# Chilling at Locals

## The UI, screen by screen

48 current screens and states  /  17 archived comparisons

Real game screenshots. The older images show the broader redesign, not only the most recent edit.

Earlier-build file dates range from September 3 to 6, 2026. Cards, selections, scores and camera crops sometimes differ.

Current-only pages fill the gaps where no matching older capture exists. Remaining older styling is labeled honestly.

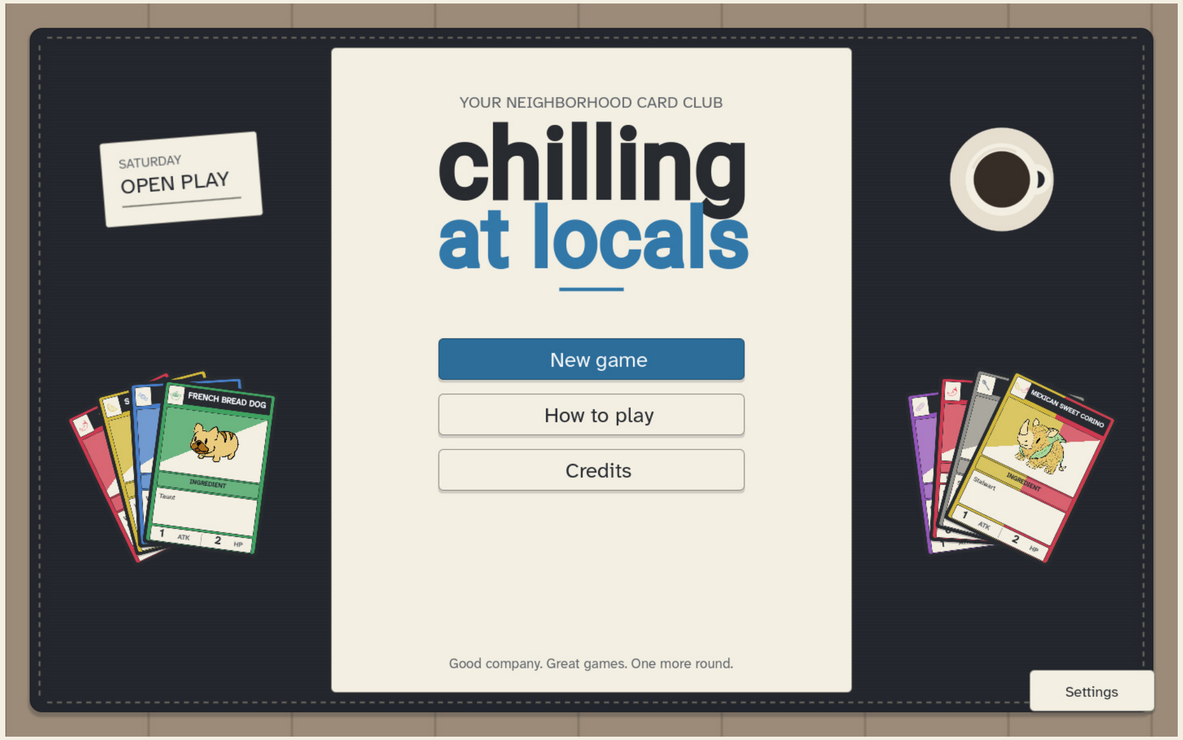
No UI artwork was generated or painted for this gallery. Existing generated room/Mina working art is visible in game captures.

Captured September 6, 2026. Fixture runs preserve the real save.

# Title screen

EARLIER BUILD

CURRENT



Chilling at Locals wordmark, paper menu, cloth mat and everyday table props replace the angular TOP CUT presentation.

# Continue a saved run

CURRENT

Current title with a saved-run fixture and the Continue action.

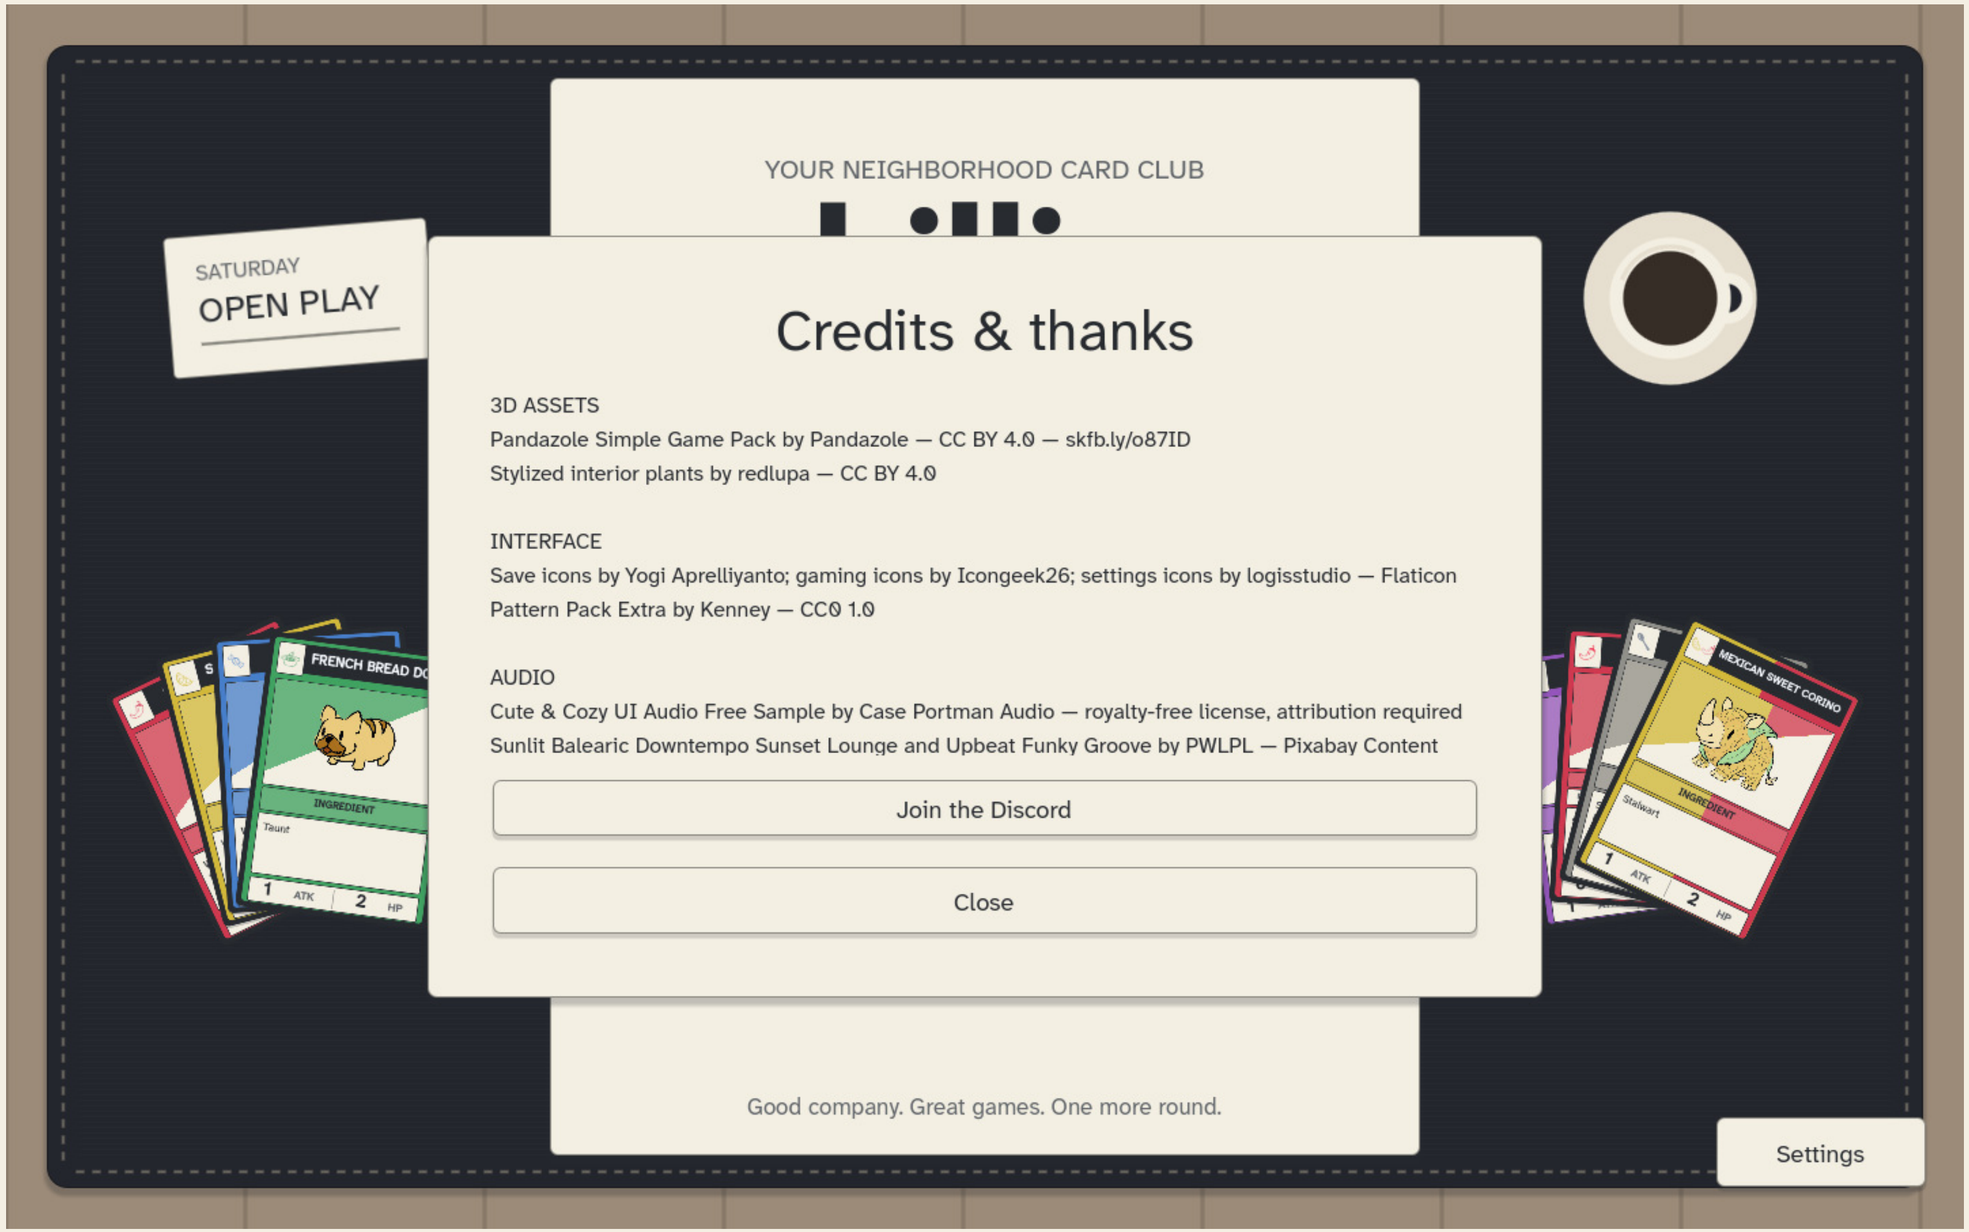
# Title options

CURRENT

Current title options state.

# Credits

CURRENT

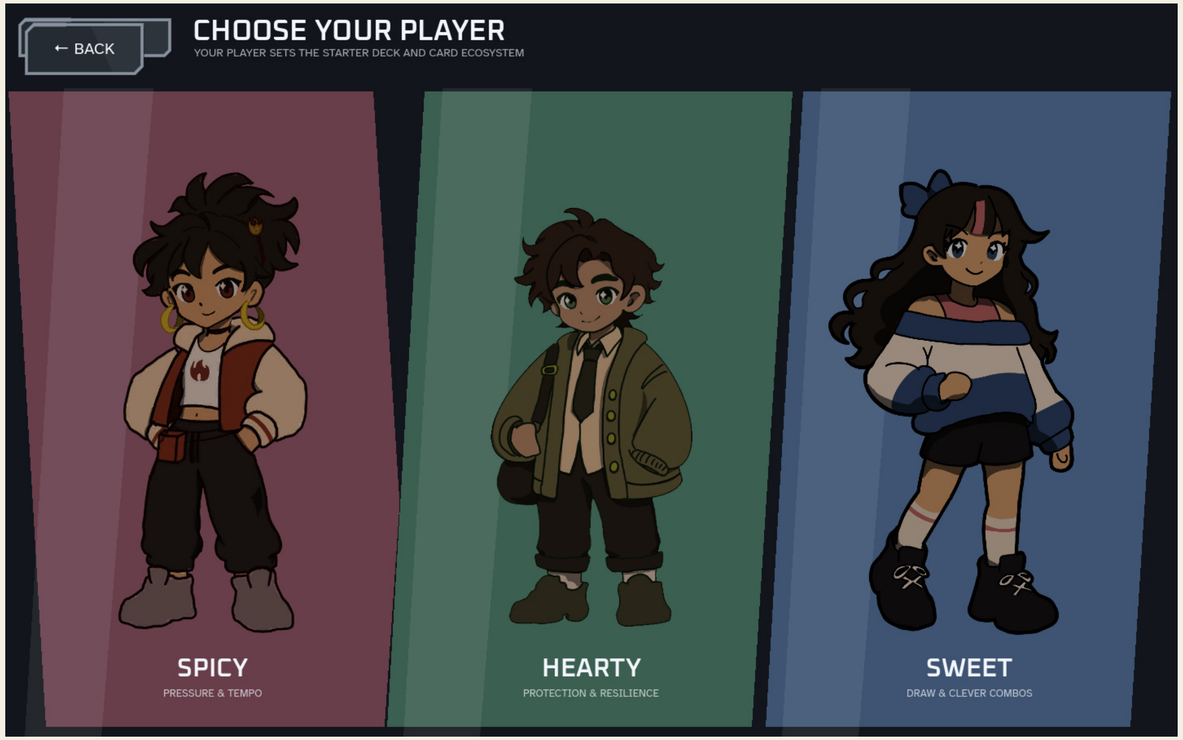


Current credits and attribution panel, including generated working-art disclosure.

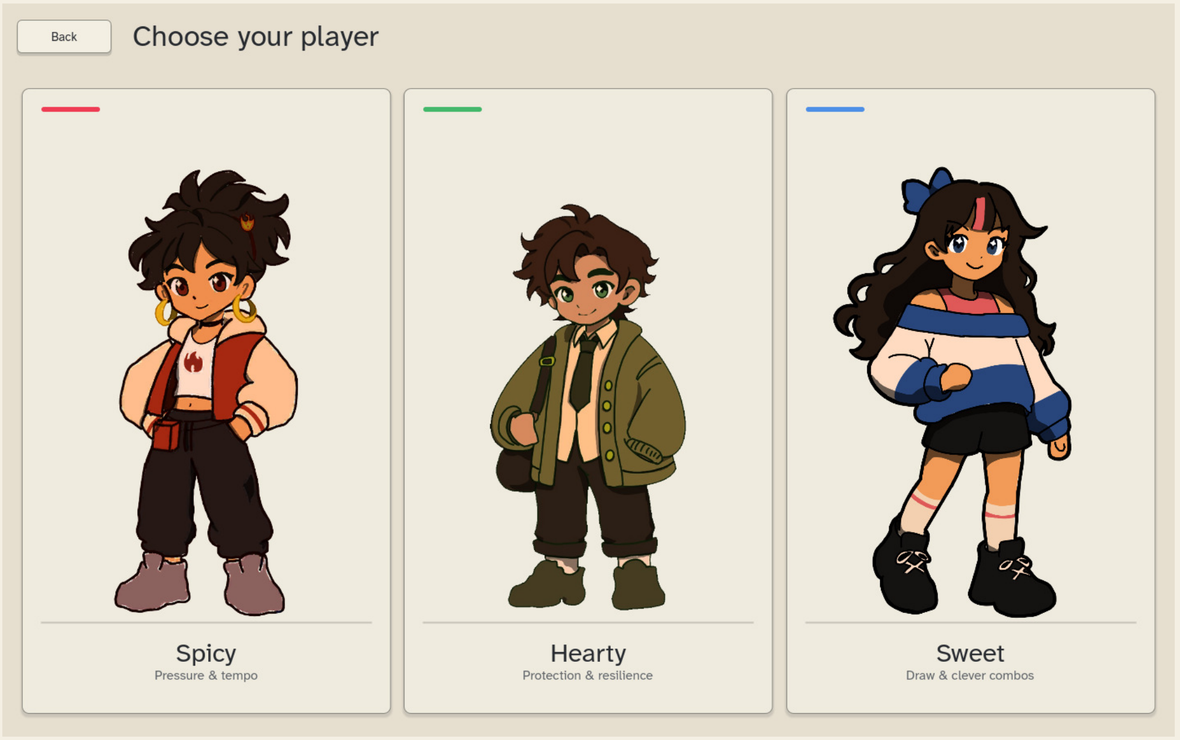
Current in-game capture. No matching archived screenshot is claimed.

# Choose your player

EARLIER BUILD



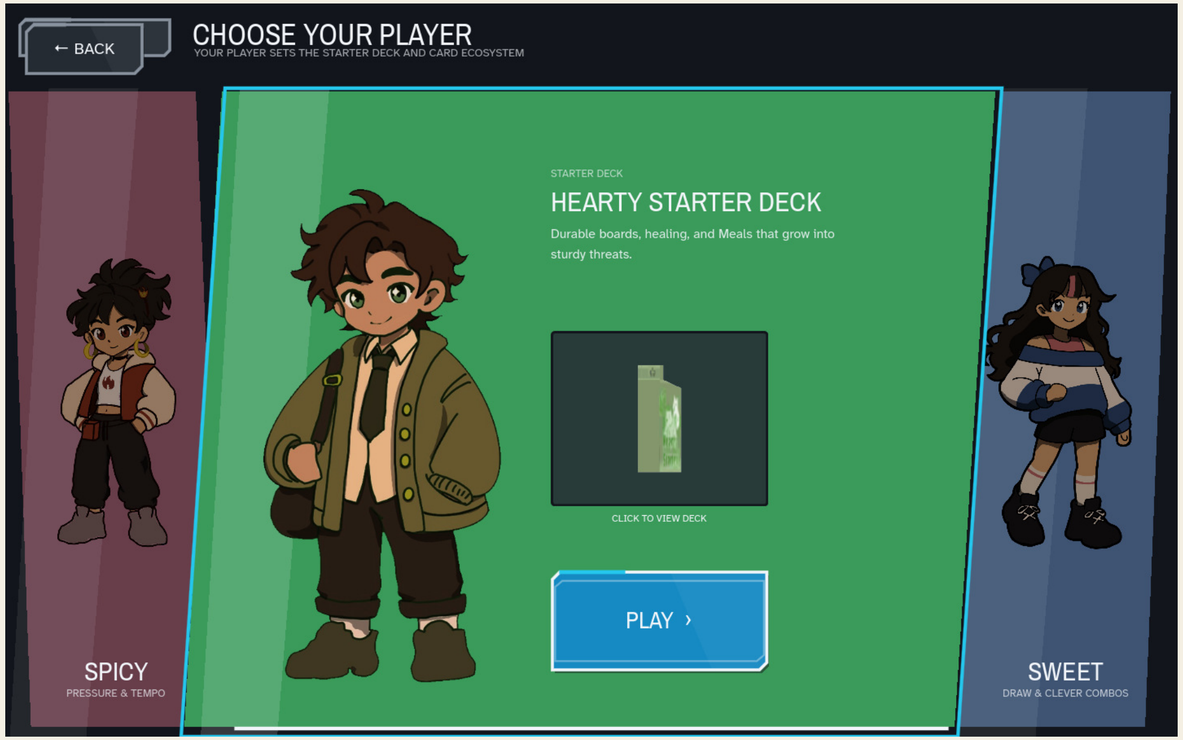
CURRENT



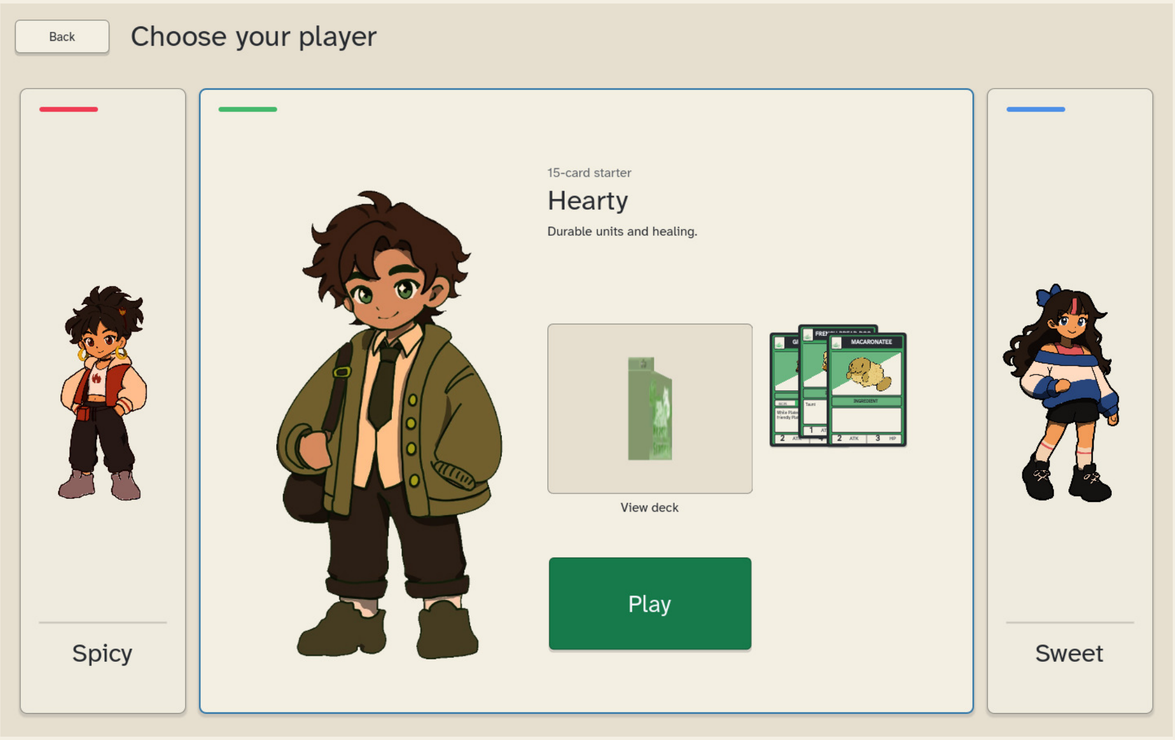
Dark diagonal columns become paper character sheets, with natural character color and simpler headings.

# Selected player

EARLIER BUILD



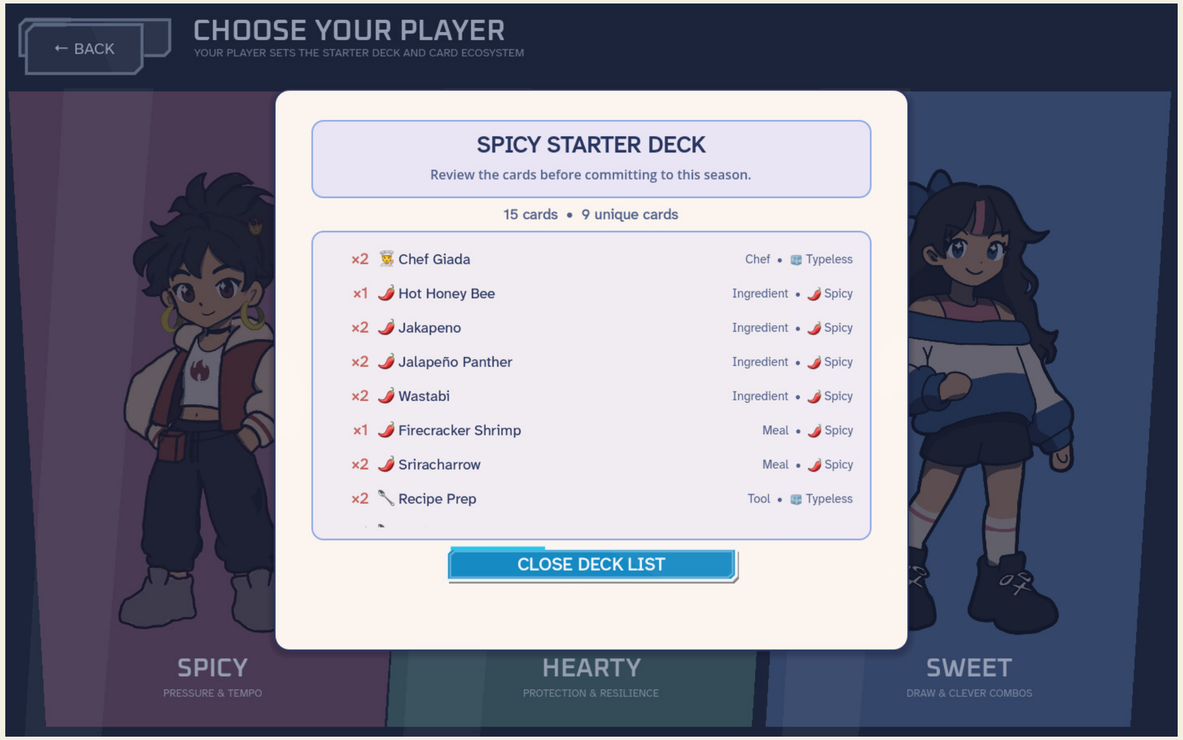
CURRENT



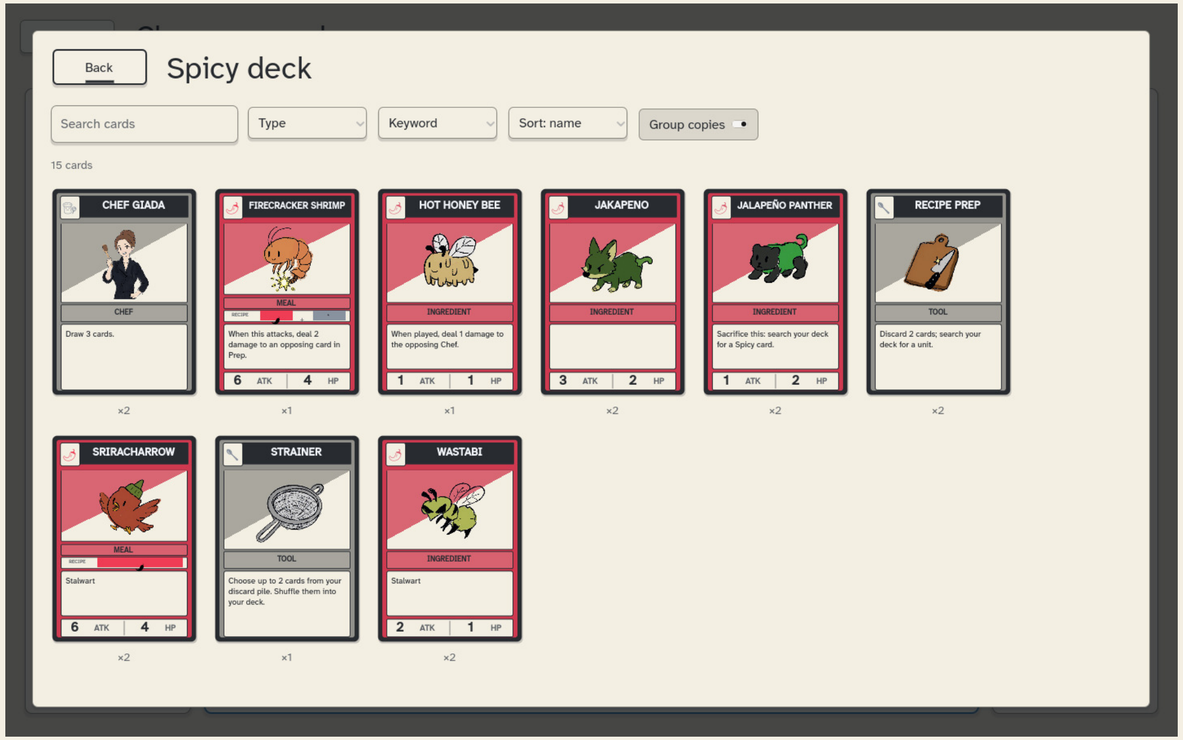
Selection uses a thin blue edge and paper details. The selected Hearty player remains the same.

