterizations of these SVG sources.

SEE YOU AT LOCALS

Shared UI and packaging

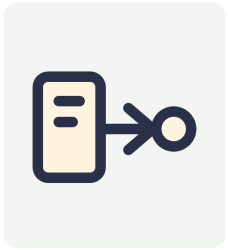
Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

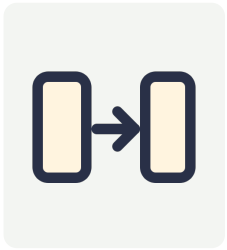
Five custom action symbols

play

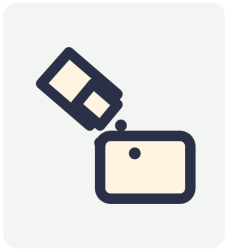
ability



attack



move



spice

CURRENT Native / scalable drawing

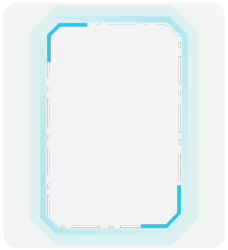
SEND SVG or 256 x 256 per symbol

Five actual custom action SVG sources currently loaded by battle. Fresh PNG previews are exact rasterizations; color and size variants remain implementation.

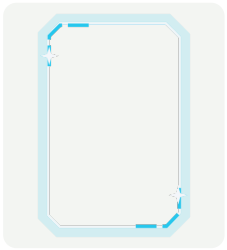
Human design kit

Small decoration and selection symbol set

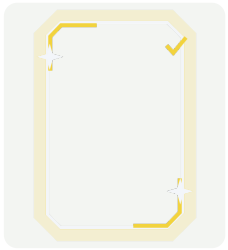
ability_ready_sparkles



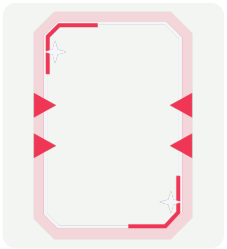
ability_ready_aura



meal_candidate_aura



meal_selected_aura



taunt_aura

CURRENT Native / scalable drawing

SEND SVG or 256 x 256 per symbol

Retained custom sparkle and targeting motif sources loaded by the battle renderer. These are a design-reference family, not a requirement to reproduce every aura bitmap. Other tiny stars on wrappers are drawn natively; keep final retained set small.

Shared UI and packaging

Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

Base cloth/playmat print

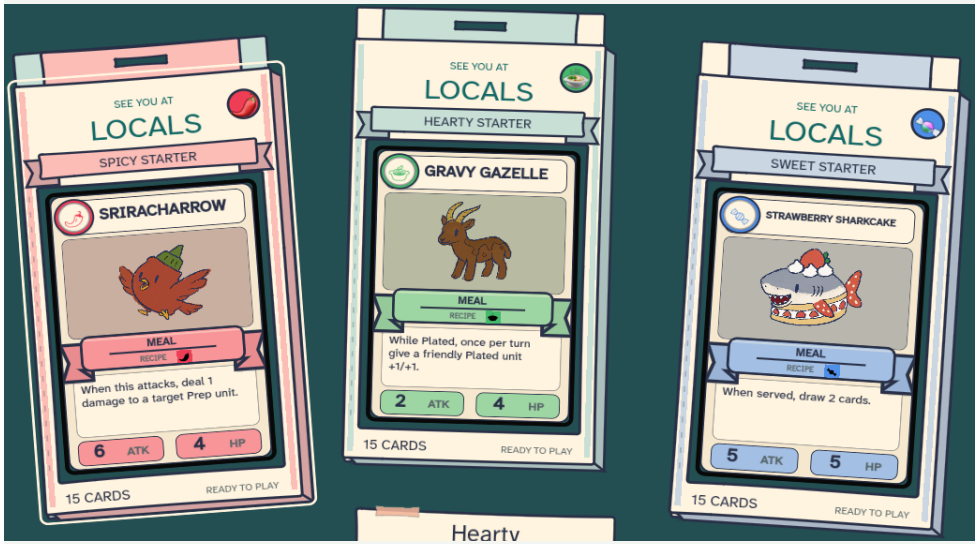
CURRENT Native / scalable drawing

SEND SVG or 2048 px wide on UV guide

Two separate native cloth mats in the actual across-table camera. Draw decoration on the exact UV template supplied during integration; no height/aspect is guessed from this perspective screenshot.