# Starter deck preview

EARLIER BUILD



CURRENT



The text-heavy list becomes a searchable illustrated card browser with paper controls.

# Tutorial: welcome

PARTLY UPDATED

Live tutorial panel and Begin Tutorial action. Some older tutorial styling remains.

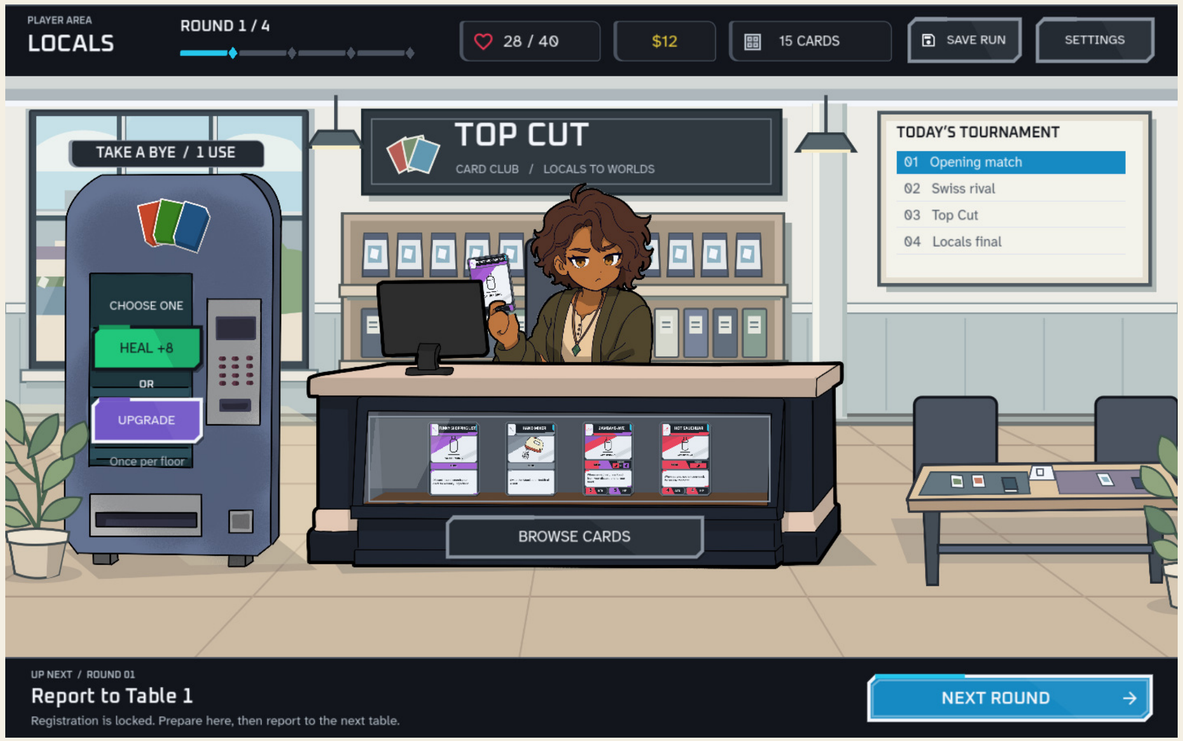
# Tutorial: first Ingredient

PARTLY UPDATED

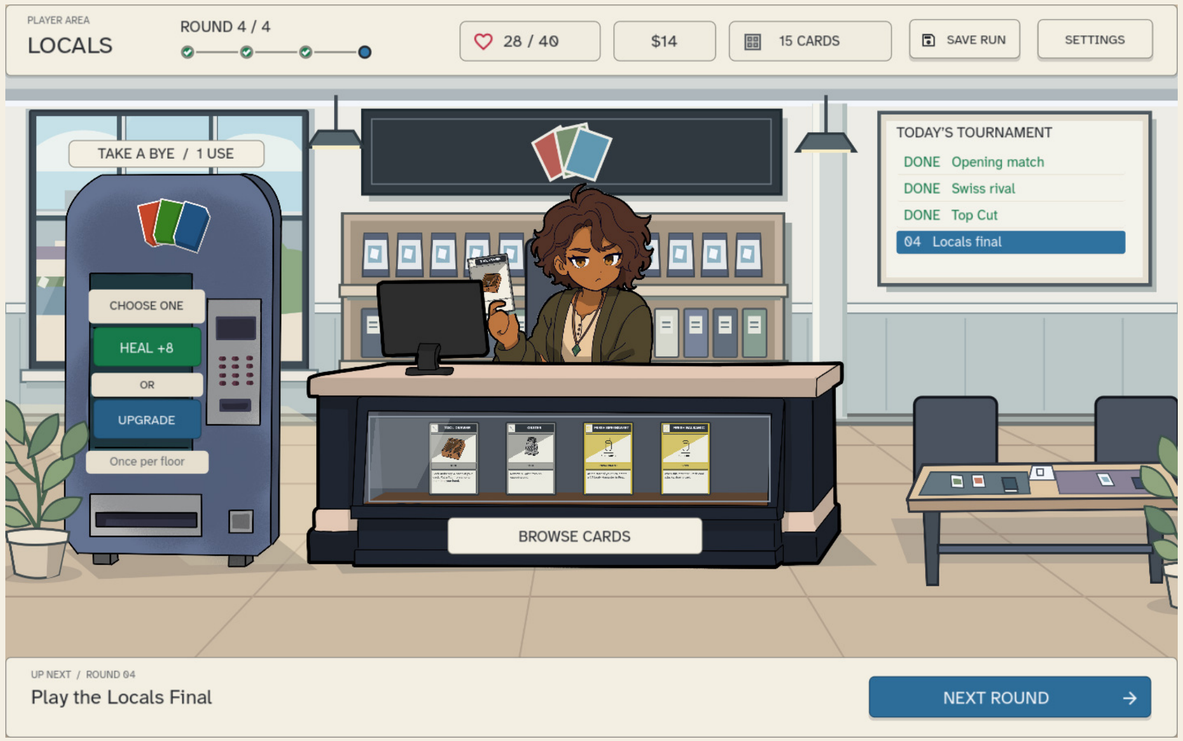
The next tutorial instruction and playable card state. Same panel family as the welcome step.

# Tournament hub

EARLIER BUILD



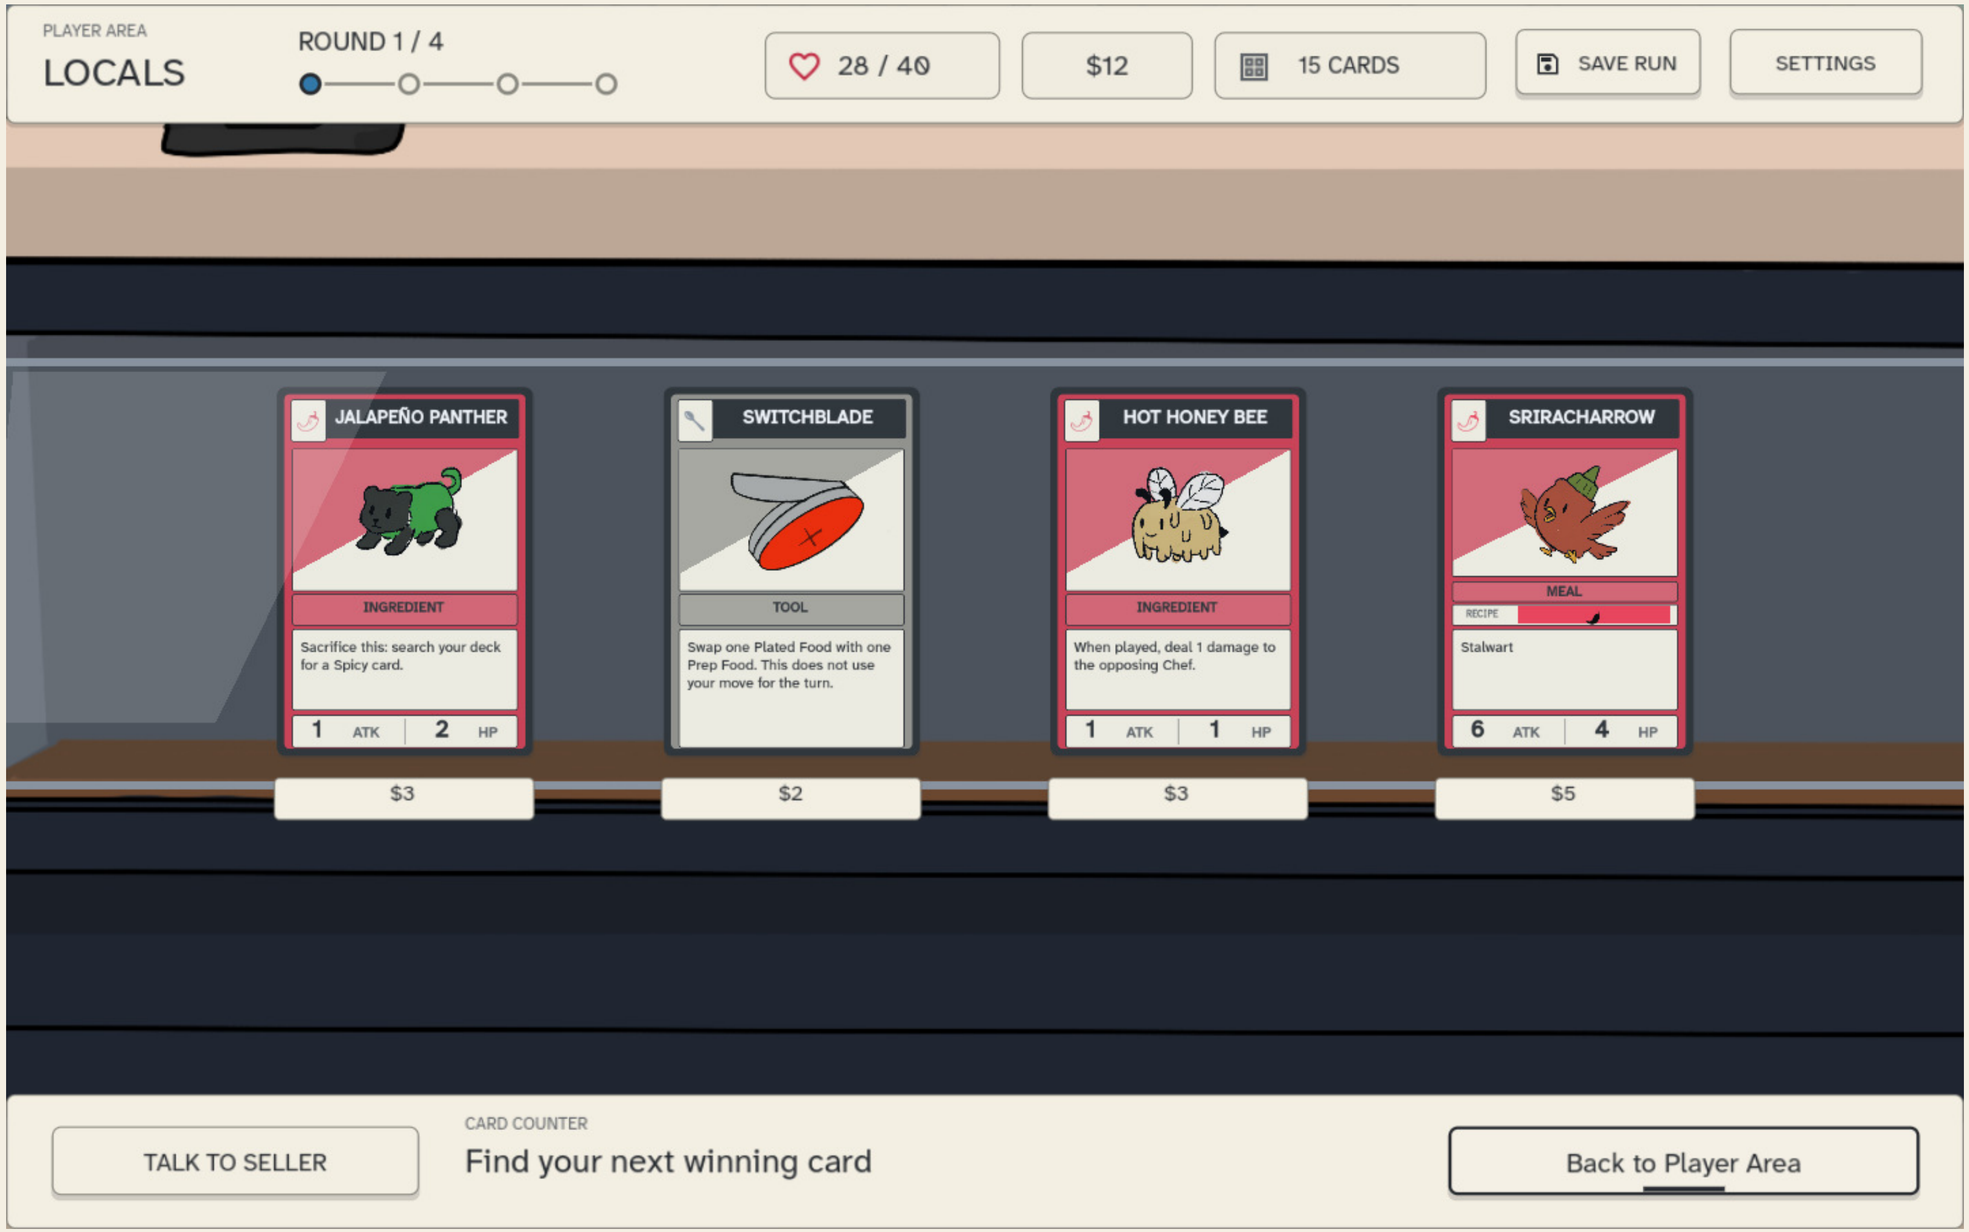
CURRENT



Paper strips, quieter buttons and checked round progress replace heavy dark bars. Round and resources differ between fixtures.

# Card counter

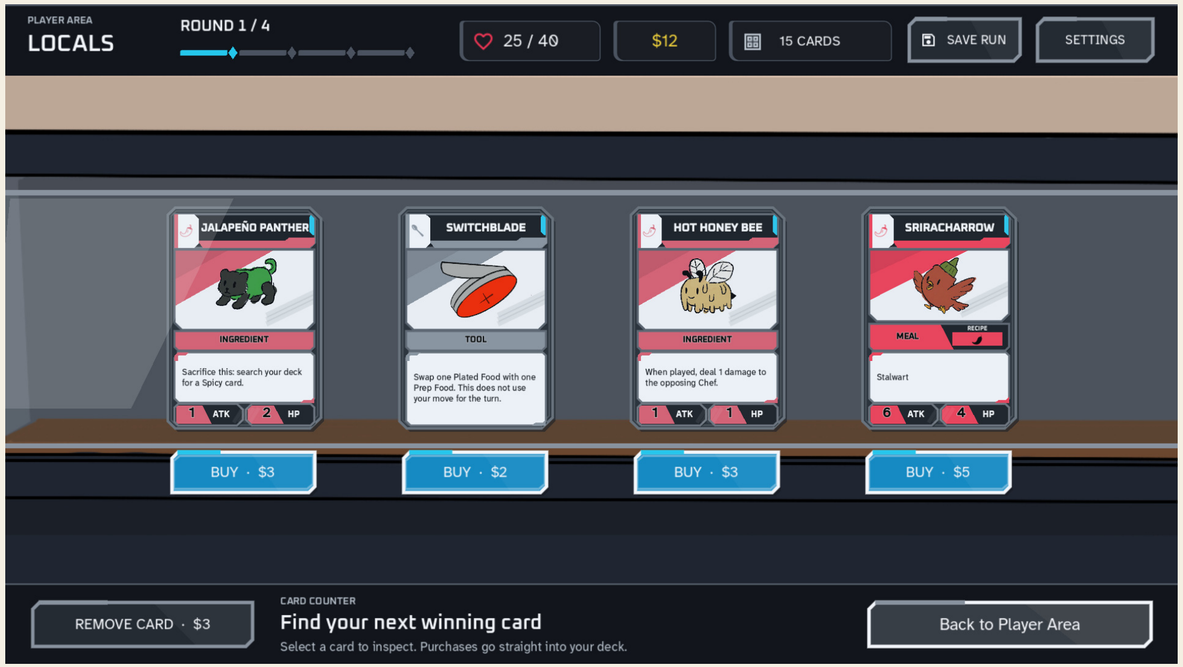
CURRENT



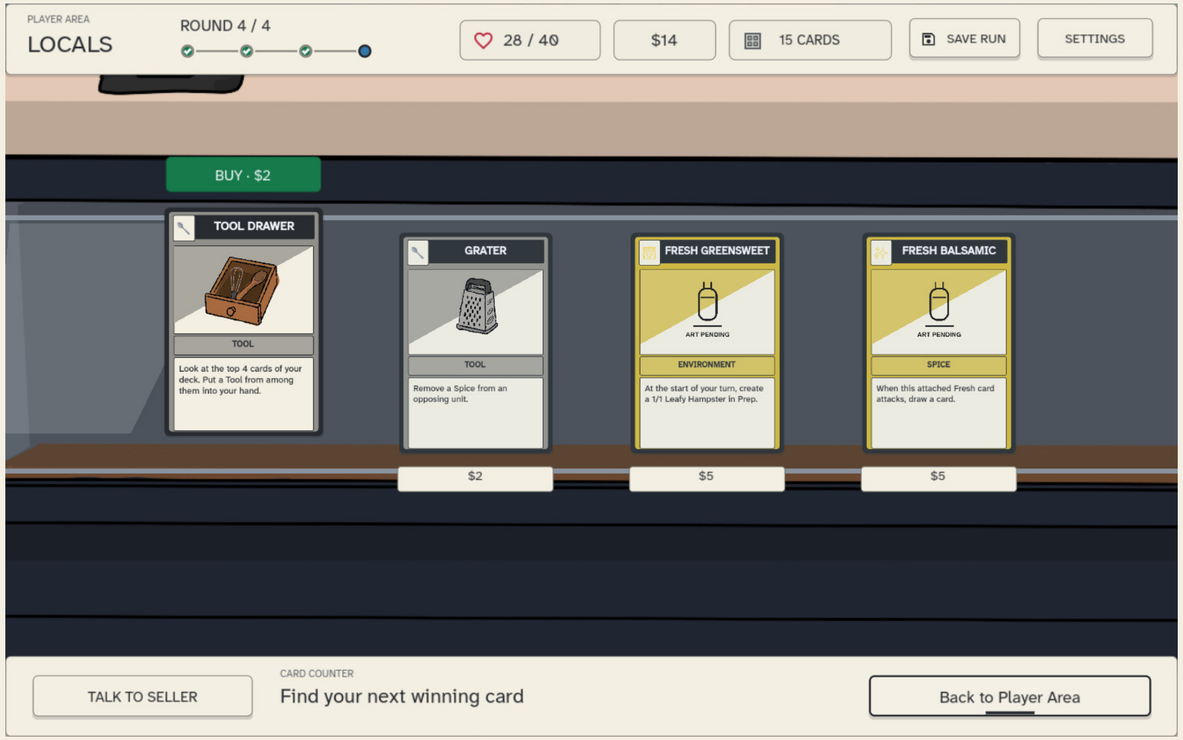
Current counter before a card is selected.

# Counter: selected card

EARLIER BUILD



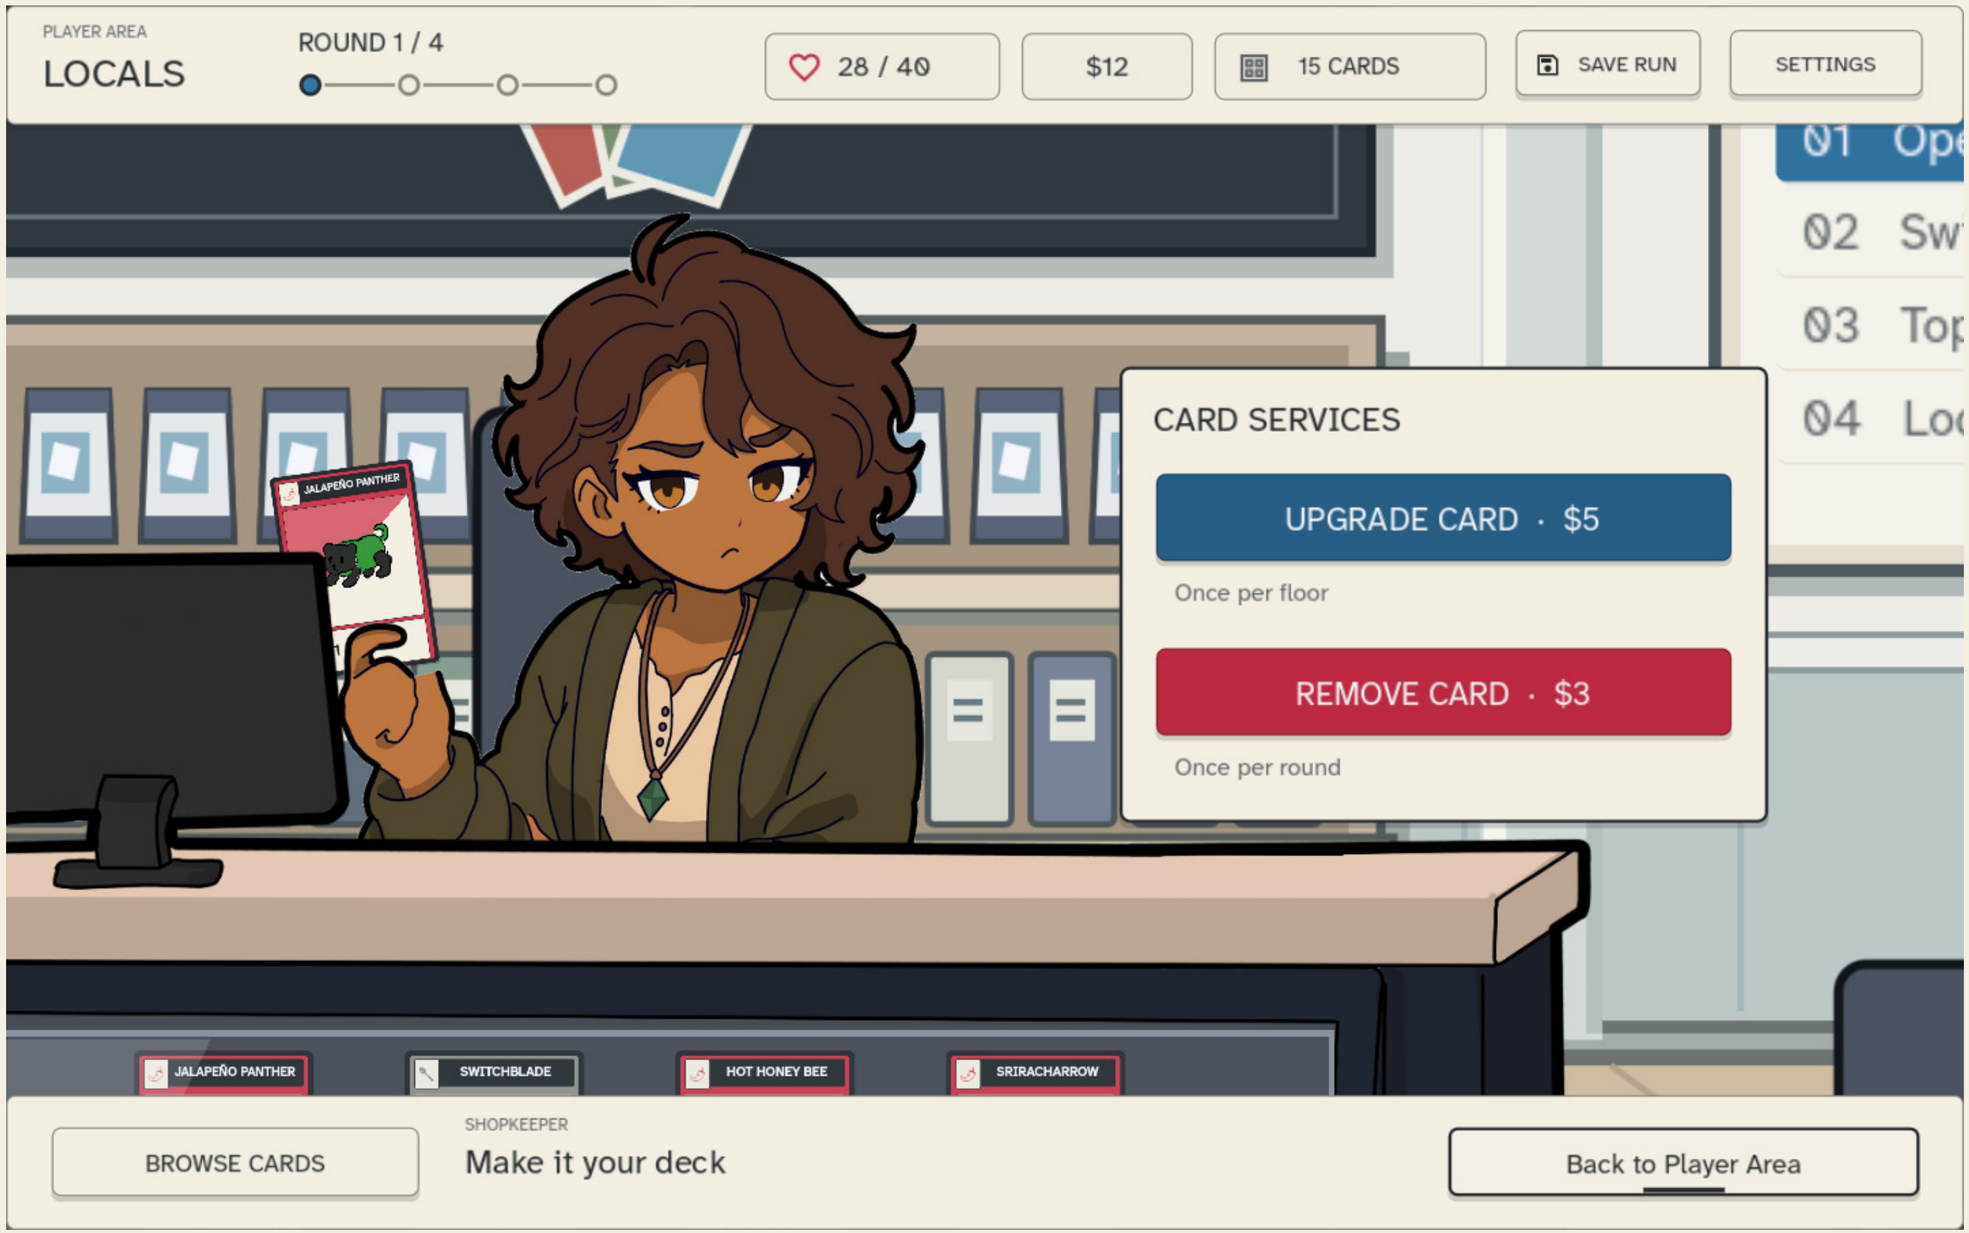
CURRENT



Paper price tags and a clear green Buy action replace bright framed purchase controls. Stock differs.

# Seller services

CURRENT

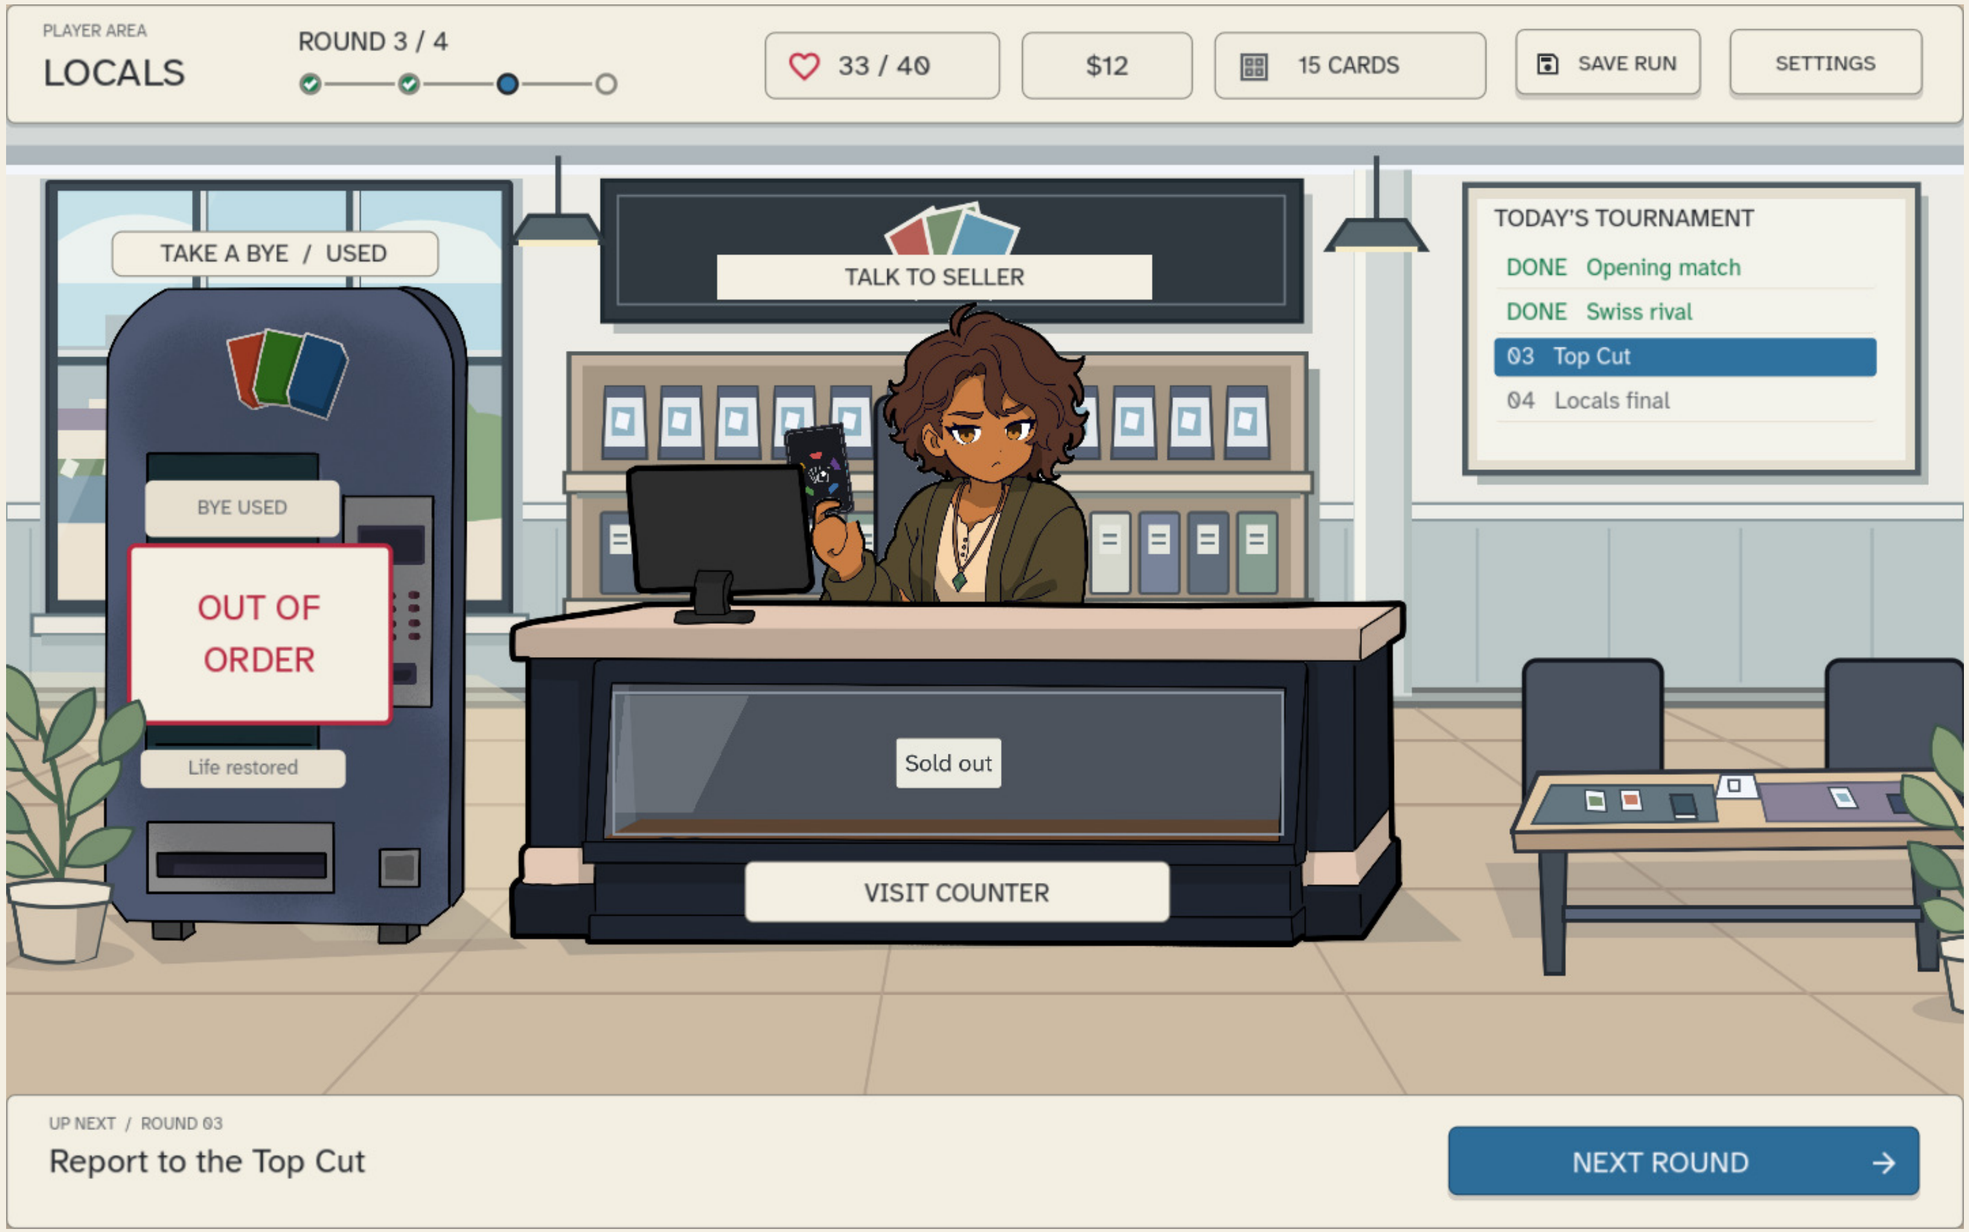


Current seller close-up with paid upgrade and removal actions.

Current in-game capture. No matching archived screenshot is claimed.

# Bye already used

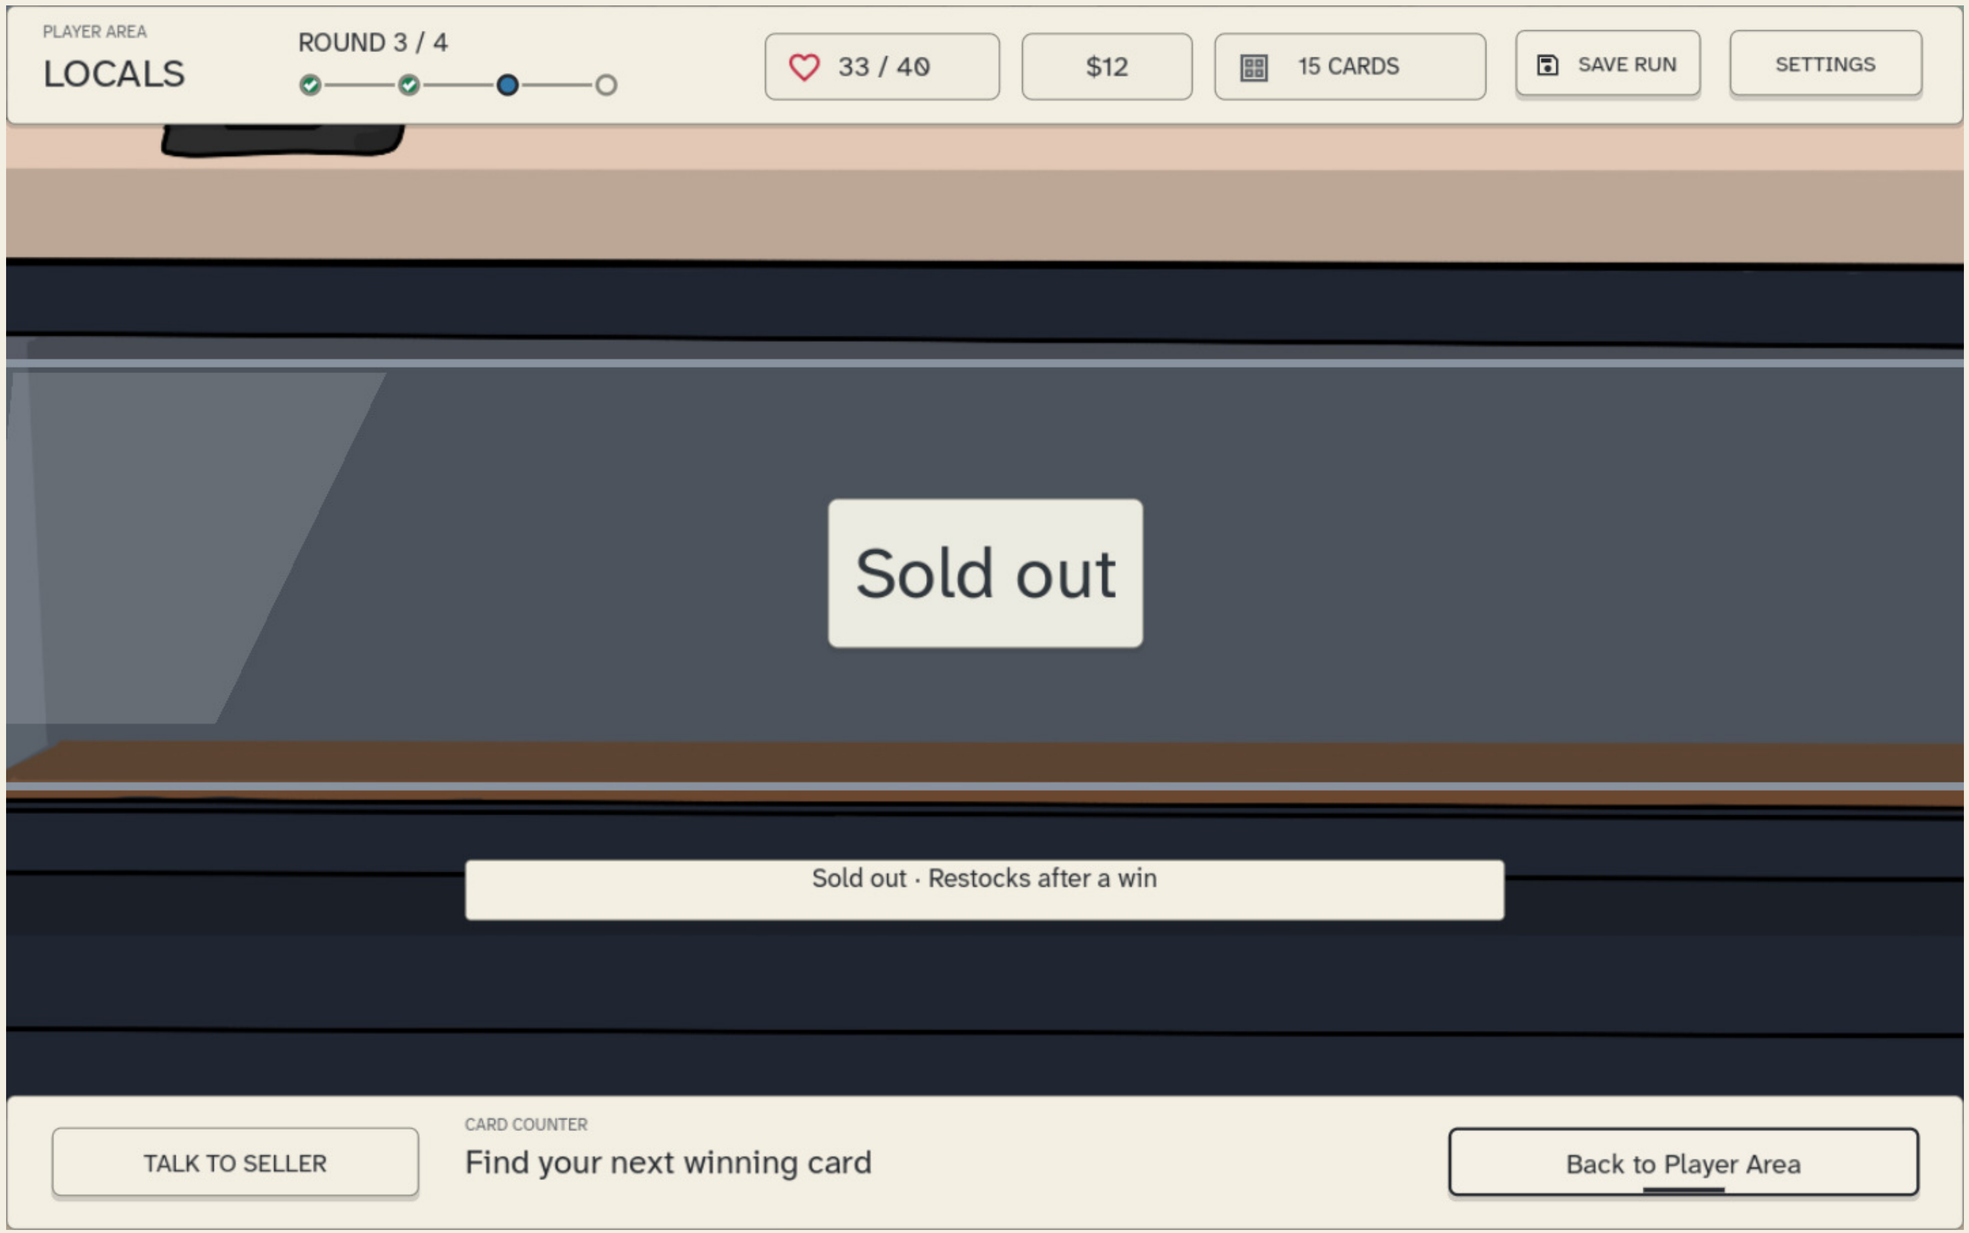
CURRENT



Current hub after the floor bye has been spent.

# Counter: sold out

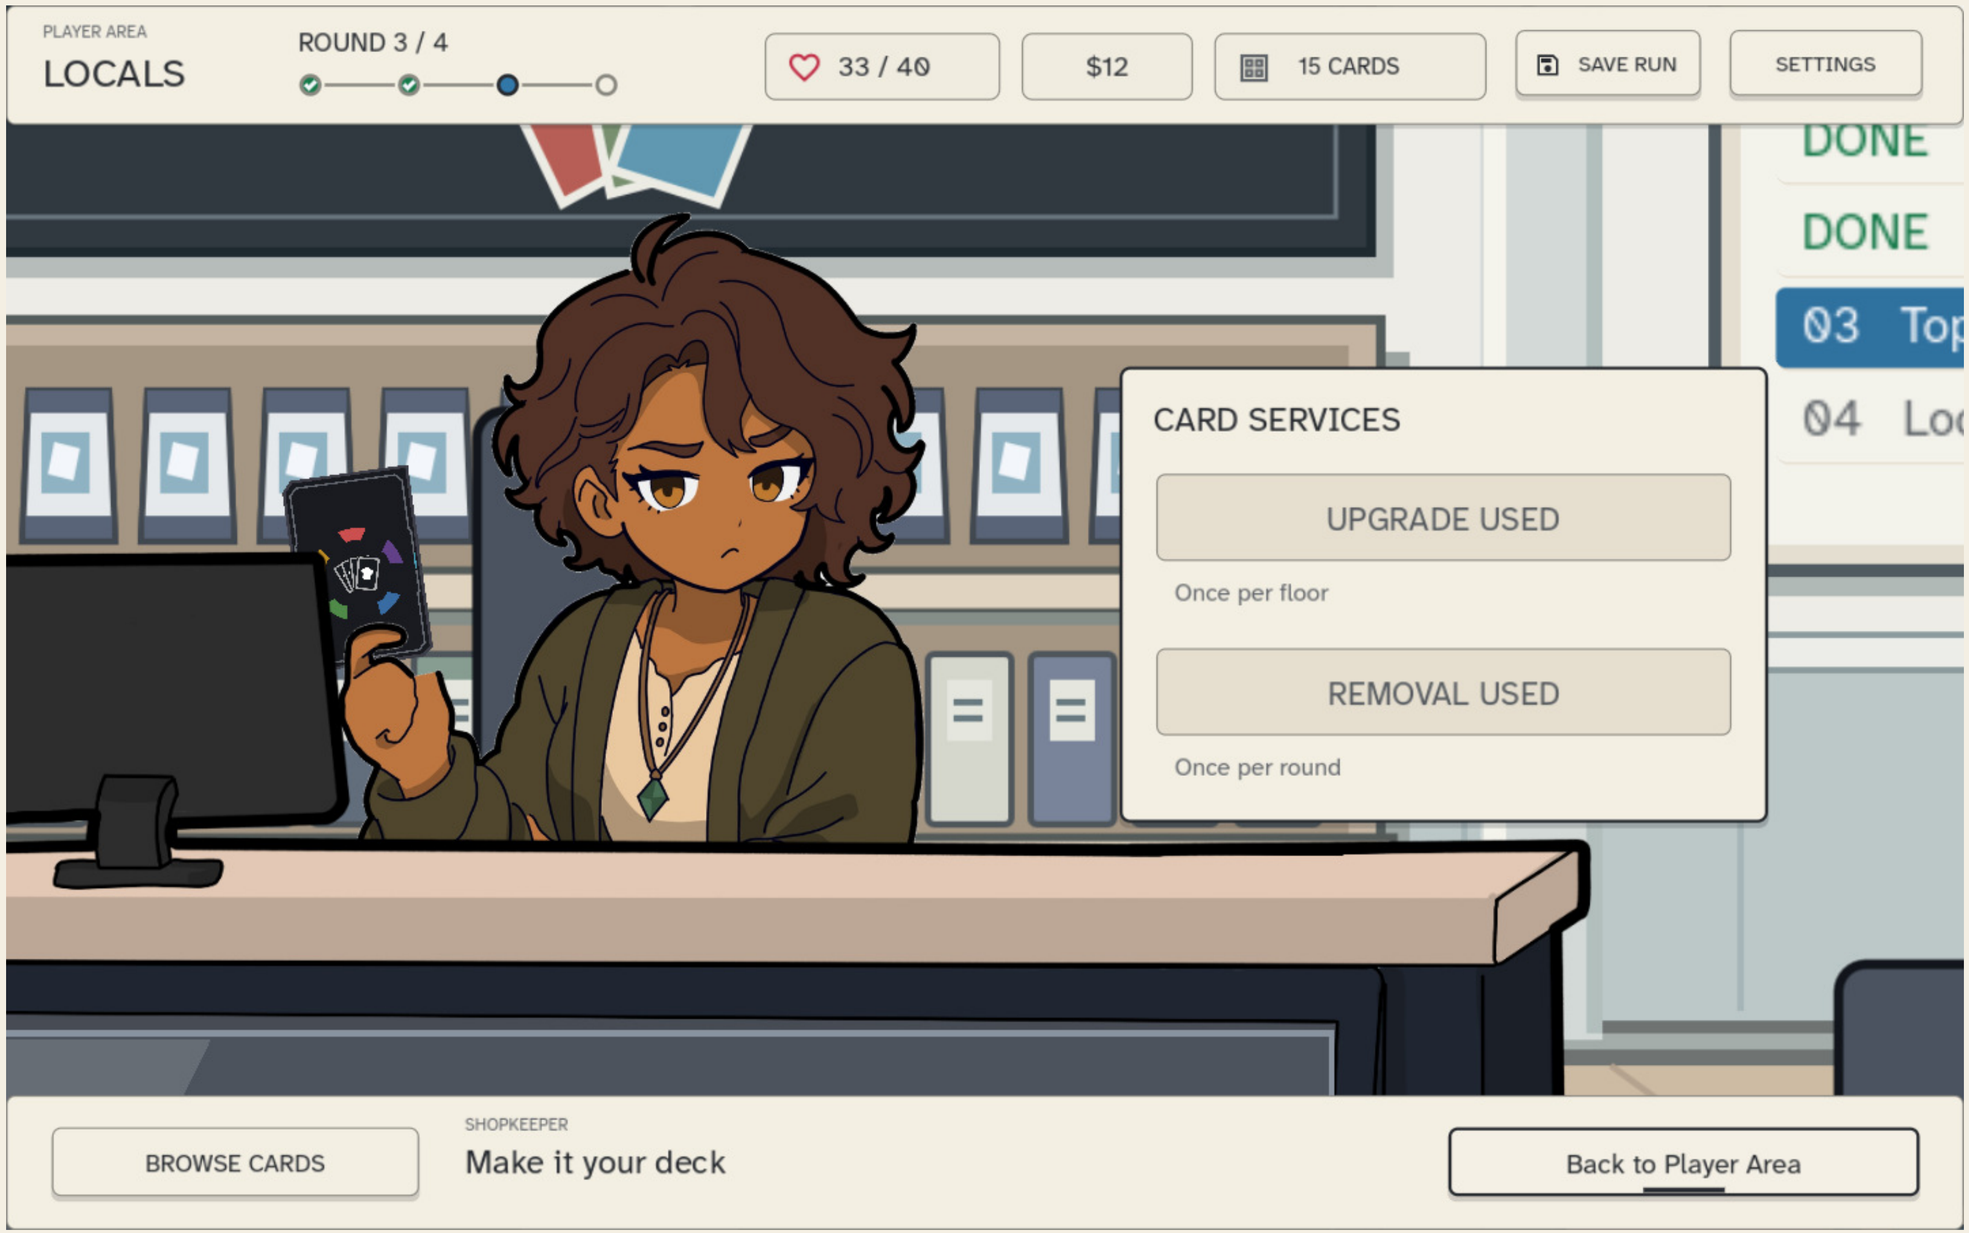
CURRENT



Current sold-out counter with paper availability labels.

# Seller: services used

CURRENT

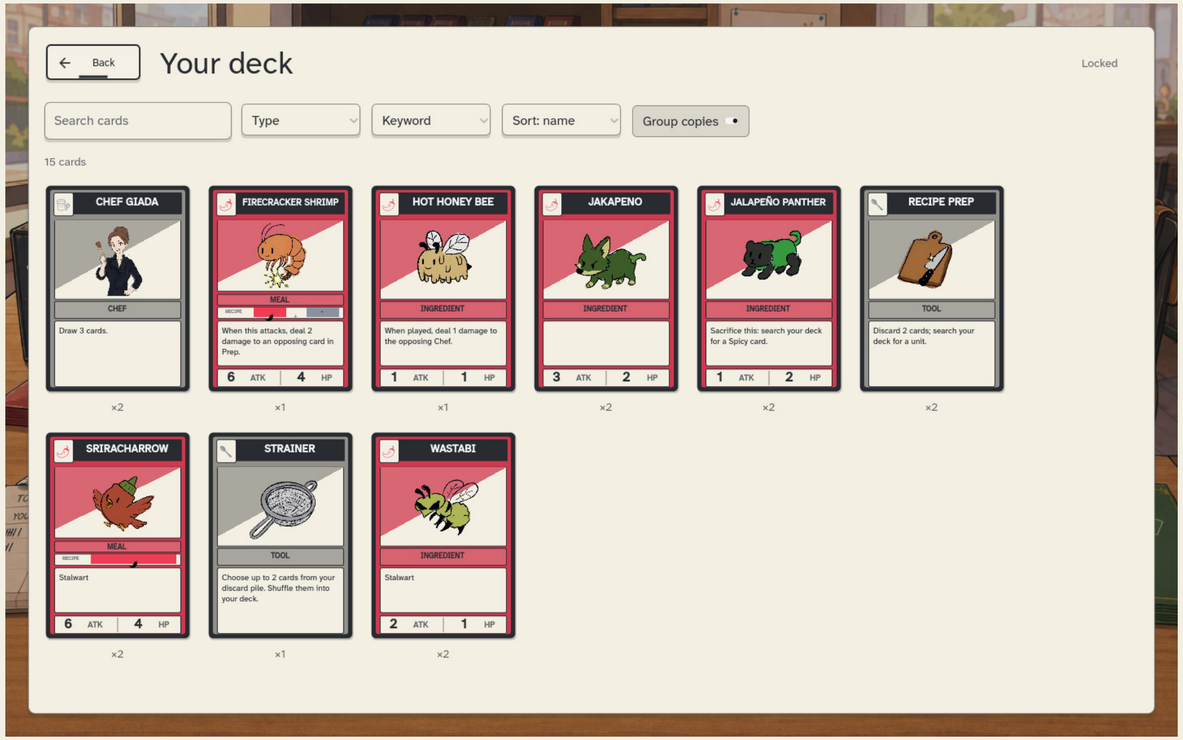


Disabled service actions after the available upgrade and removal have been used.