Human design kit

Starter-box packaging system



CURRENT Native / scalable drawing

SEND 1200 x 2400 layered master

Three current native windowed starter boxes. One 1200×2400 master system with three affiliation treatments. Live card faces remain separate.

Shared UI and packaging

Current native components shown as references. A small reusable human-designed kit covers these parts; text and interactions stay in the game.

Human design kit

Reward-wrapper branding system

CURRENT Native / scalable drawing

SEND 1200 x 1600 layered master

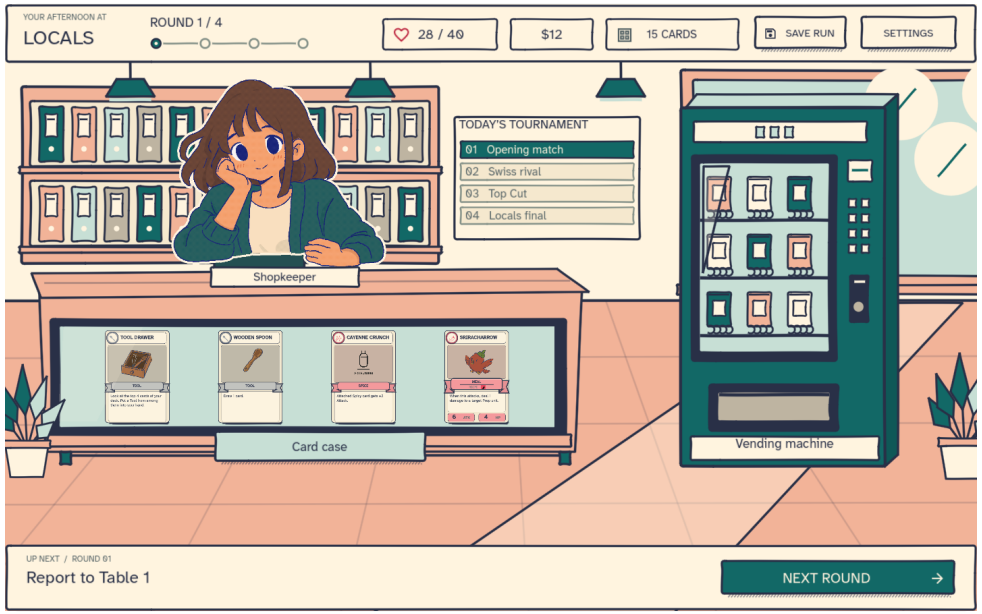
Current sealed native reward wrapper. One reusable system with regular/top-cut/champion stamp variants; live count and labels stay separate. See SRC-007..009 for the old opening-animation remnants this system should also replace.

Environment and table layers

Native game screenshots are composition references. Supply separate reusable layers; do not paint the HUD, cards or controls into the room.

Human environment design

Shop room layers



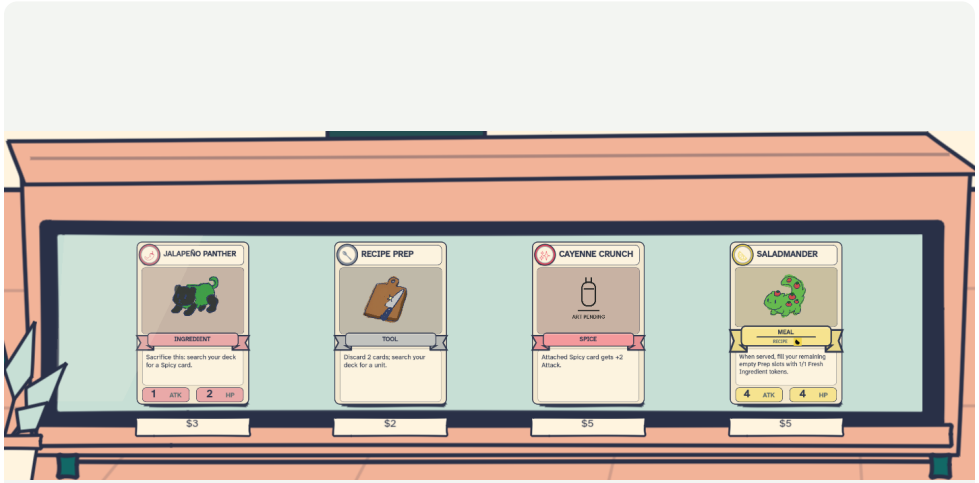
CURRENT Native game render; no flat art master