# Your deck

EARLIER BUILD

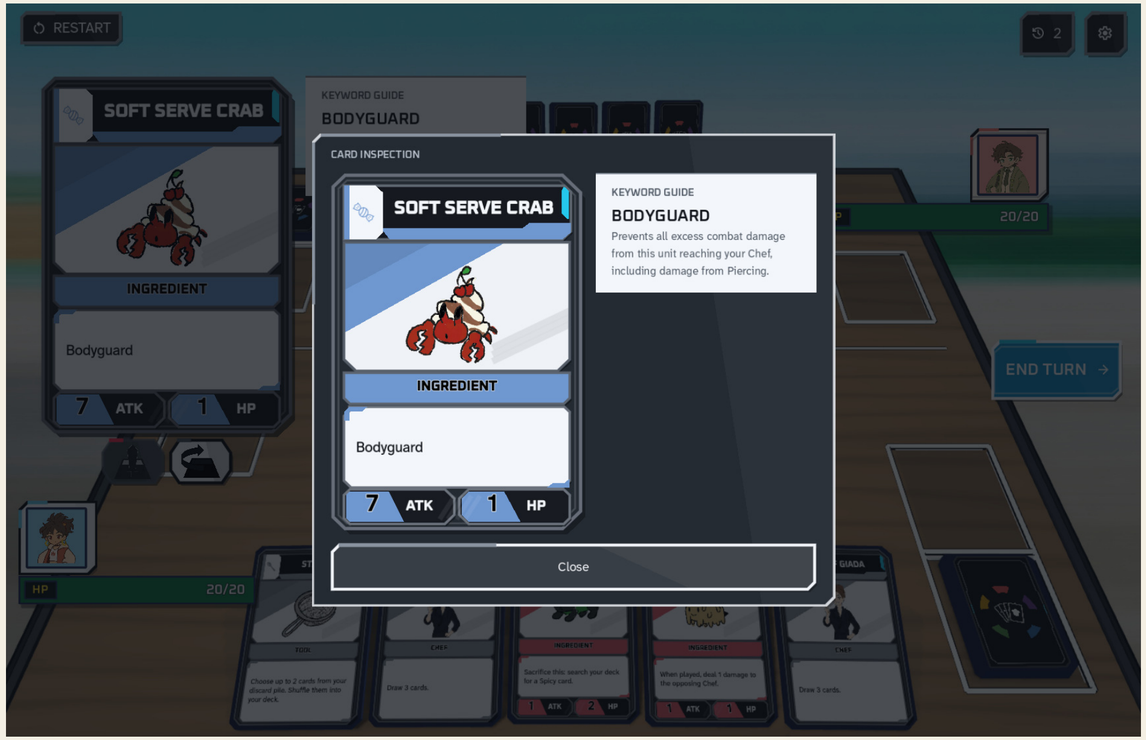
CURRENT



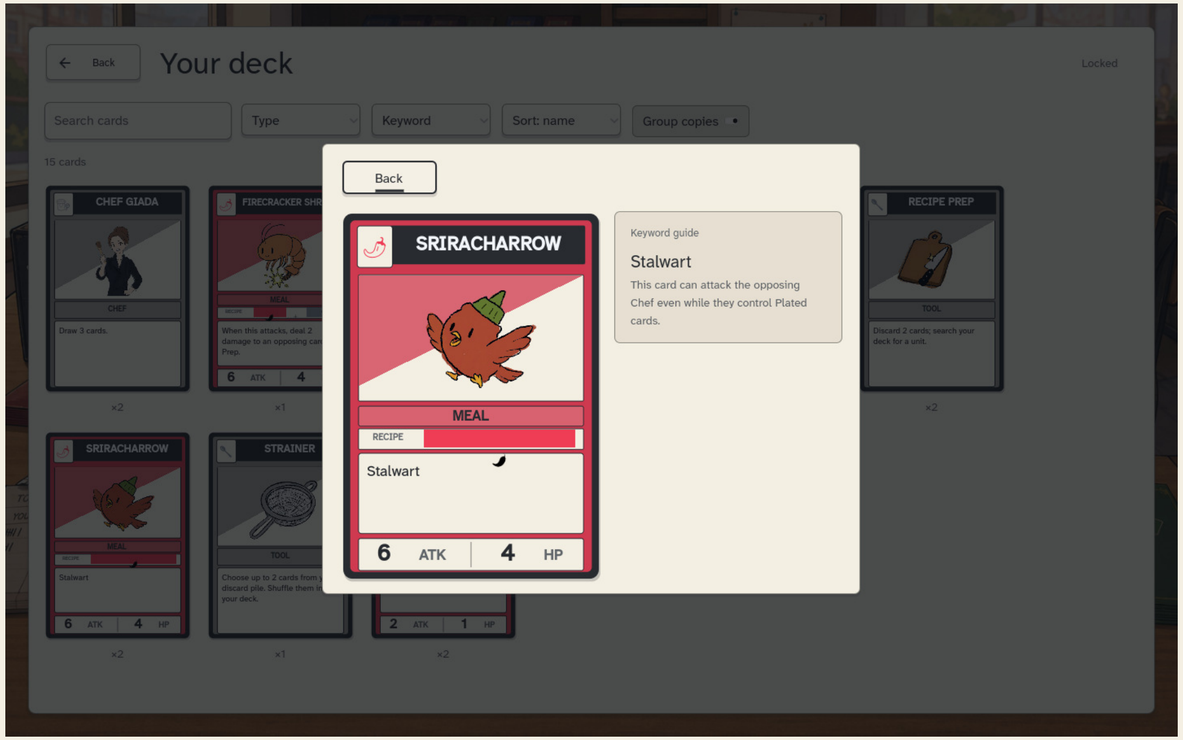
A paper sheet, search/filter controls and grouped card copies replace the framed gray deck grid. Card order and counts differ.

# Full card inspection

EARLIER BUILD



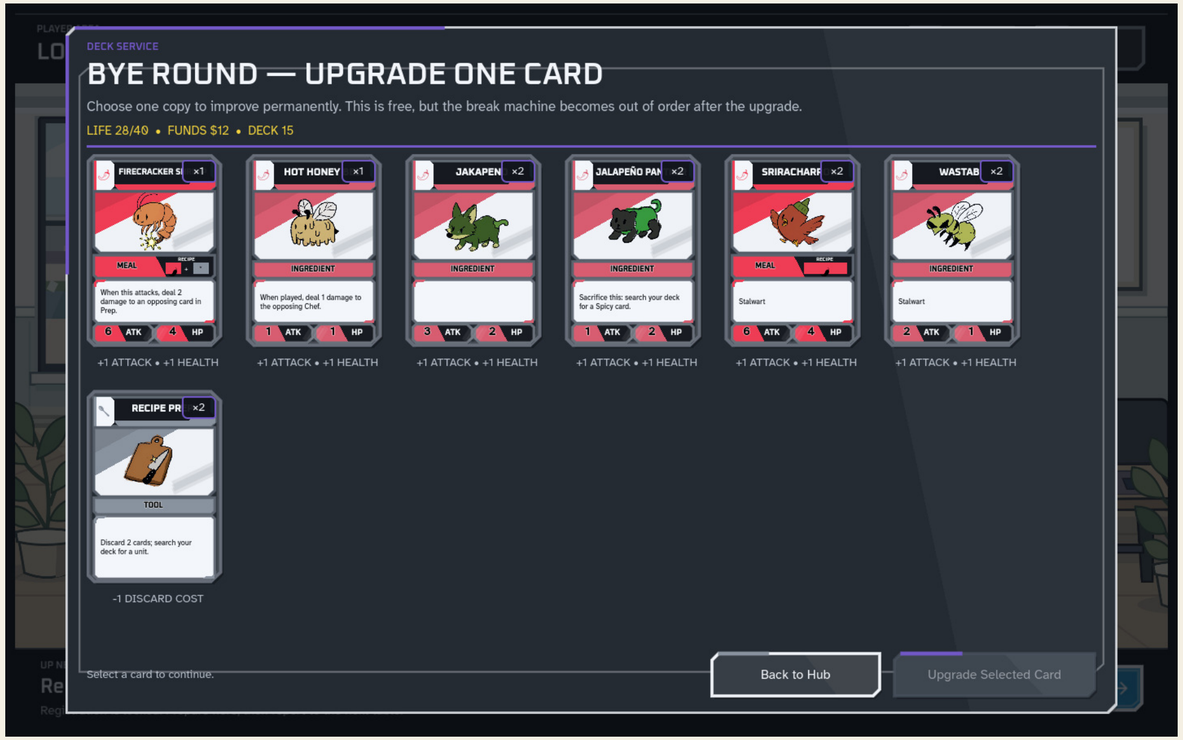
CURRENT



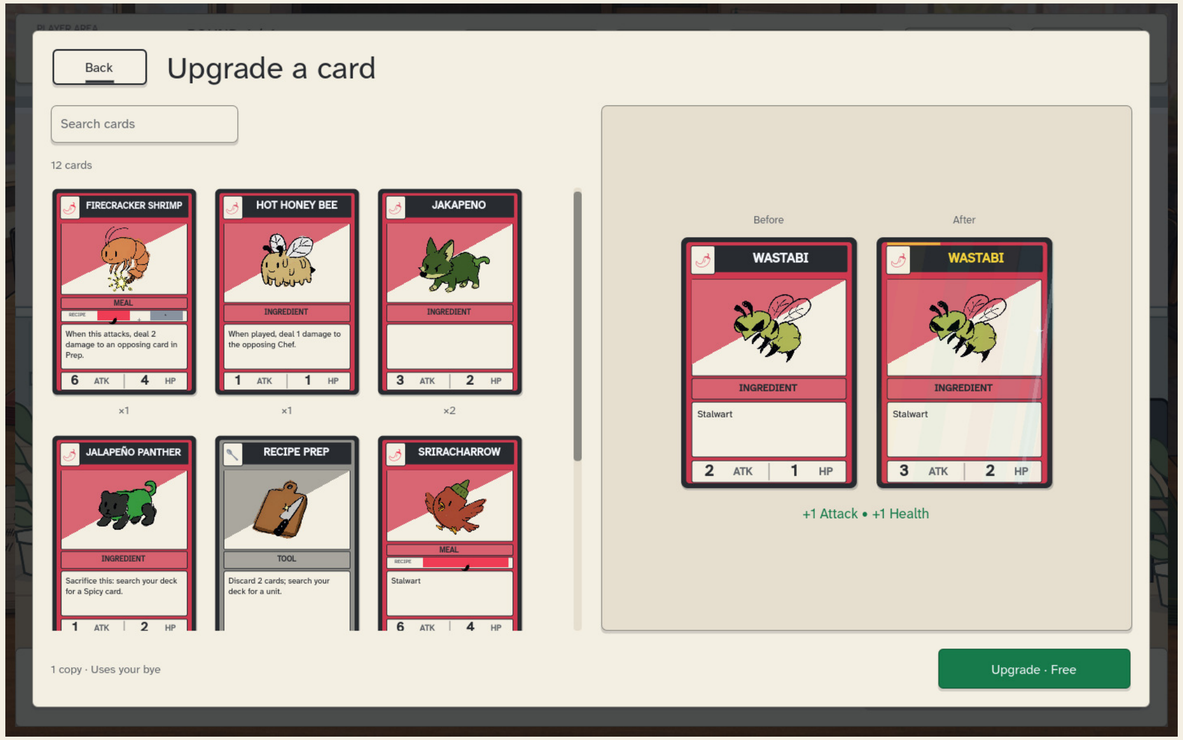
Paper and dark text replace the dark inspection sheet. This is the shared inspection component; the opening screen and card differ.

# Free card upgrade

EARLIER BUILD



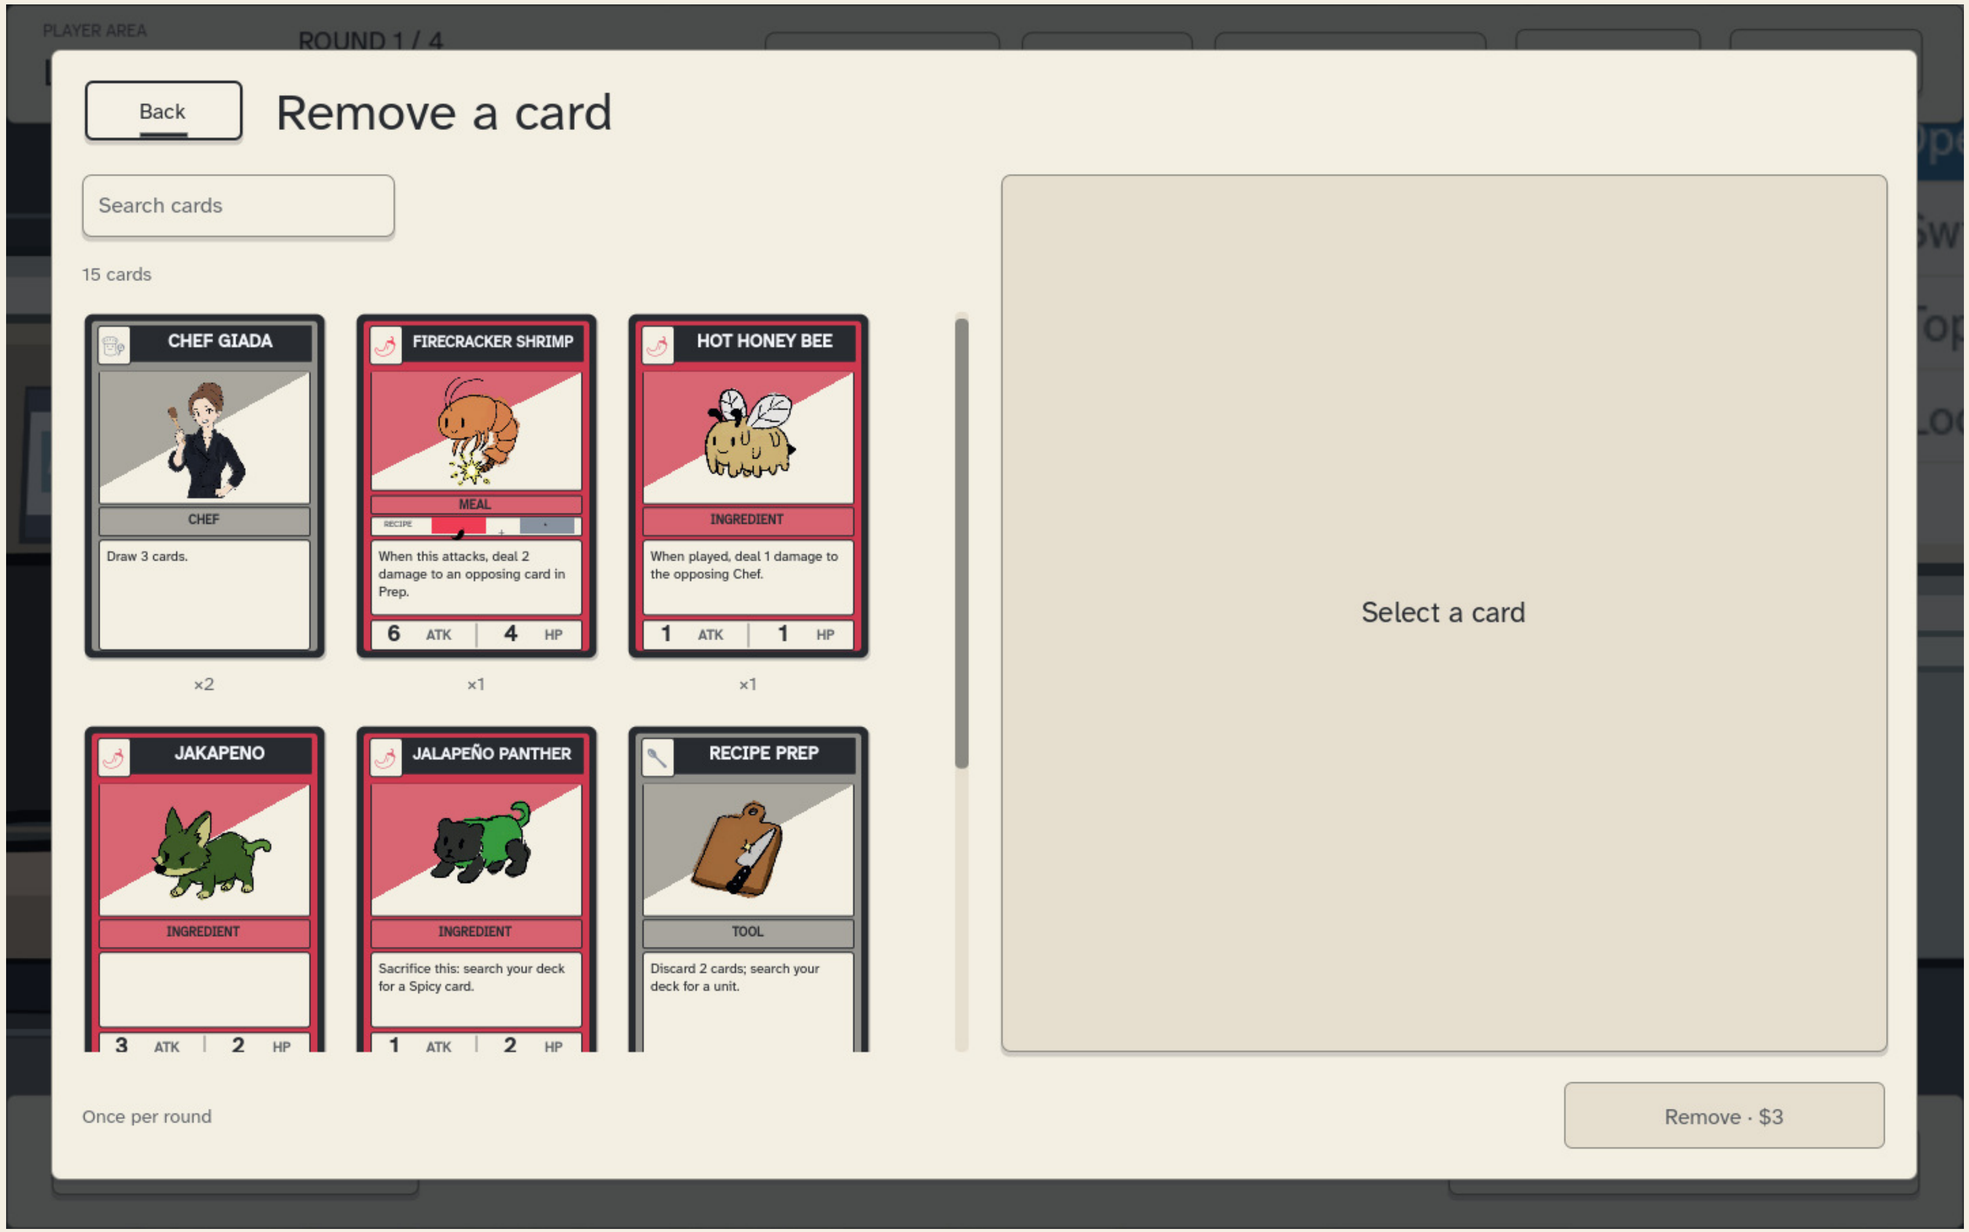
CURRENT



A paper selector and large Before/After card comparison replace the dark grid. The current view includes a selected card.

# Remove a card: picker

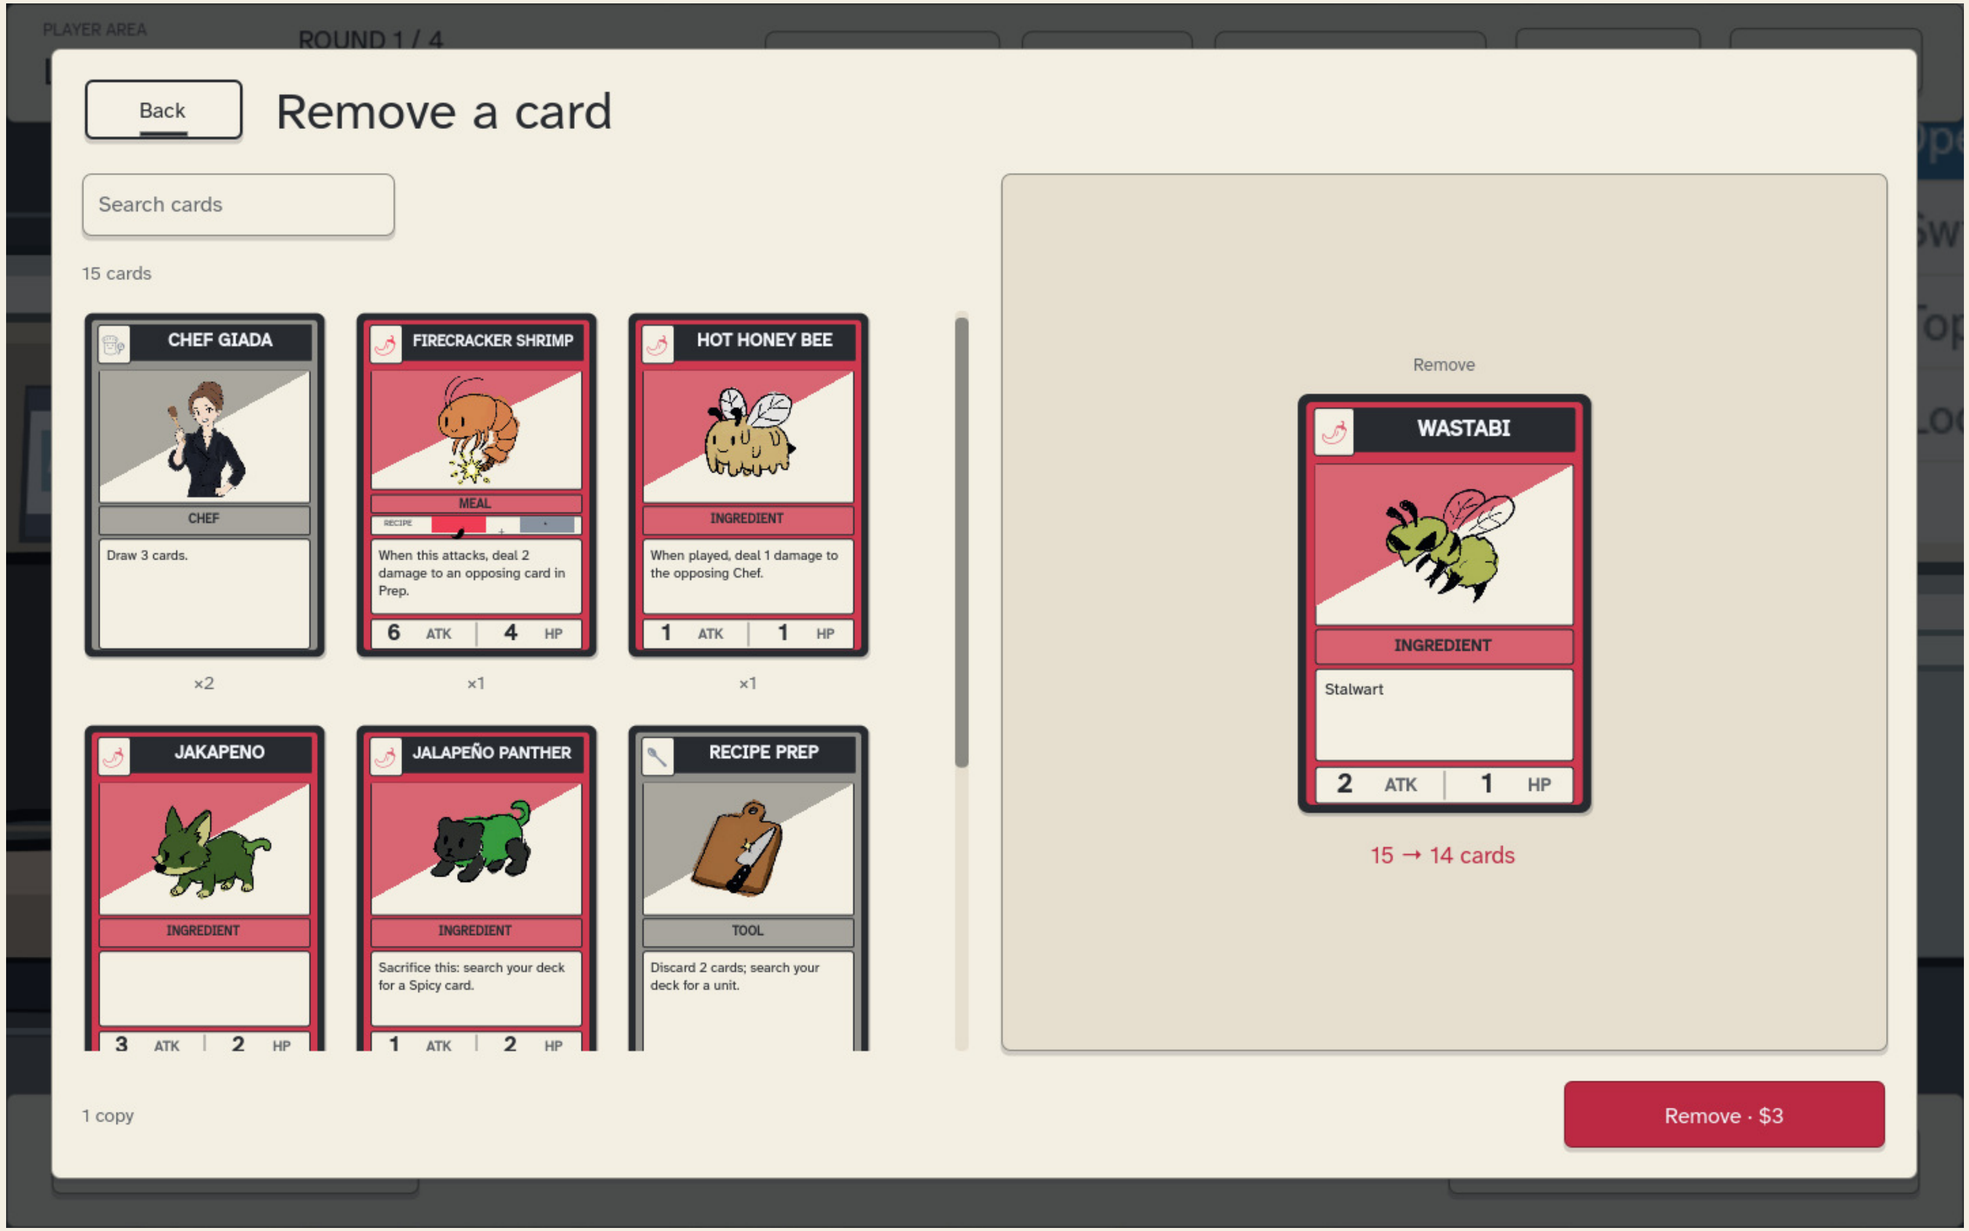
CURRENT



Current removal dialog before choosing a physical card copy.

# Remove a card: selected

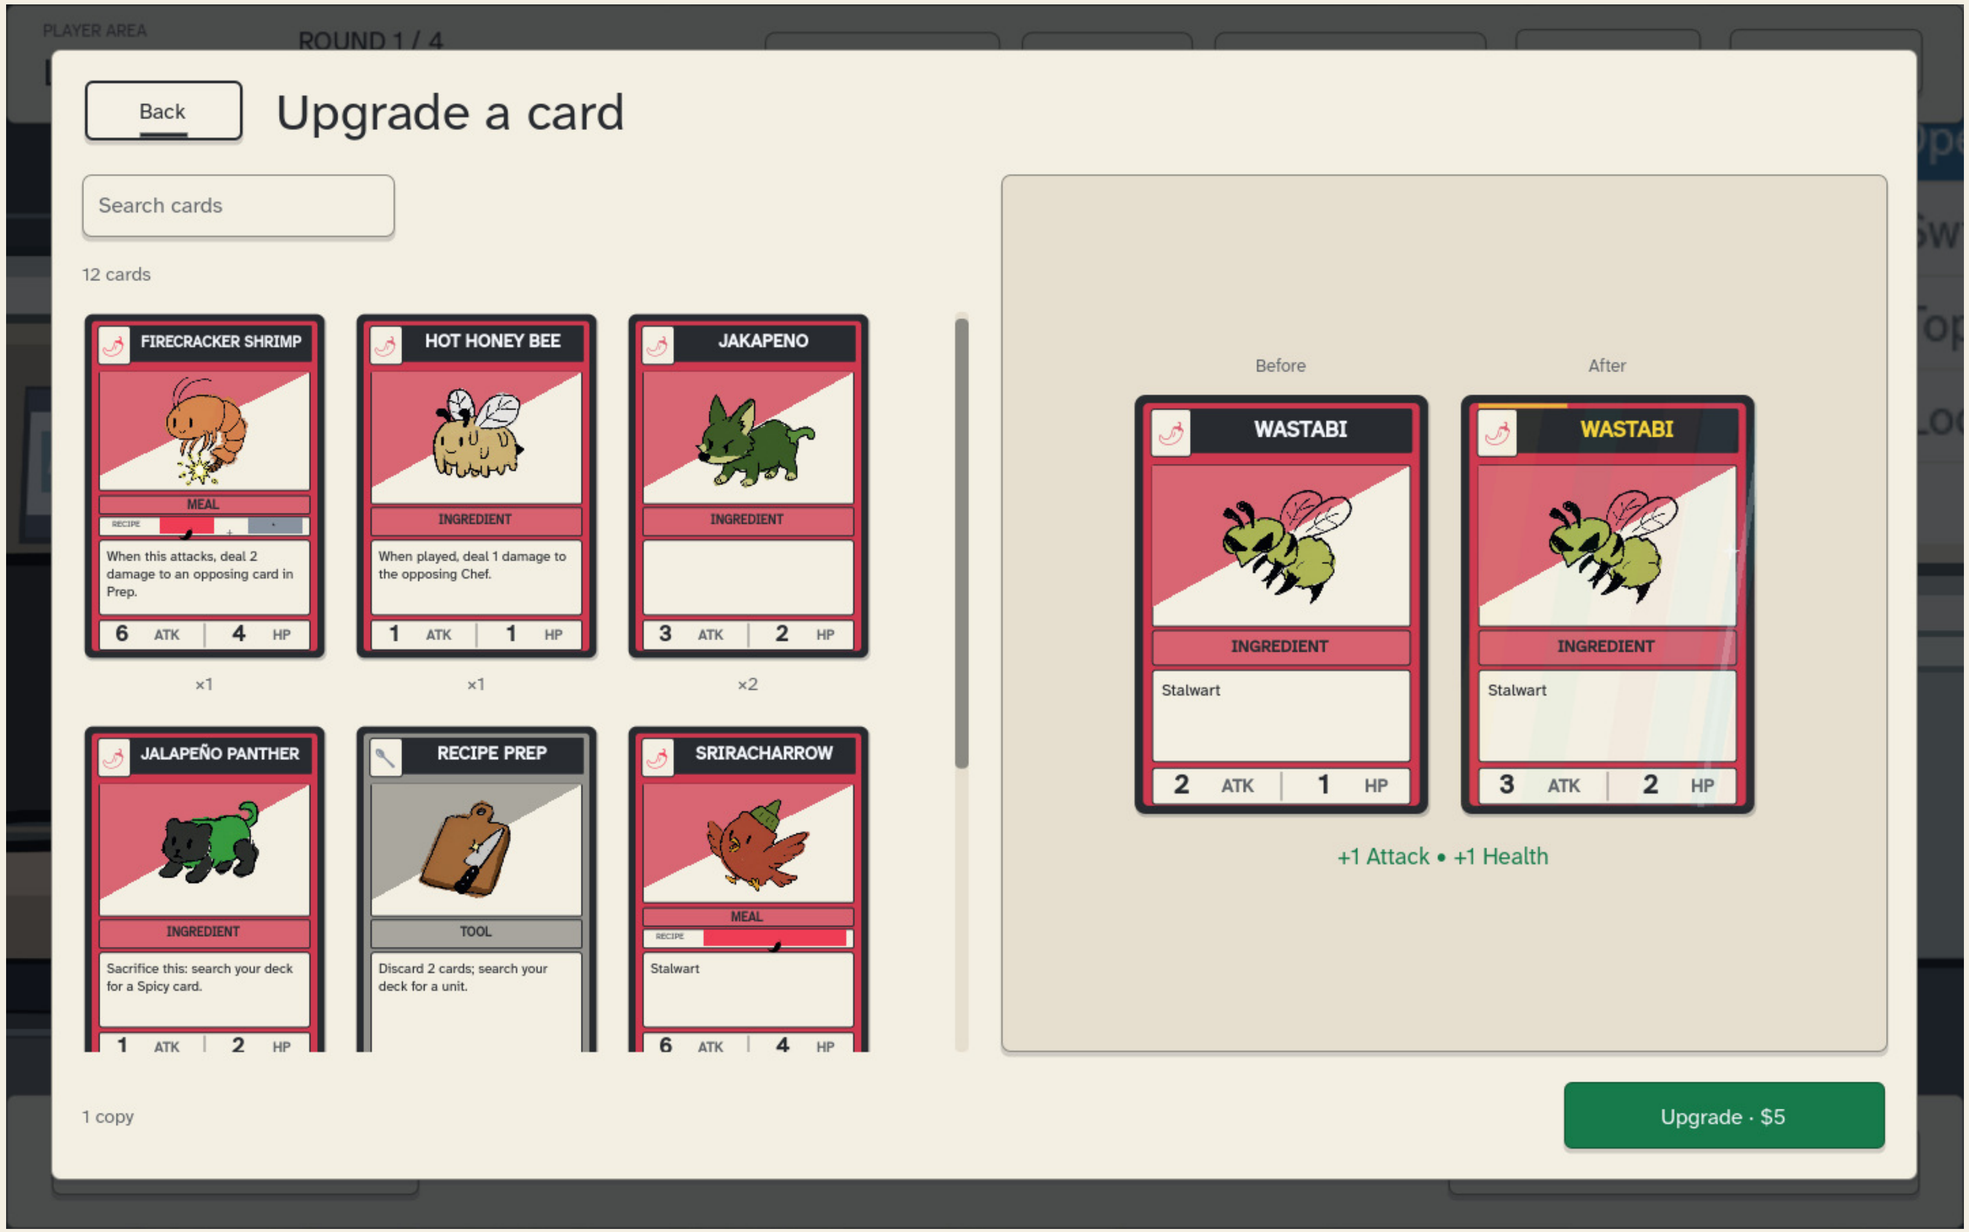
CURRENT



Selected card, removal cost and confirm/cancel controls.

# Paid card upgrade

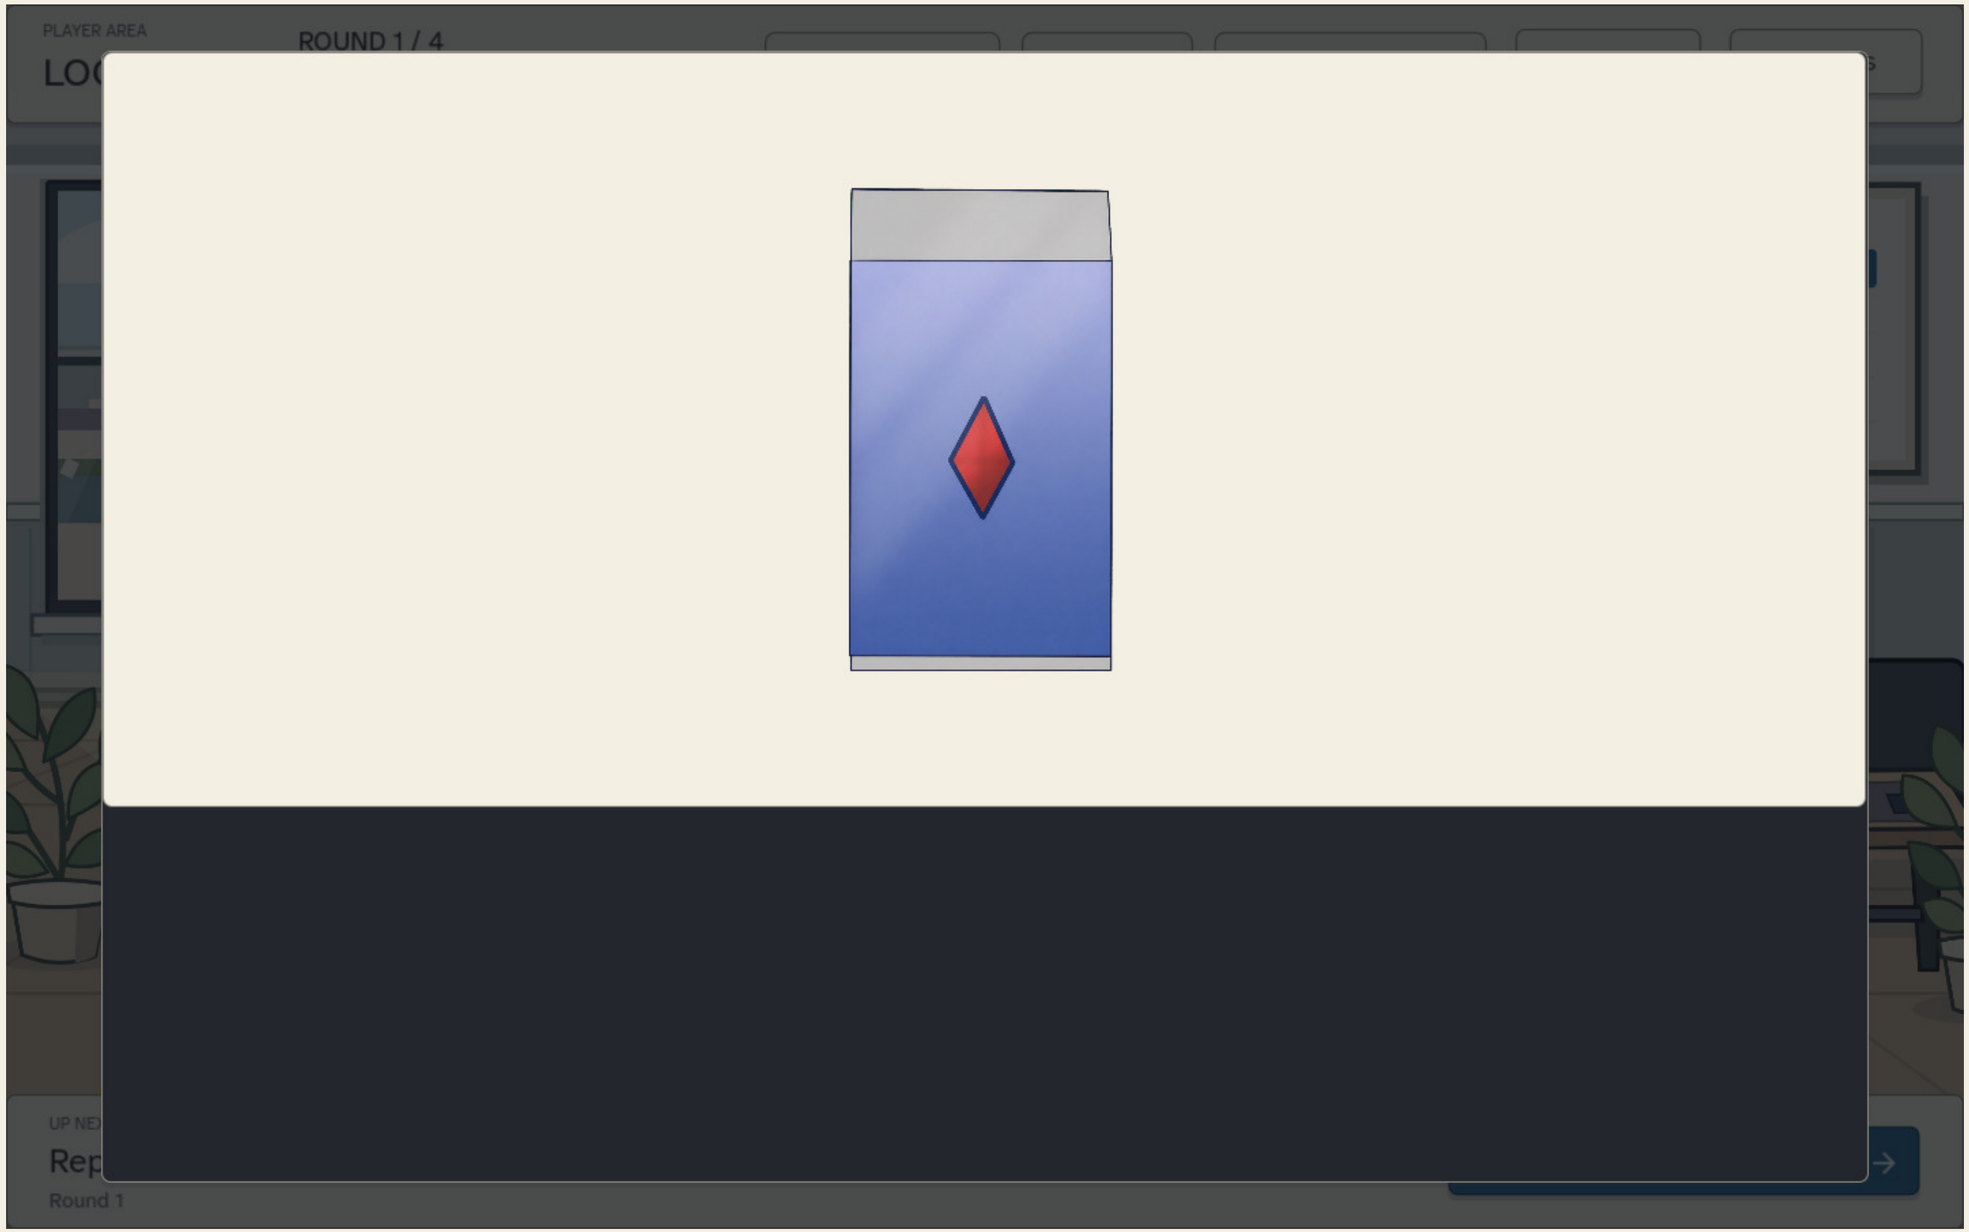
CURRENT



Seller upgrade uses the same comparison component as the free bye upgrade, with its own price.

# Sealed reward pack

PARTLY UPDATED

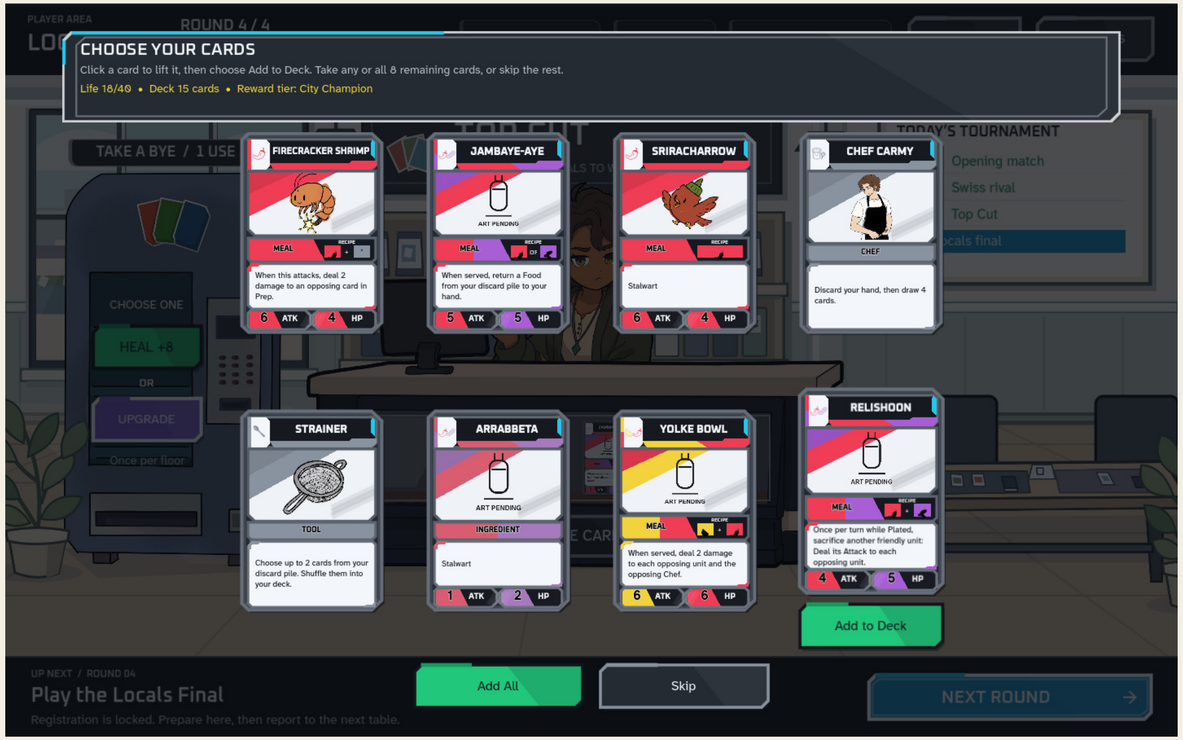


Current clickable reward pack. The generic pack art and absence of a visible instruction remain presentation gaps.

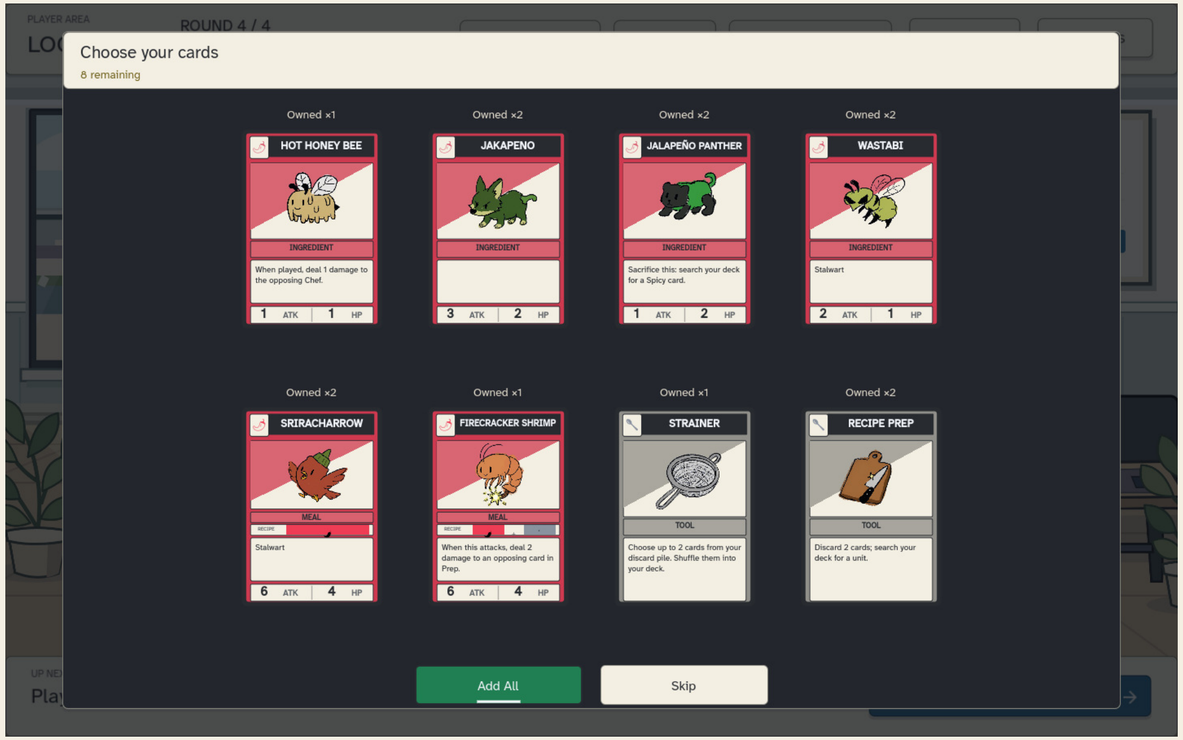
Current in-game capture. No matching archived screenshot is claimed.

# Choose reward cards

EARLIER BUILD



CURRENT

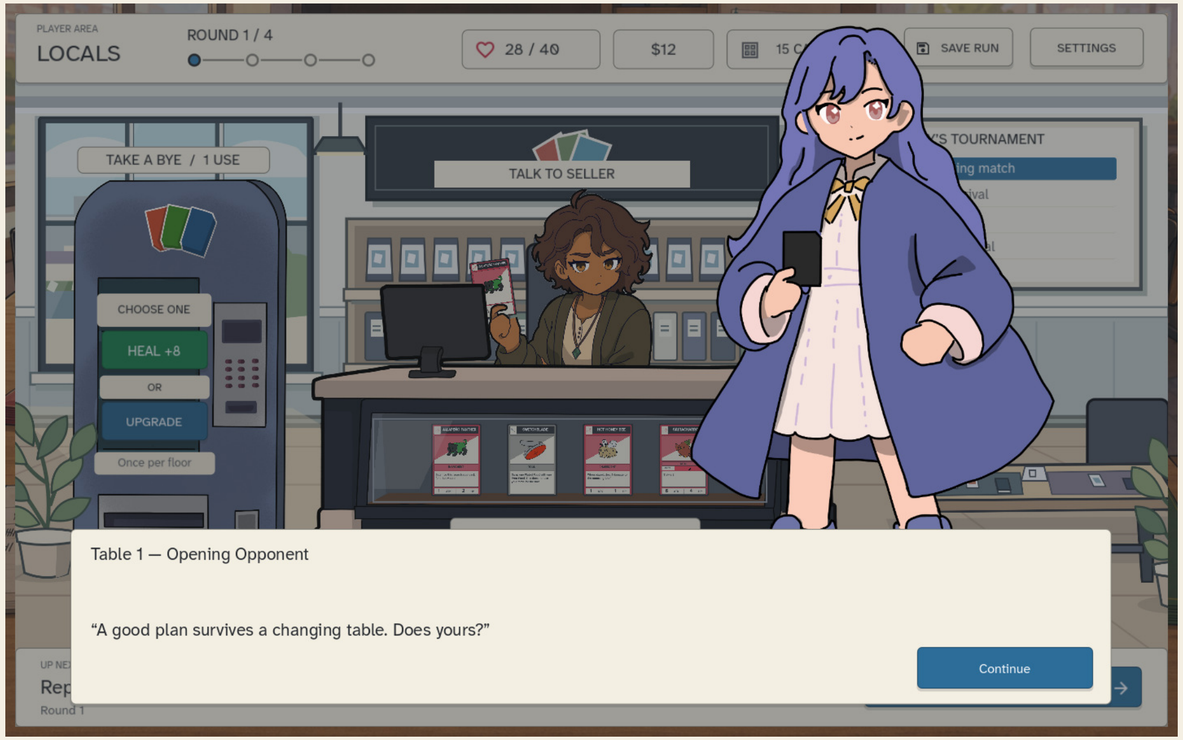


A charcoal tray grounds the cards. Paper header and light ownership counts improve separation from the busy hub.

# Rival introduction

EARLIER BUILD

CURRENT



Paper dialogue and readable type replace older dark encounter chrome. The archived view uses the previous overworld, so this is a flow comparison.

# Battle: opening table

CURRENT

Current sparse board, Mina scene, paper scorecards and separate live cards.

# Battle: populated table

EARLIER BUILD

CURRENT

Illustrated locals room and Mina, broad cloth mat, paper scorecards and white art outlines replace the earlier board treatment.

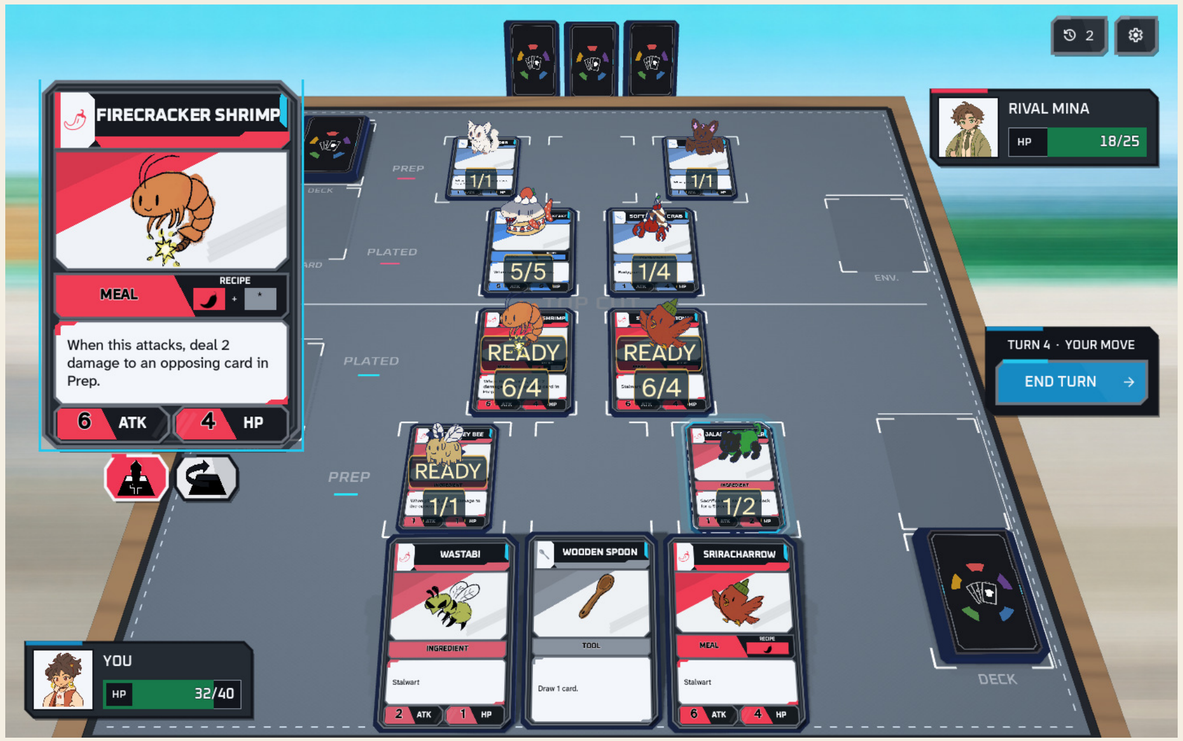
# Battle: card placement

CURRENT

Live legal placement targets and Cancel action after choosing a card to play.