SEND 5120 x 3600 layered master

Fresh actual shop overview, not a generated concept. Native scene drawing currently. One layered room serves overview, shopkeeper, case and vending focus; do not make four disconnected room paintings.

Human environment design

Glass card case and counter



CURRENT Native game render; no flat art master

SEND 3000 x 1120 transparent / SVG

Actual case-focus screen. Counter/case/glass are the art layers; cards, prices, stock and controls remain live.

Environment and table layers

Native game screenshots are composition references. Supply separate reusable layers; do not paint the HUD, cards or controls into the room.

Human environment design

Actual vending-machine cabinet

CURRENT Native game render; no flat art master

SEND 1200 x 2000 transparent / SVG

Actual vending focus screen. Cabinet has product rows/coils, payment column and pickup hatch. Keep service buttons, prices/status and labels live.

Human environment design

Battle room layers

CURRENT Native game render; no flat art master

SEND 3840 x 2400 layered master

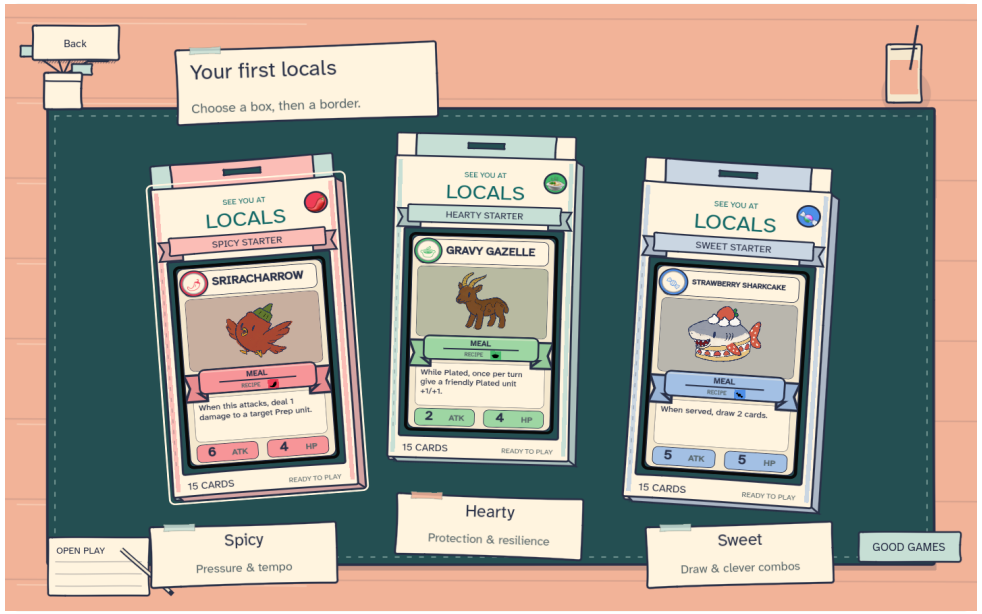
Fresh actual battle, including restored chef-hat back and supplied Mina with live held cards. Room, table, two mats, character, cards and UI must remain separate; only the room artwork is this layer handoff.

Environment and table layers

Native game screenshots are composition references. Supply separate reusable layers; do not paint the HUD, cards or controls into the room.