# Battle: card actions

EARLIER BUILD



CURRENT

Printed card frames, simpler action buttons and paper keyword information replace heavier inspection framing. The inspected card differs.

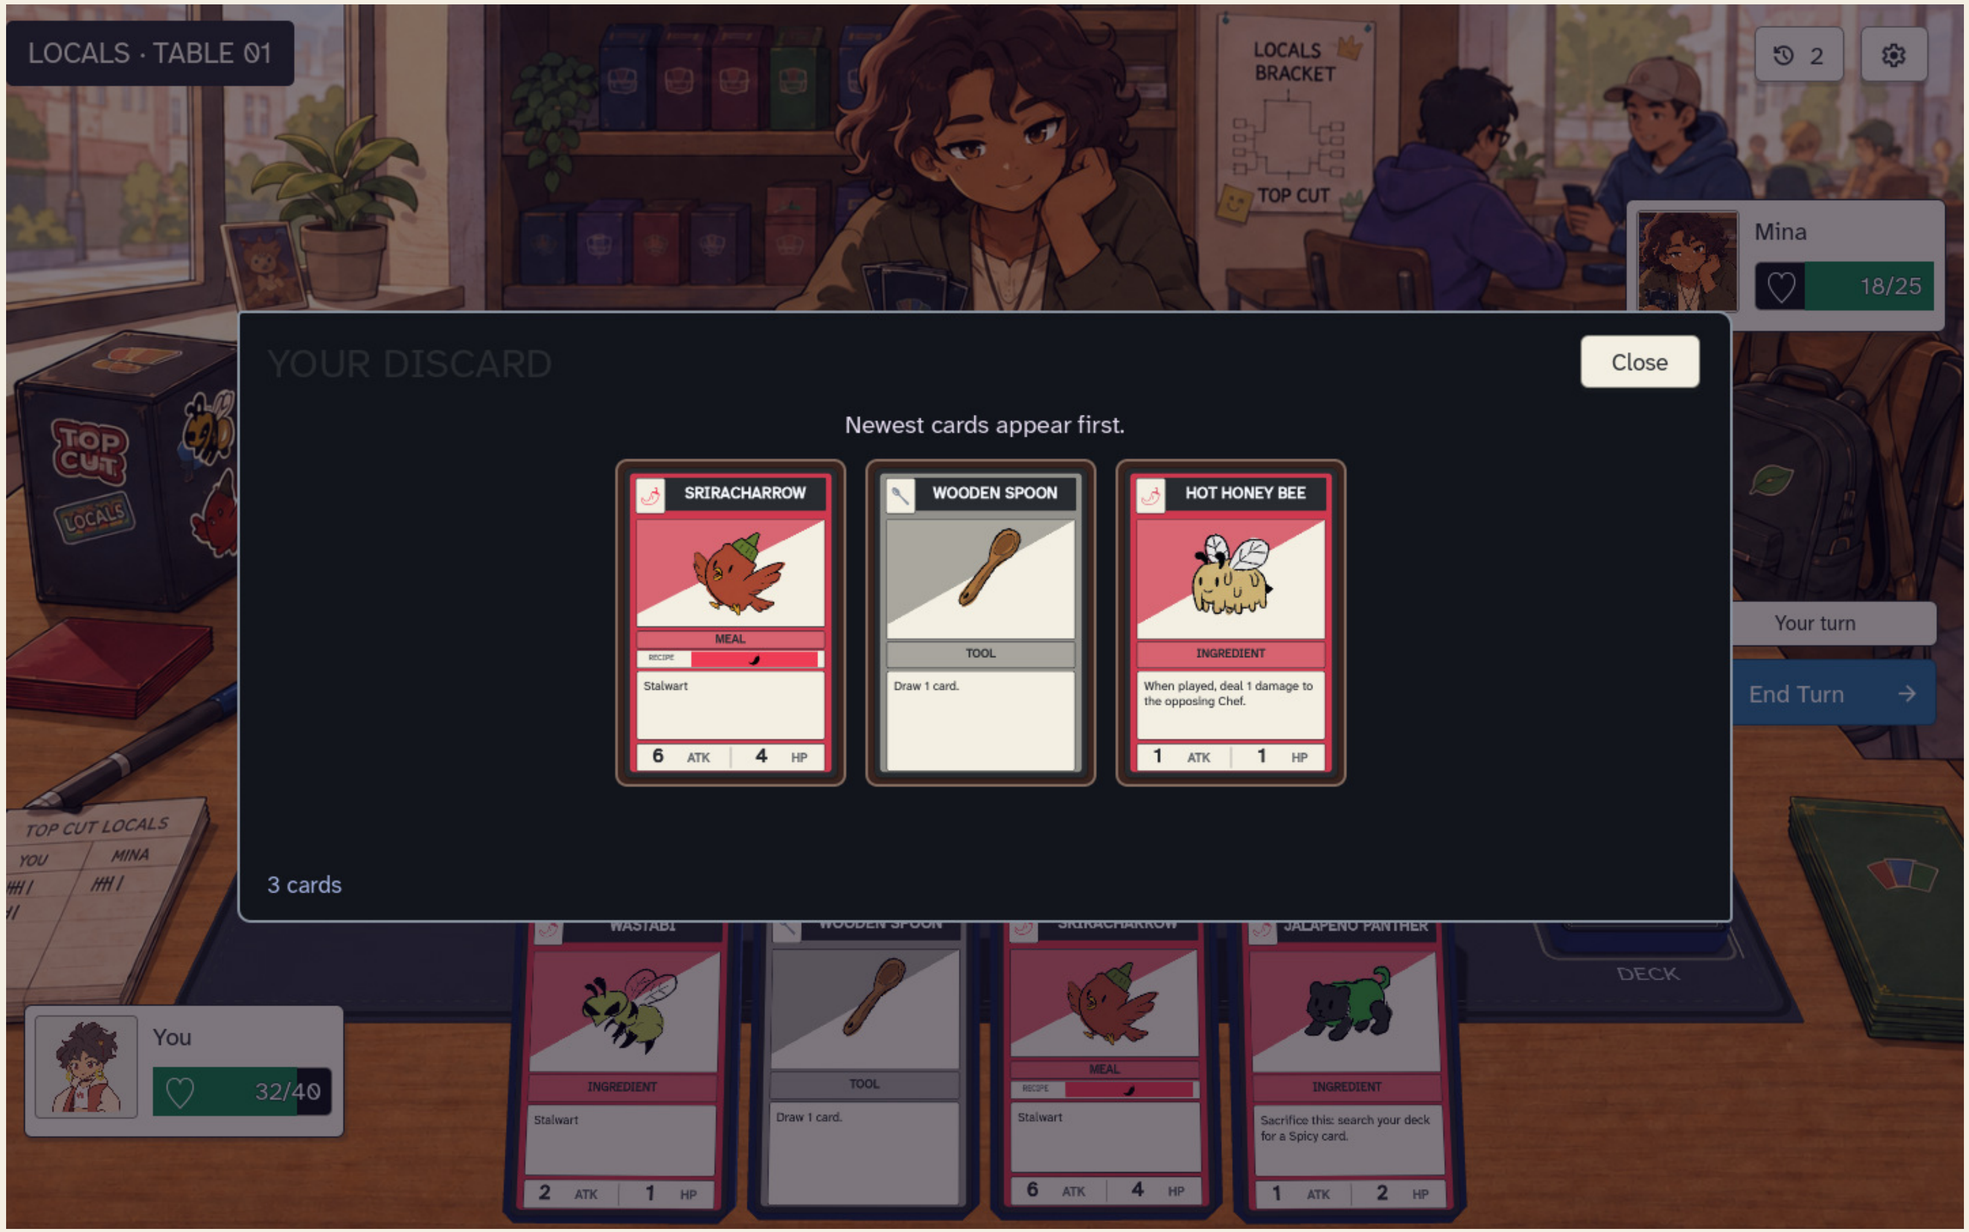
# Battle: attack preview

CURRENT

Current paper outcome tooltip and keyword guide against another rival.

# Battle: discard tray

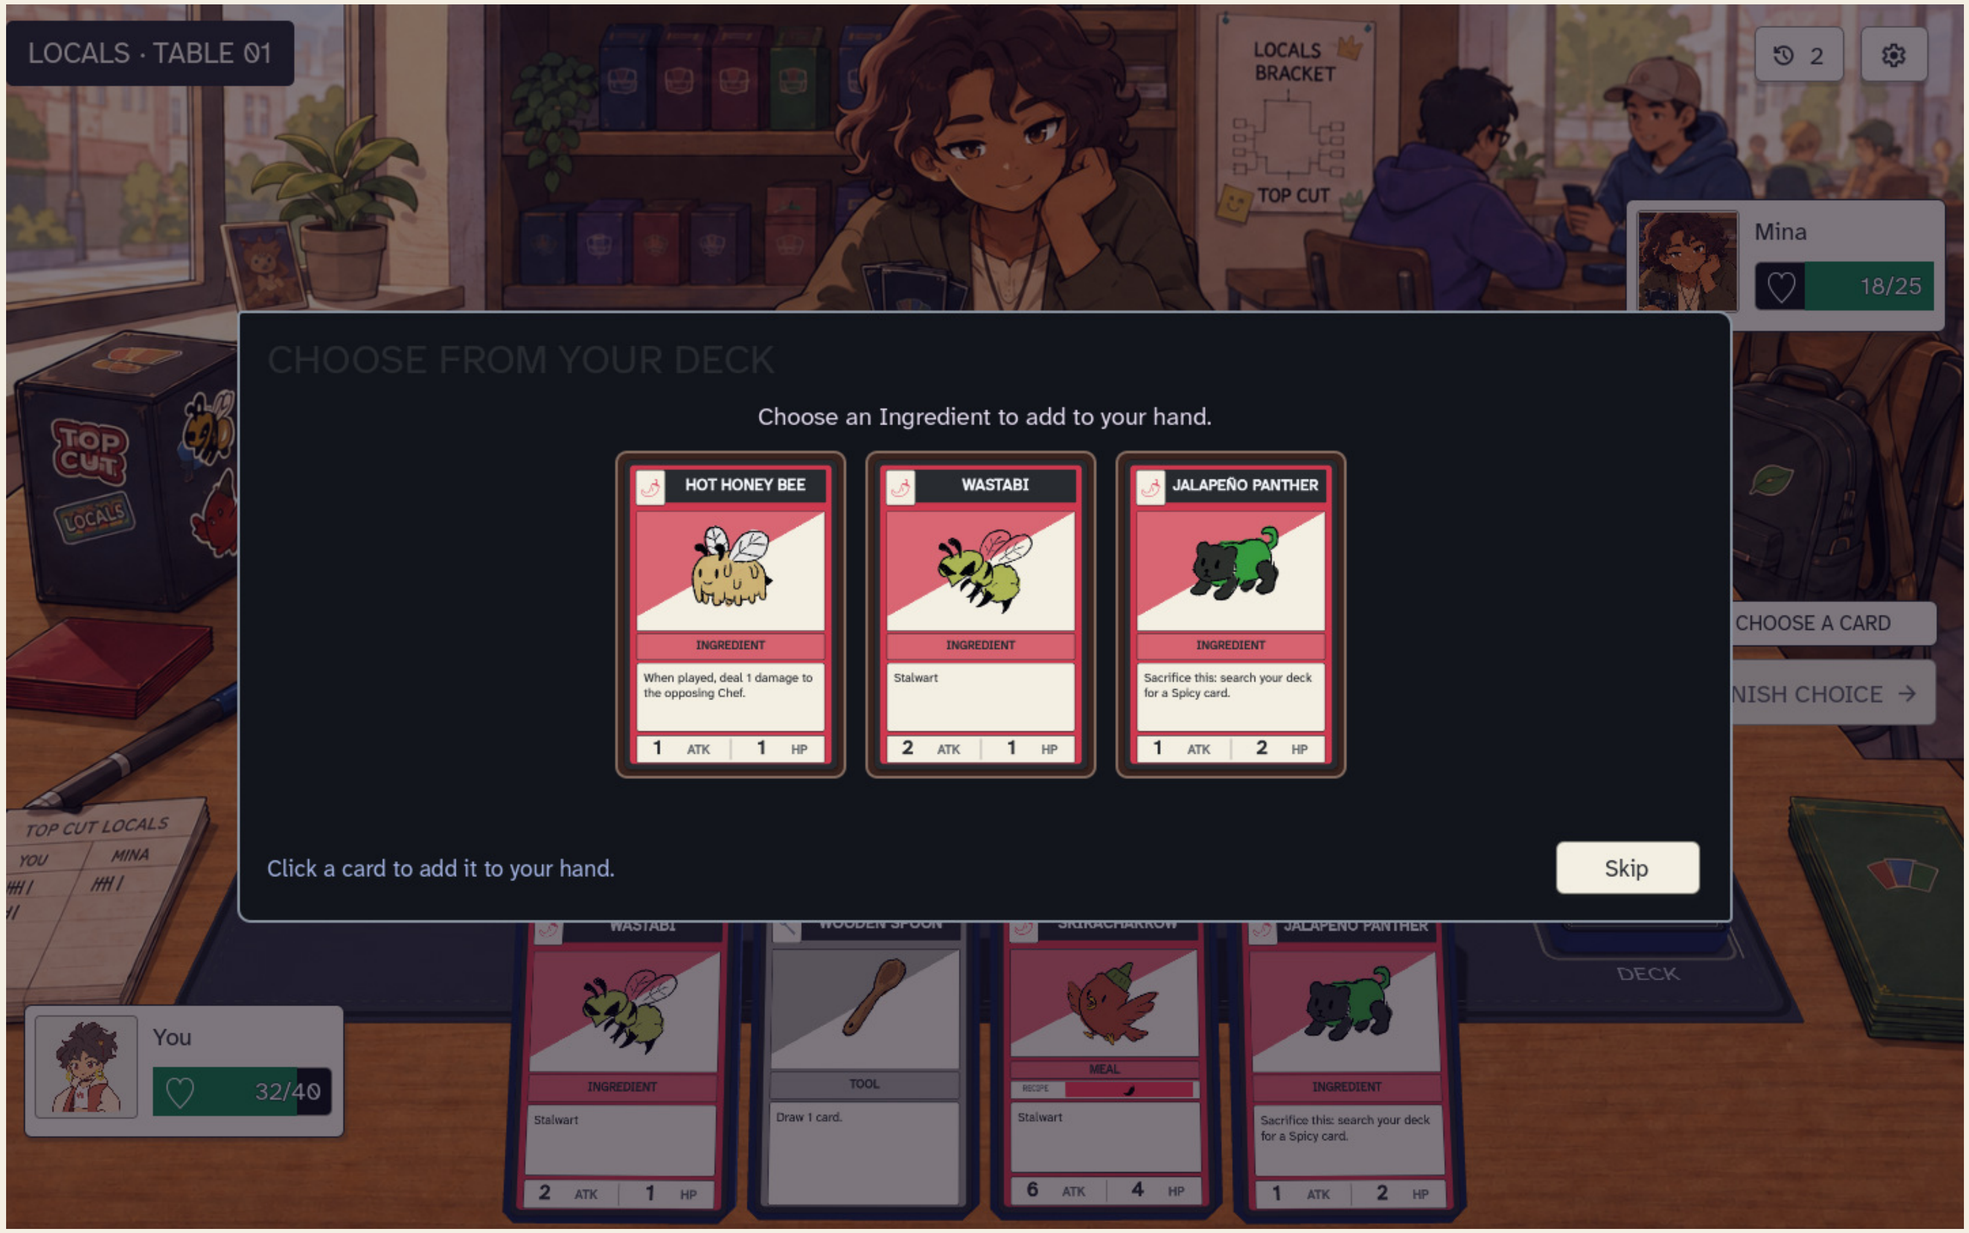
OLDER STYLING REMAINS



The tray still uses a dark panel and older uppercase headings. This is a remaining consistency gap.

# Battle: search your deck

OLDER STYLING REMAINS



Deck search shares the older dark tray treatment. This is a remaining consistency gap.

Current in-game capture. No matching archived screenshot is claimed.

# Battle: recent plays

PARTLY UPDATED

Paper panel and readable title are updated; some colored labels remain.

# Battle: Game Breakdown

OLDER STYLING REMAINS

This public dialog still has a dark fill, pink border and multicolored labels. It has not received the full cozy treatment.

Current in-game capture. No matching archived screenshot is claimed.

# Battle: your turn

CURRENT

A small paper tournament slip with an ownership accent replaces the angular announcement plates.

# Battle: reshuffle warning

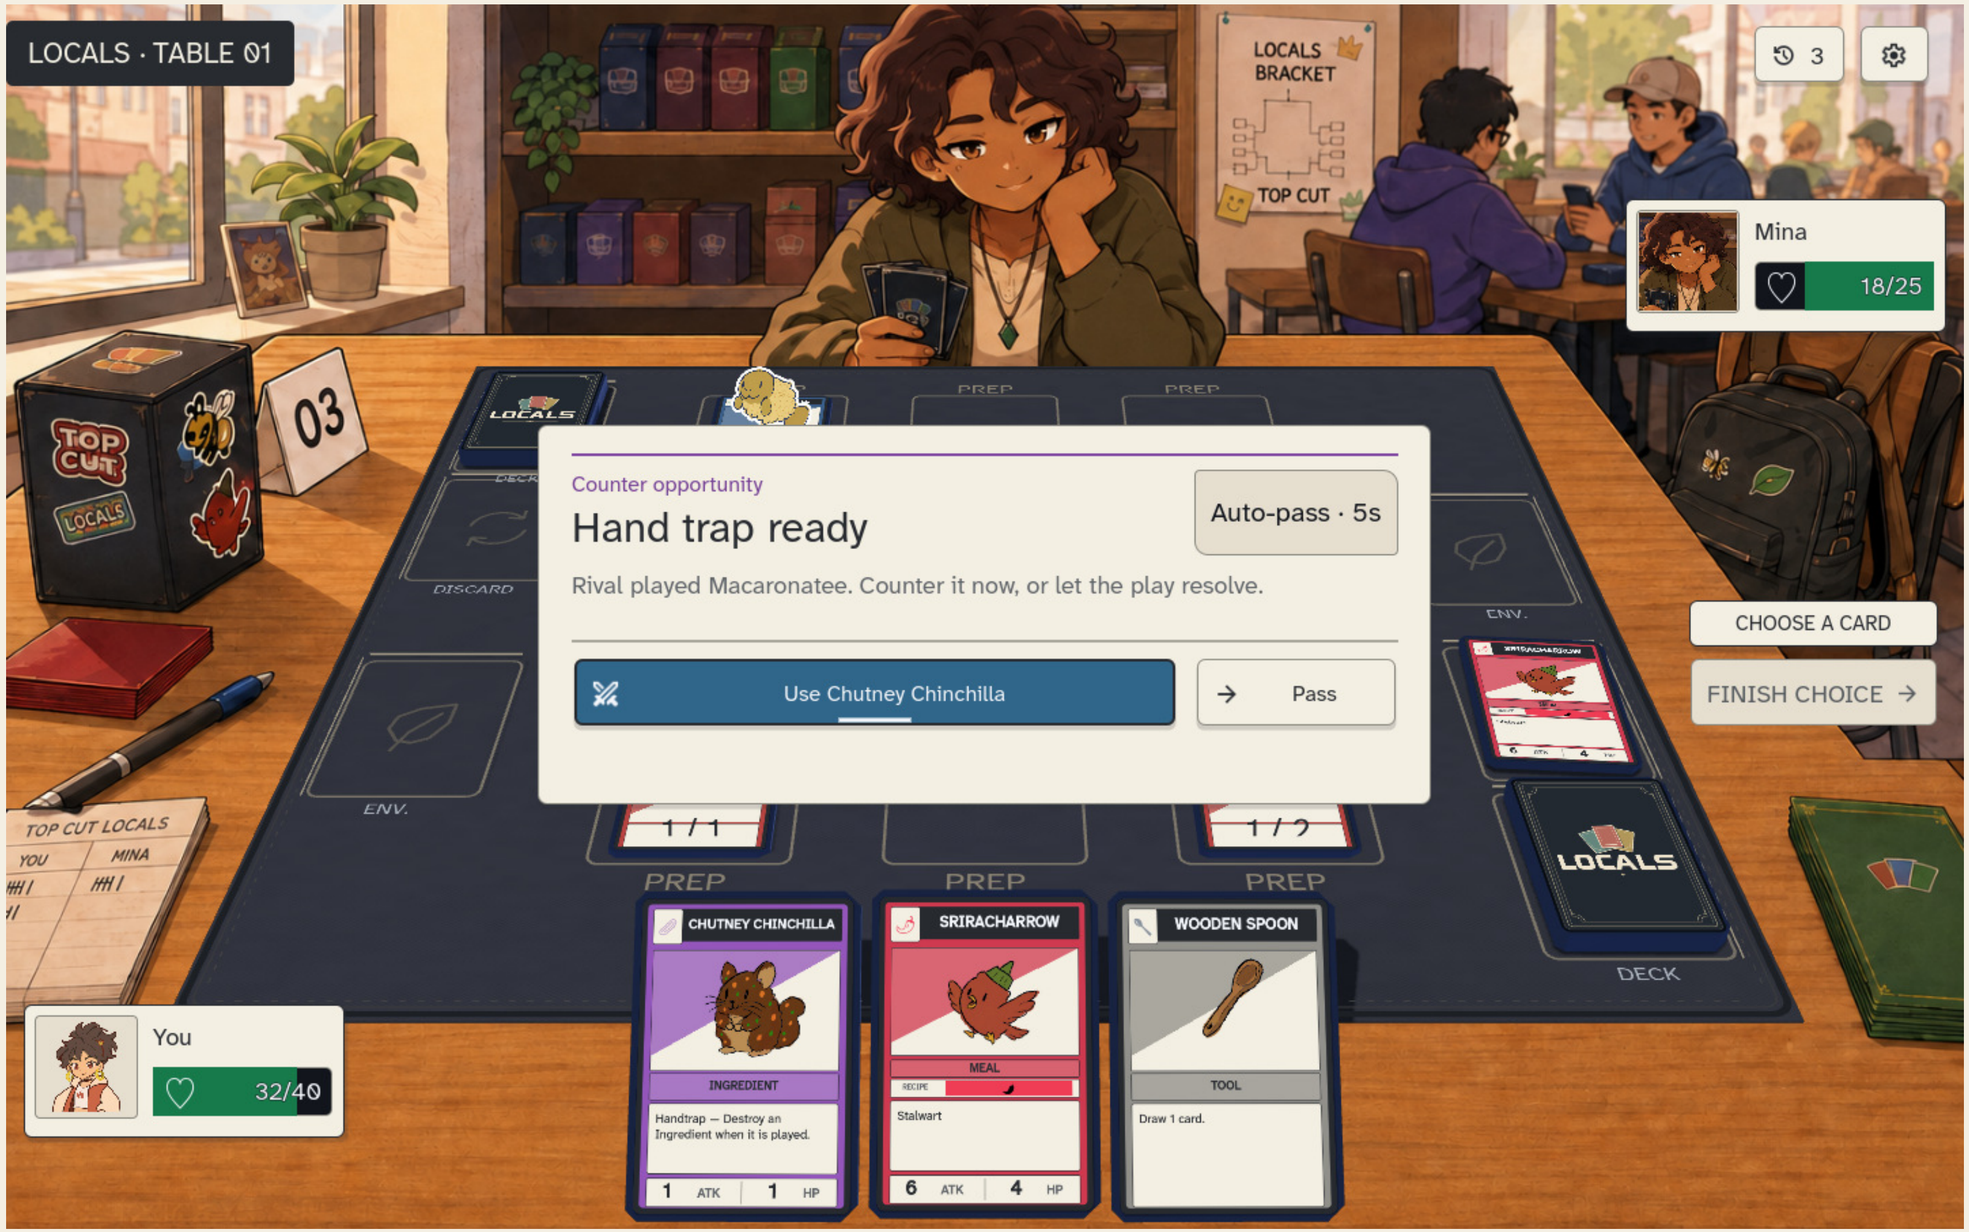
CURRENT

The same paper slip shows deck ownership and reshuffle damage.

Current in-game capture. No matching archived screenshot is claimed.

# Battle: hand-trap choice

CURRENT

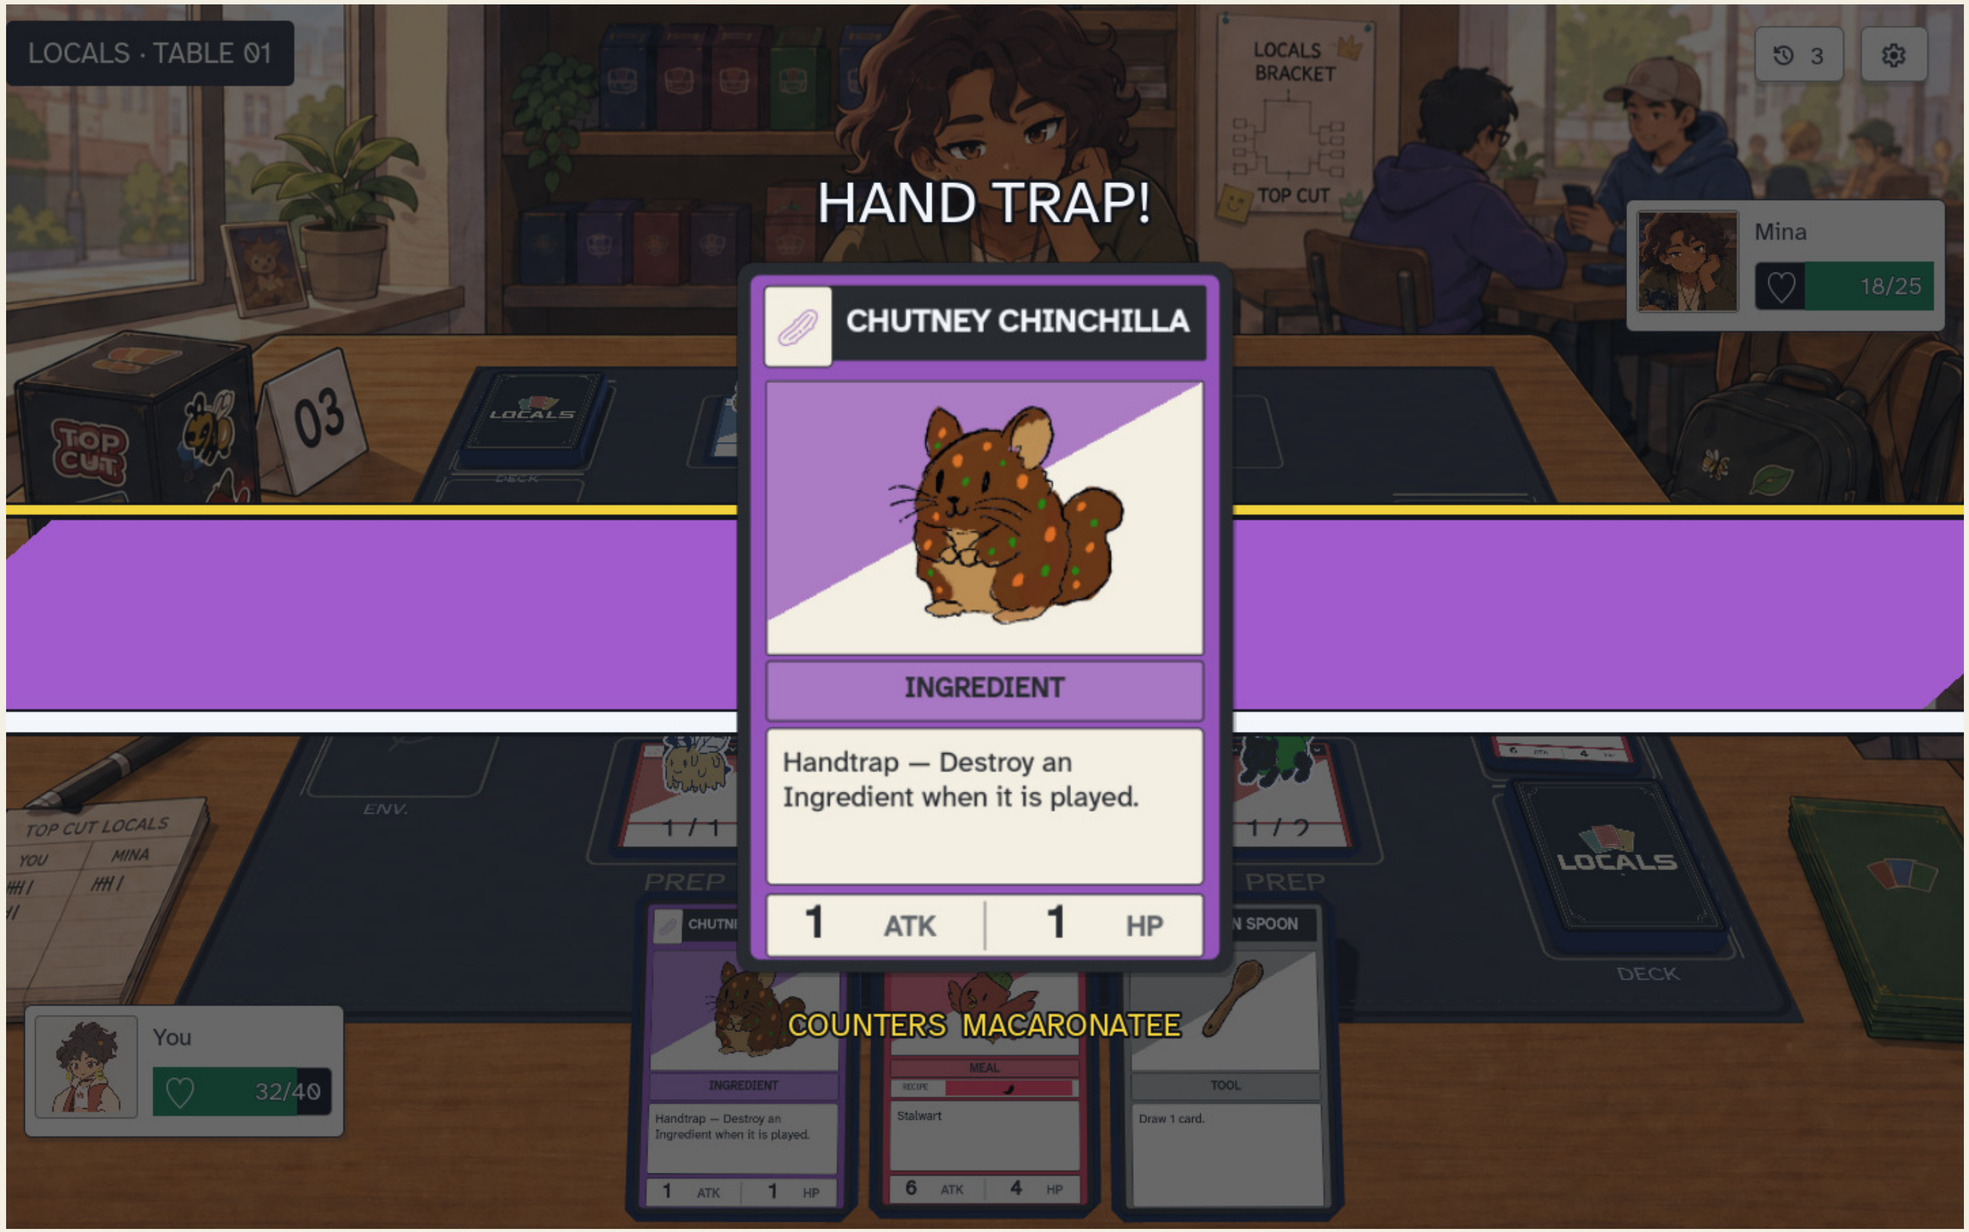


Cream prompt, readable countdown and Use/Pass actions replace the dark reaction panel.

Current in-game capture. No matching archived screenshot is claimed.

# Battle: hand-trap reveal

OLDER STYLING REMAINS

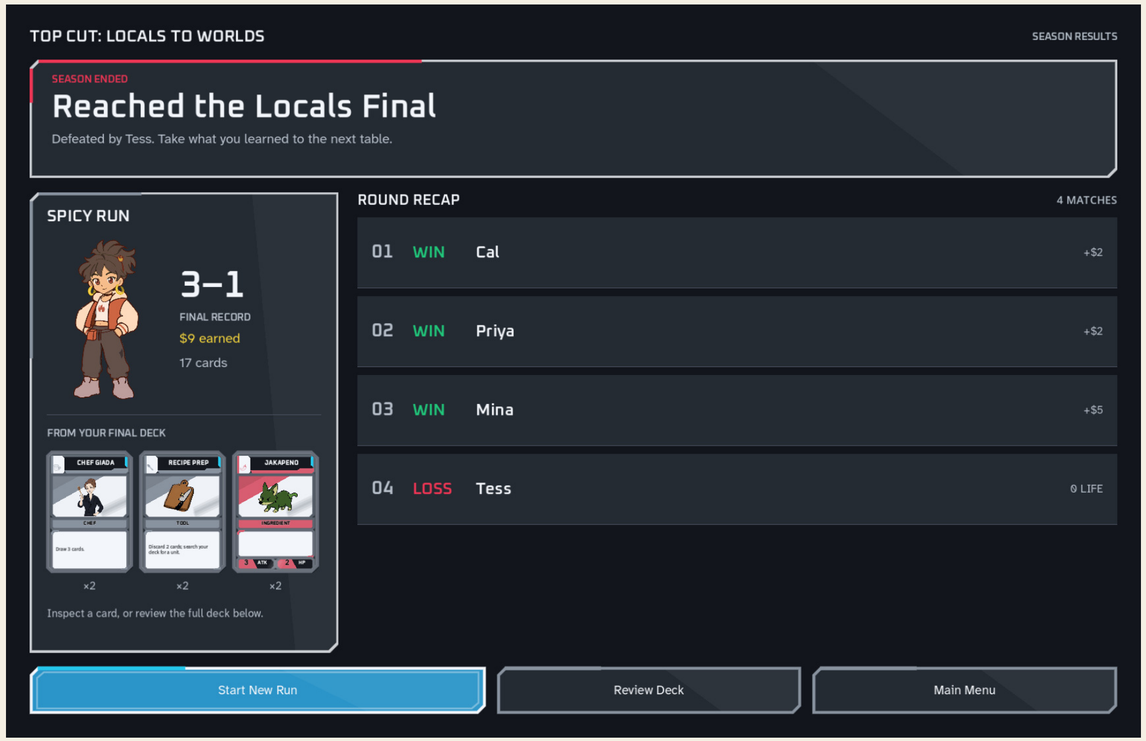


The dramatic counter reveal still uses diagonal colored effects and large outlined labels.

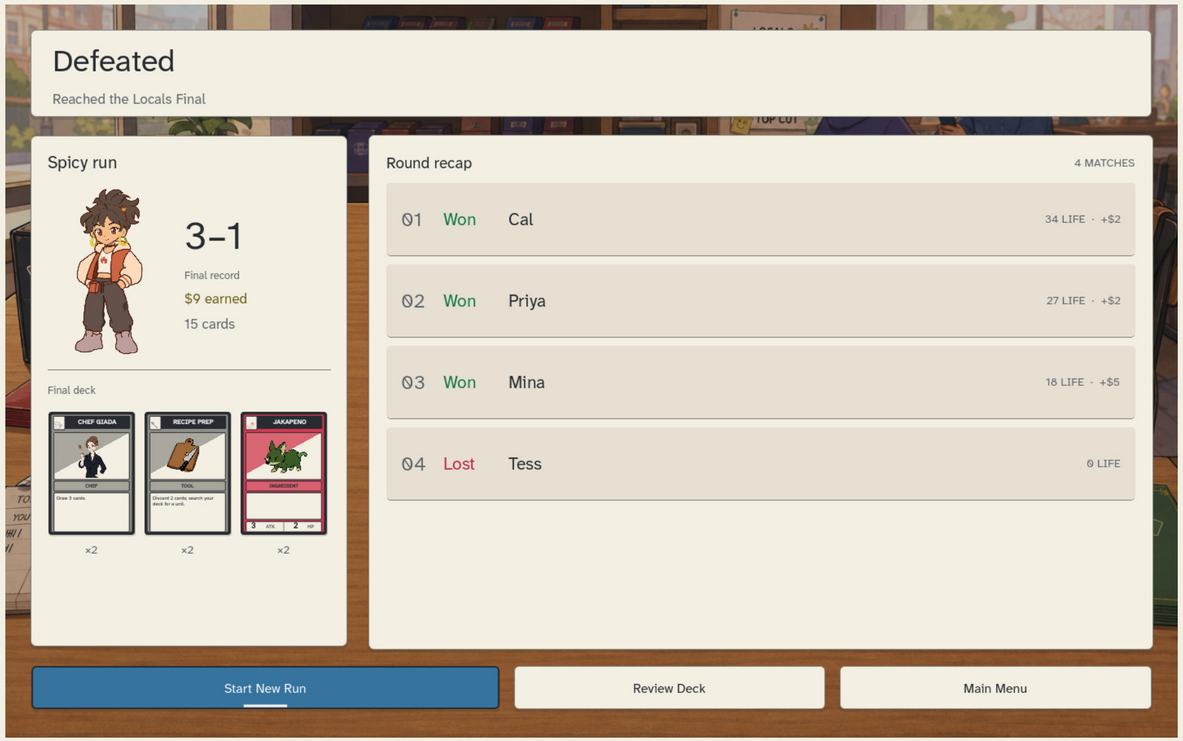
Current in-game capture. No matching archived screenshot is claimed.

# Defeat and run recap

EARLIER BUILD



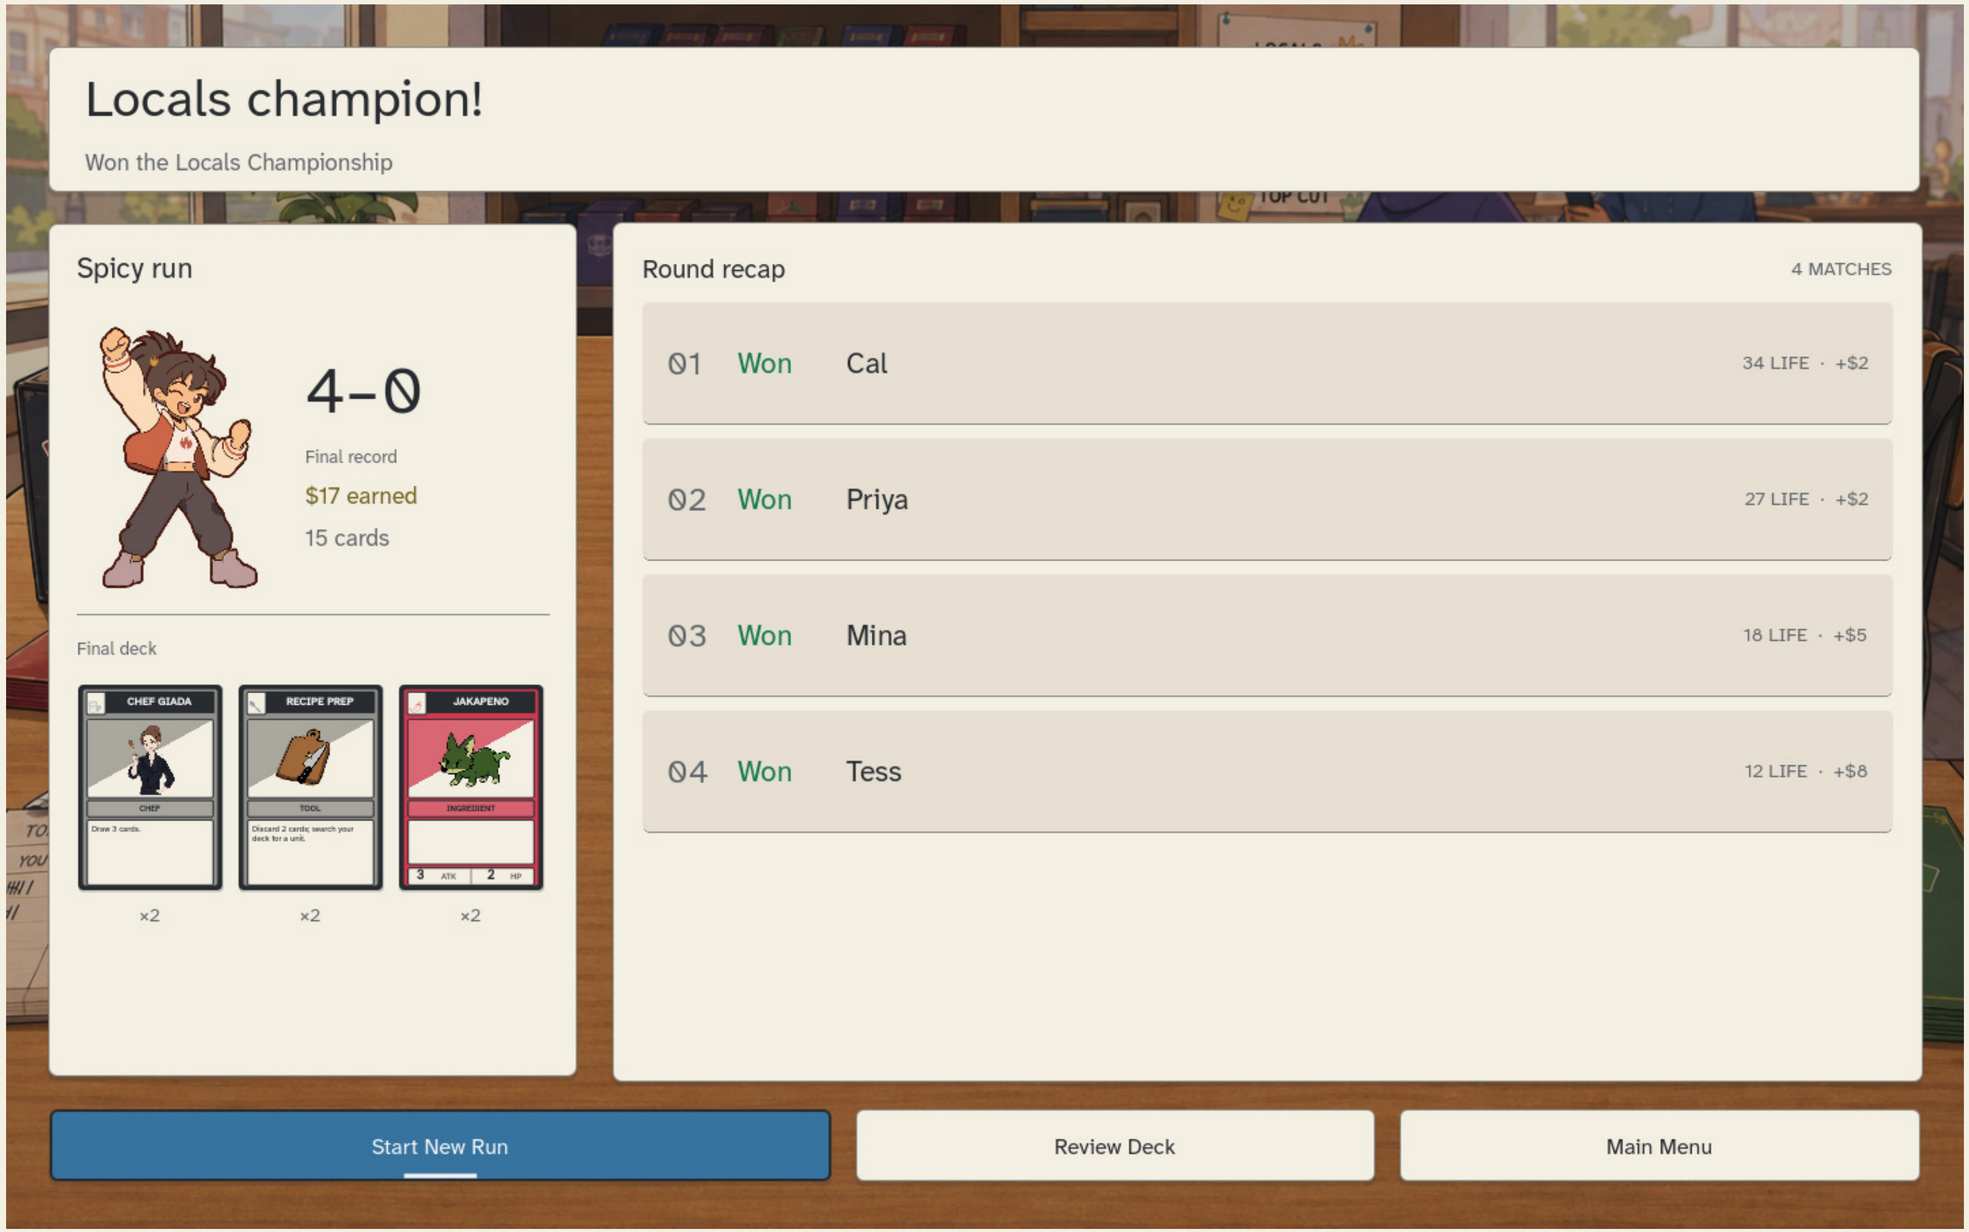
CURRENT



Paper recap sheets over shop art replace the dark summary. Dark text, restrained win/loss colors and the restart action are easier to read.

# Victory and run recap

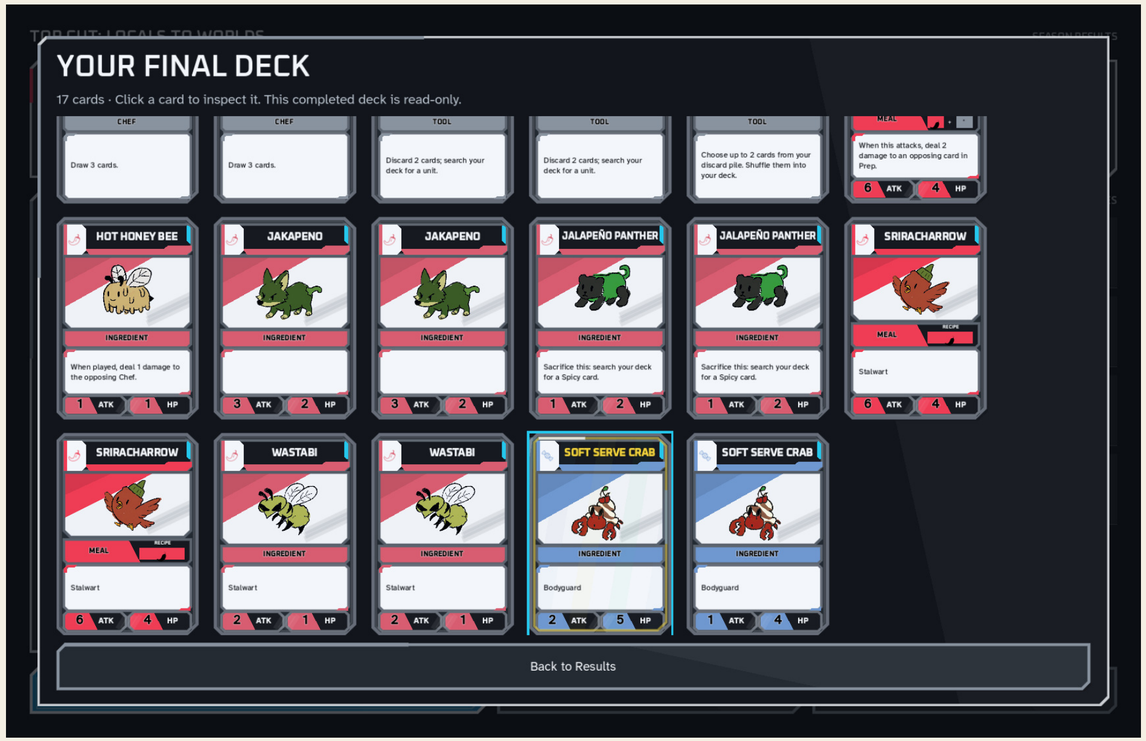
CURRENT



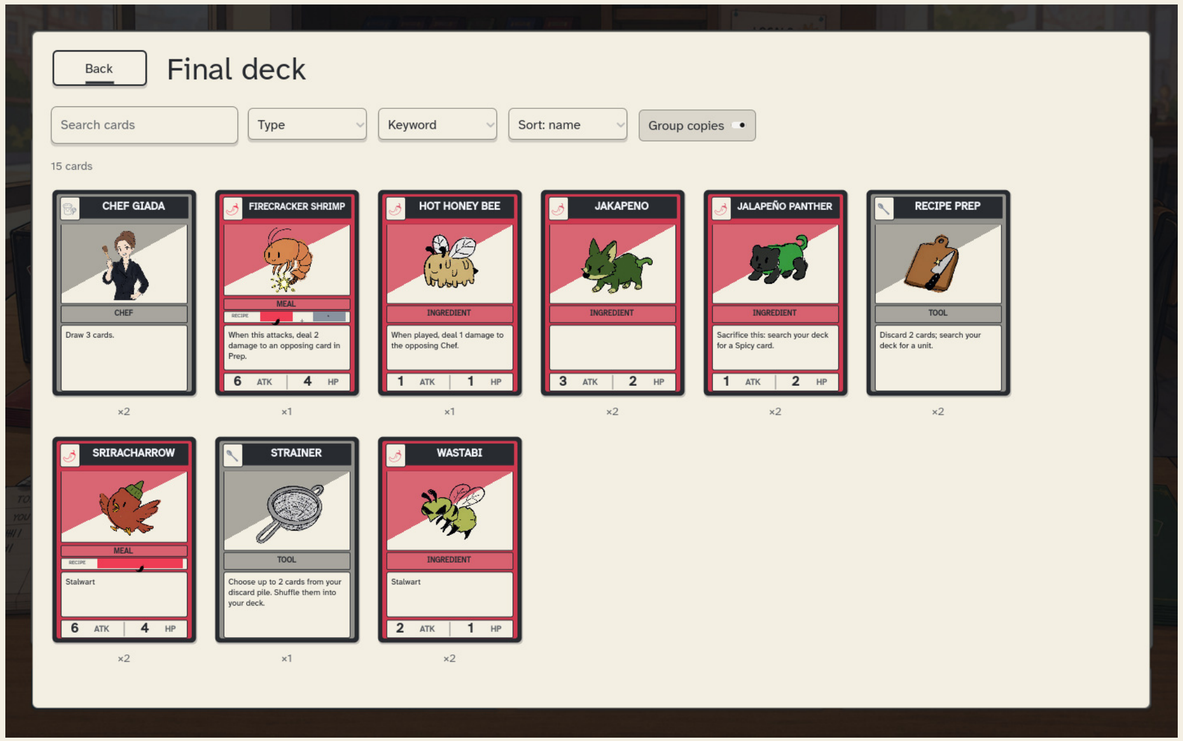
Current Locals champion result with a paper round recap and pinned actions. No exact matching archived screen was retained.