Optional decoration

Starter/reward tabletop surface



CURRENT Native game render; no flat art master

SEND 3840 x 2400 or shared materials

Current native starter tabletop; reward table is a second use of the same material language. Optional custom surface polish only. Packages, live cards and controls are separate.

One room, several views

The shop overview, clerk, glass case and vending focus all reuse the same room. Preserve separate foreground objects for occlusion and about 1.8x camera zoom.

Mina is the same supplied character used in battle. A second independent shopkeeper painting is not required.

Settings, credits, deck browsing, inspection, difficulty, rewards and results reuse the same UI and table materials.

Codex supplies the final camera, layer and UV guides before finished painting.

The parts inside the current screens

Fresh 1440 x 900 game captures. These views reuse the assets listed in this guide; they are not twelve additional background commissions.

Optional expressions and illustration detail

These images do not currently exist as a complete new-cast animation set. Use the neutral as the aligned drawing reference.

CURRENT NEUTRAL REFERENCE

Kit shown as the existing pose reference. Do not interpret repeated frames or HUD crops as extra character commissions.

Smile + hurt faces

2896 x 2400 each

Optional: 2 expressions per retained rival, same full canvas and body pose. Seven rivals would mean 14 additions.

Line-boil drawings

Same master size as neutral

Optional: 2-3 distinct drawings with fixed anchors and a clean still. Mina already has two distinct supplied poses.

Foreground fingers

Same full character canvas

Deliver as an aligned layer, not a new scene. Live card backs sit behind the fingers.

Opponent mat motifs

SVG or 2048 px wide

Optional variations of one common mat. Height follows the actual UV guide.

Card boil drawings

2048 x 1536

Optional polish after missing cards. Existing art generally repeats two drawings across six timing entries.

Press artwork and export sizes

One layered composition plus the separate logo supplies the different crops. These are later exports; no Steam page changes are part of this guide.

LOCAL GENERATED CONCEPT REFERENCE

Send: layered key art around 5000 x 3000

Keep characters and logo movable for wide and vertical layouts. This reference is a local concept, not a verified image of the live Steam listing. No separate painting is required for every export.

Store header
920 x 430

Small capsule
462 x 174

Main capsule
1232 x 706

Vertical capsule
748 x 896

Library capsule
600 x 900

Library header
920 x 430

Library hero, no text
3840 x 1240

Library logo, alpha
Up to 1280 W and/or 720 H

Optional store background
1438 x 810

Gameplay screenshots
At least 5; minimum 1920 x 1080

Export dimensions from the 8 Sep asset audit. Verify Valve templates before the later refresh. Codex captures real gameplay screenshots; you do not paint them.

Steamworks: store graphical assets

Steamworks: library assets

What to deliver with the artwork

Use pixel dimensions, editable source files and stable layers. DPI metadata does not determine game sharpness.

Image files

Editable PSD / Procreate / Krita / Clip Studio / vector originals, plus lossless sRGB PNG. Keep real transparency on characters and isolated objects. Environment paintings may be opaque.

Send the real higher-resolution original when you have it. Enlarging a small PNG cannot restore the original detail.

The current chef-hat back is already usable at 1620 x 2160. No redraw or AI enlargement.

Layers and animation

Separate room, people, foreground fingers, props, packaging and mat prints. Leave text, numbers, card faces, controls and white silhouette edges live.

Keep every frame on one fixed canvas with the same anchors. Include timing and a clean still for Reduced Motion.

One neutral and one card first let us verify scale, hand position and outlines before the full set.

Source records

Supply creator, original source, permission / license and how the final artwork was made. Existing supplied art is not automatically generated; a source check can let it stay.

This guide reuses current image files and fresh native game captures. It creates no new generative illustrations. Existing generated references are explicitly labeled.

Unused legacy resources are export-cleanup work, not extra commissions for you.

Scope references

9 Sep visual capture and card-back choice; 8 Sep artist handoff, character/environment/retained-art audits and the full card inventory. Required replacements, source checks and optional kit work match the asset tracker. This is a visual handoff, not certification of all asset origins.