# Final deck review

EARLIER BUILD



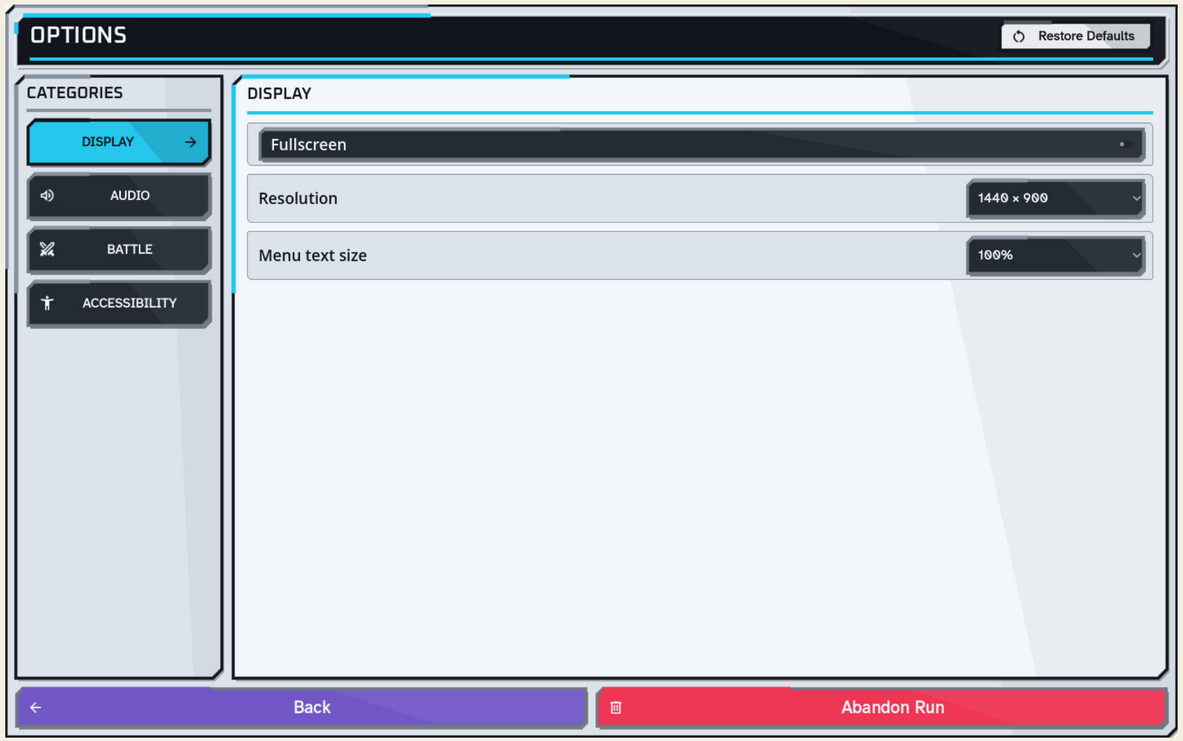
CURRENT



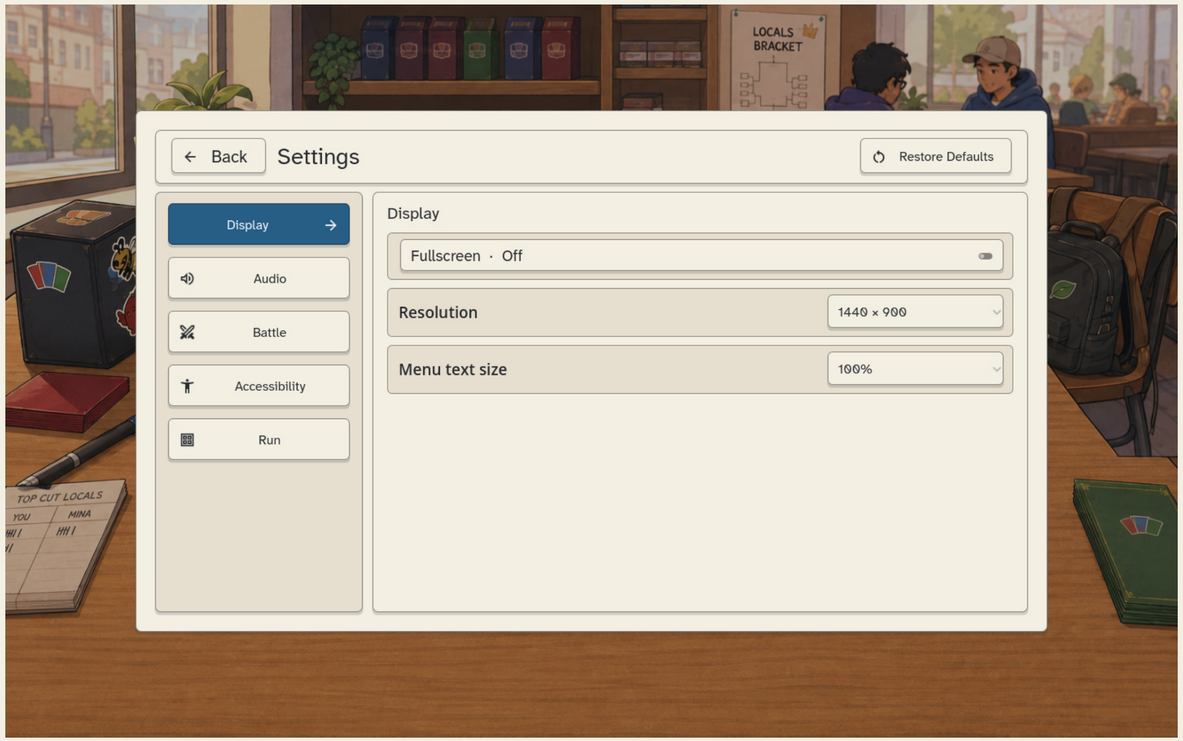
The final deck uses the shared paper browser, with search, grouping and card inspection. Card counts differ.

# Settings: Display

EARLIER BUILD



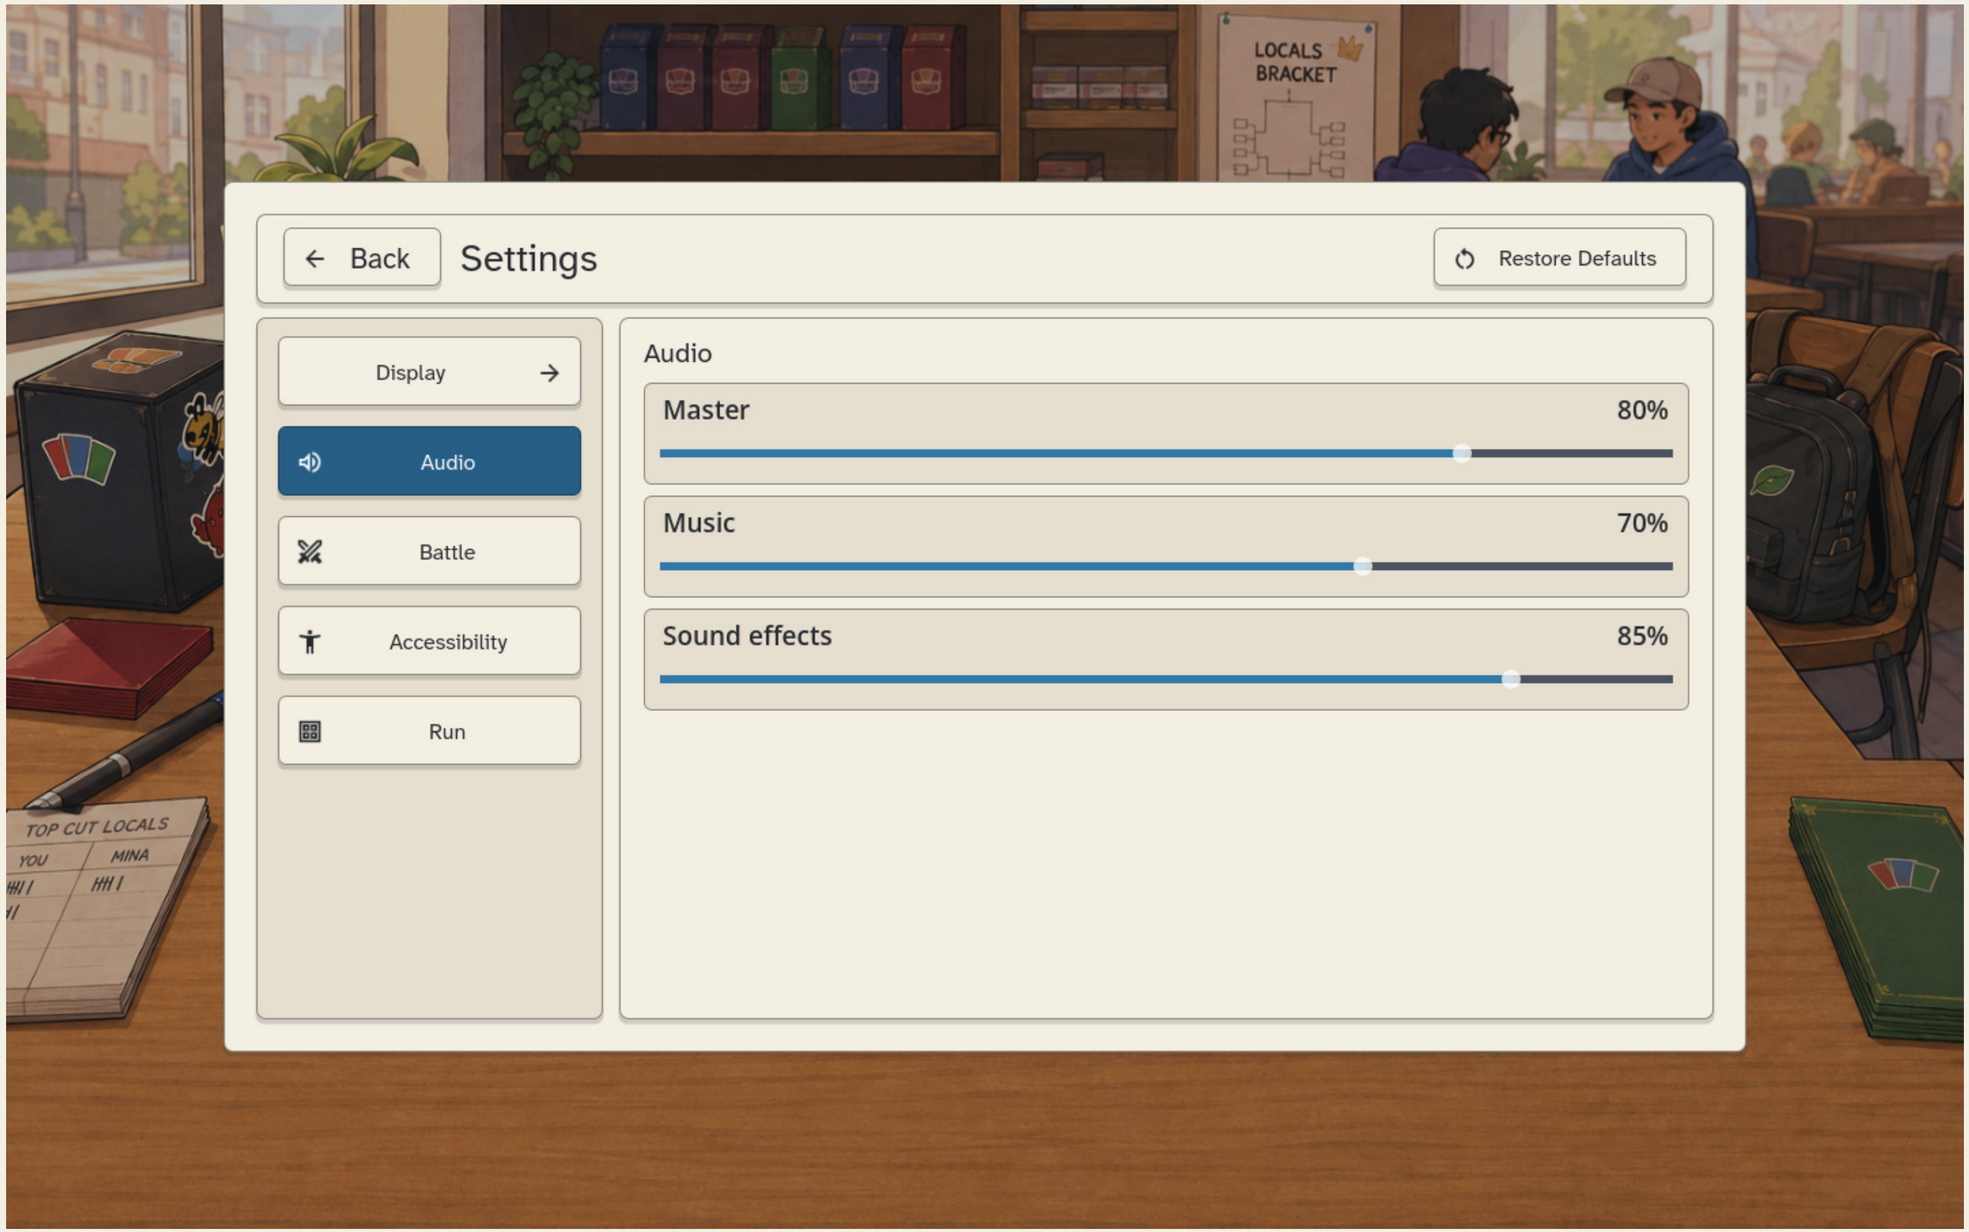
CURRENT



A centered paper sheet over the illustrated room replaces the full-screen gray/cyan settings chassis.

# Settings: Audio

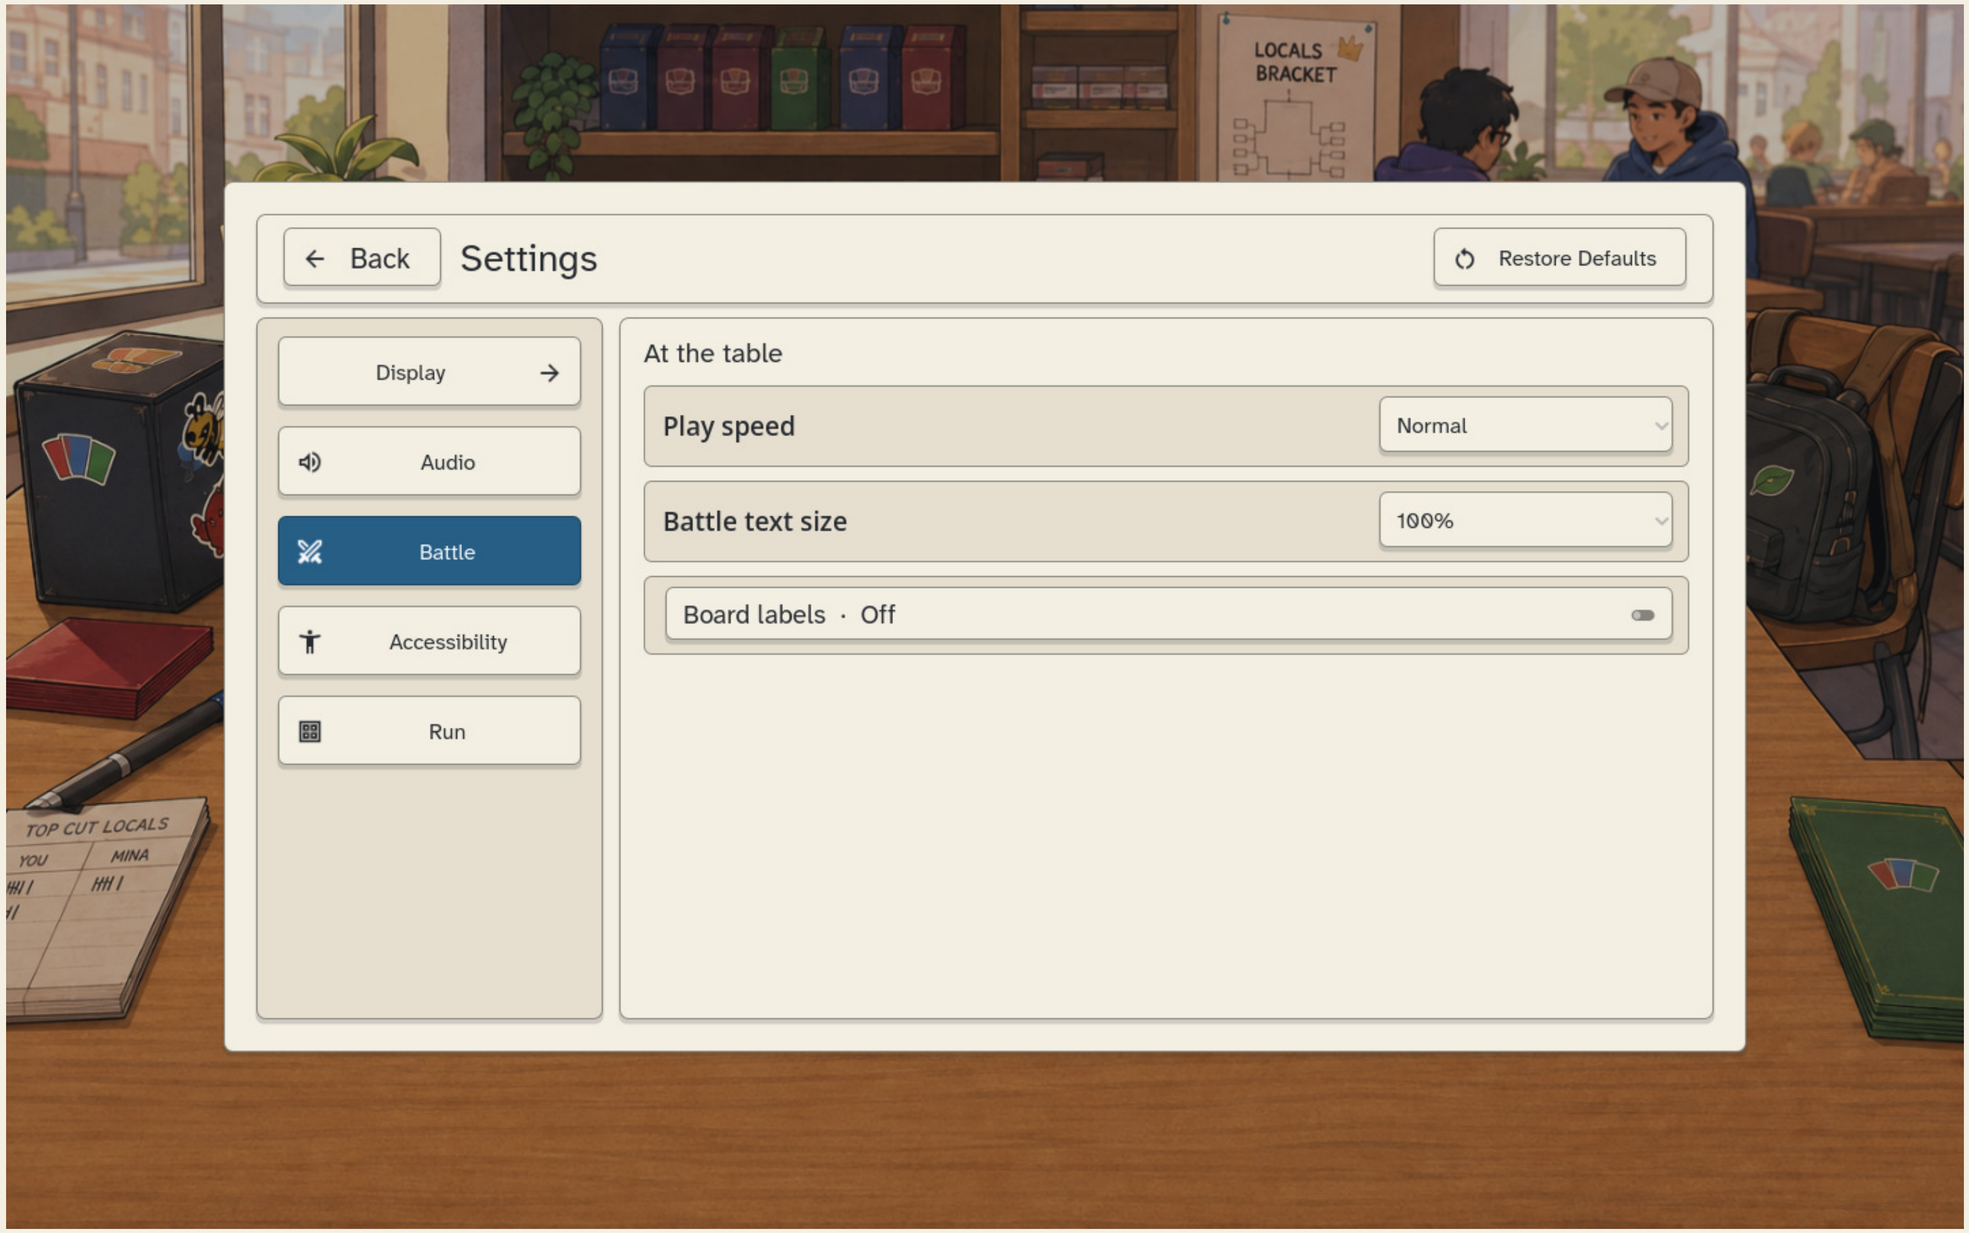
CURRENT



Current volume sliders and paper category navigation.

# Settings: At the table

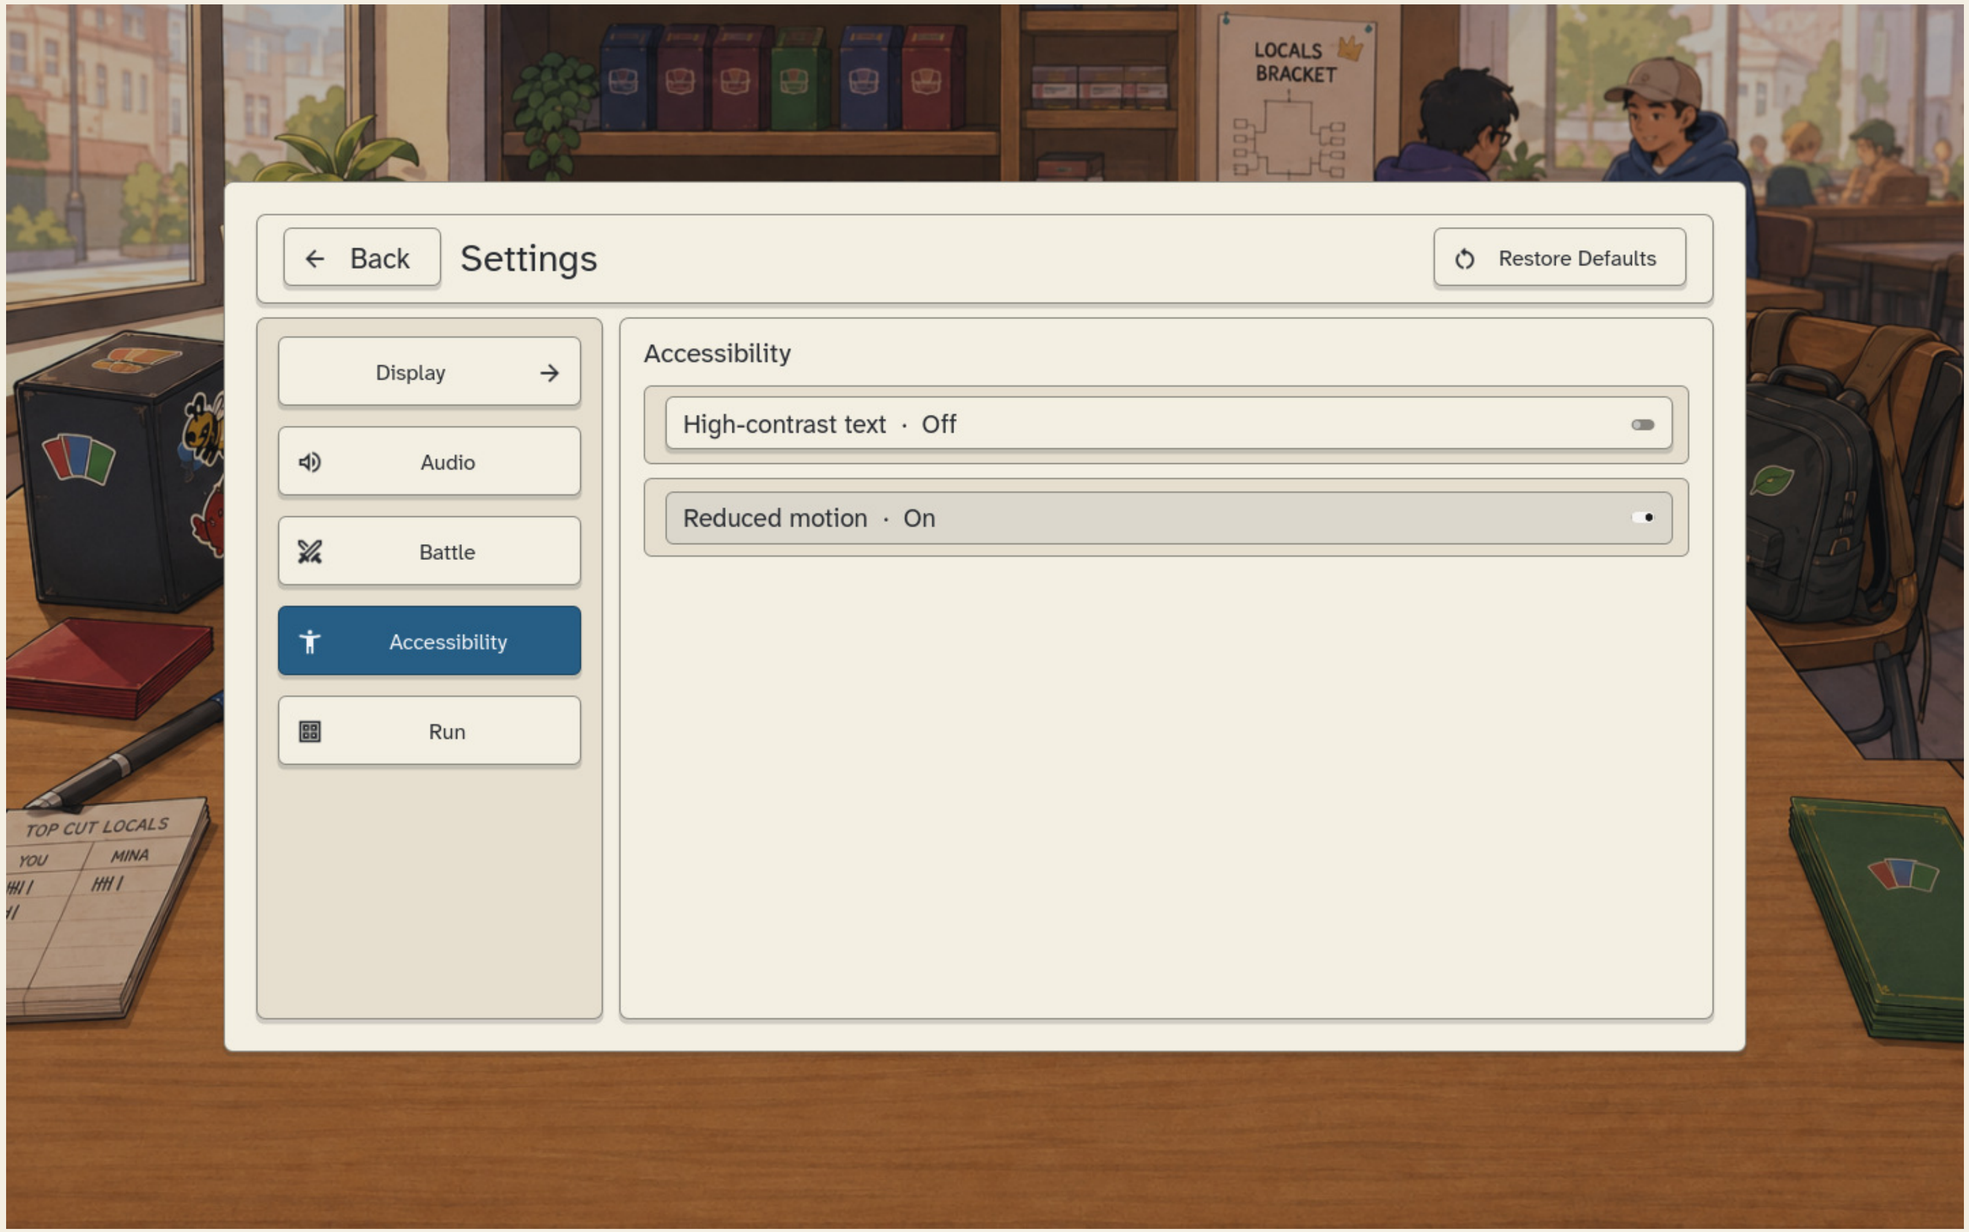
CURRENT



Current play speed, battle text size and board-label controls.

# Settings: Accessibility

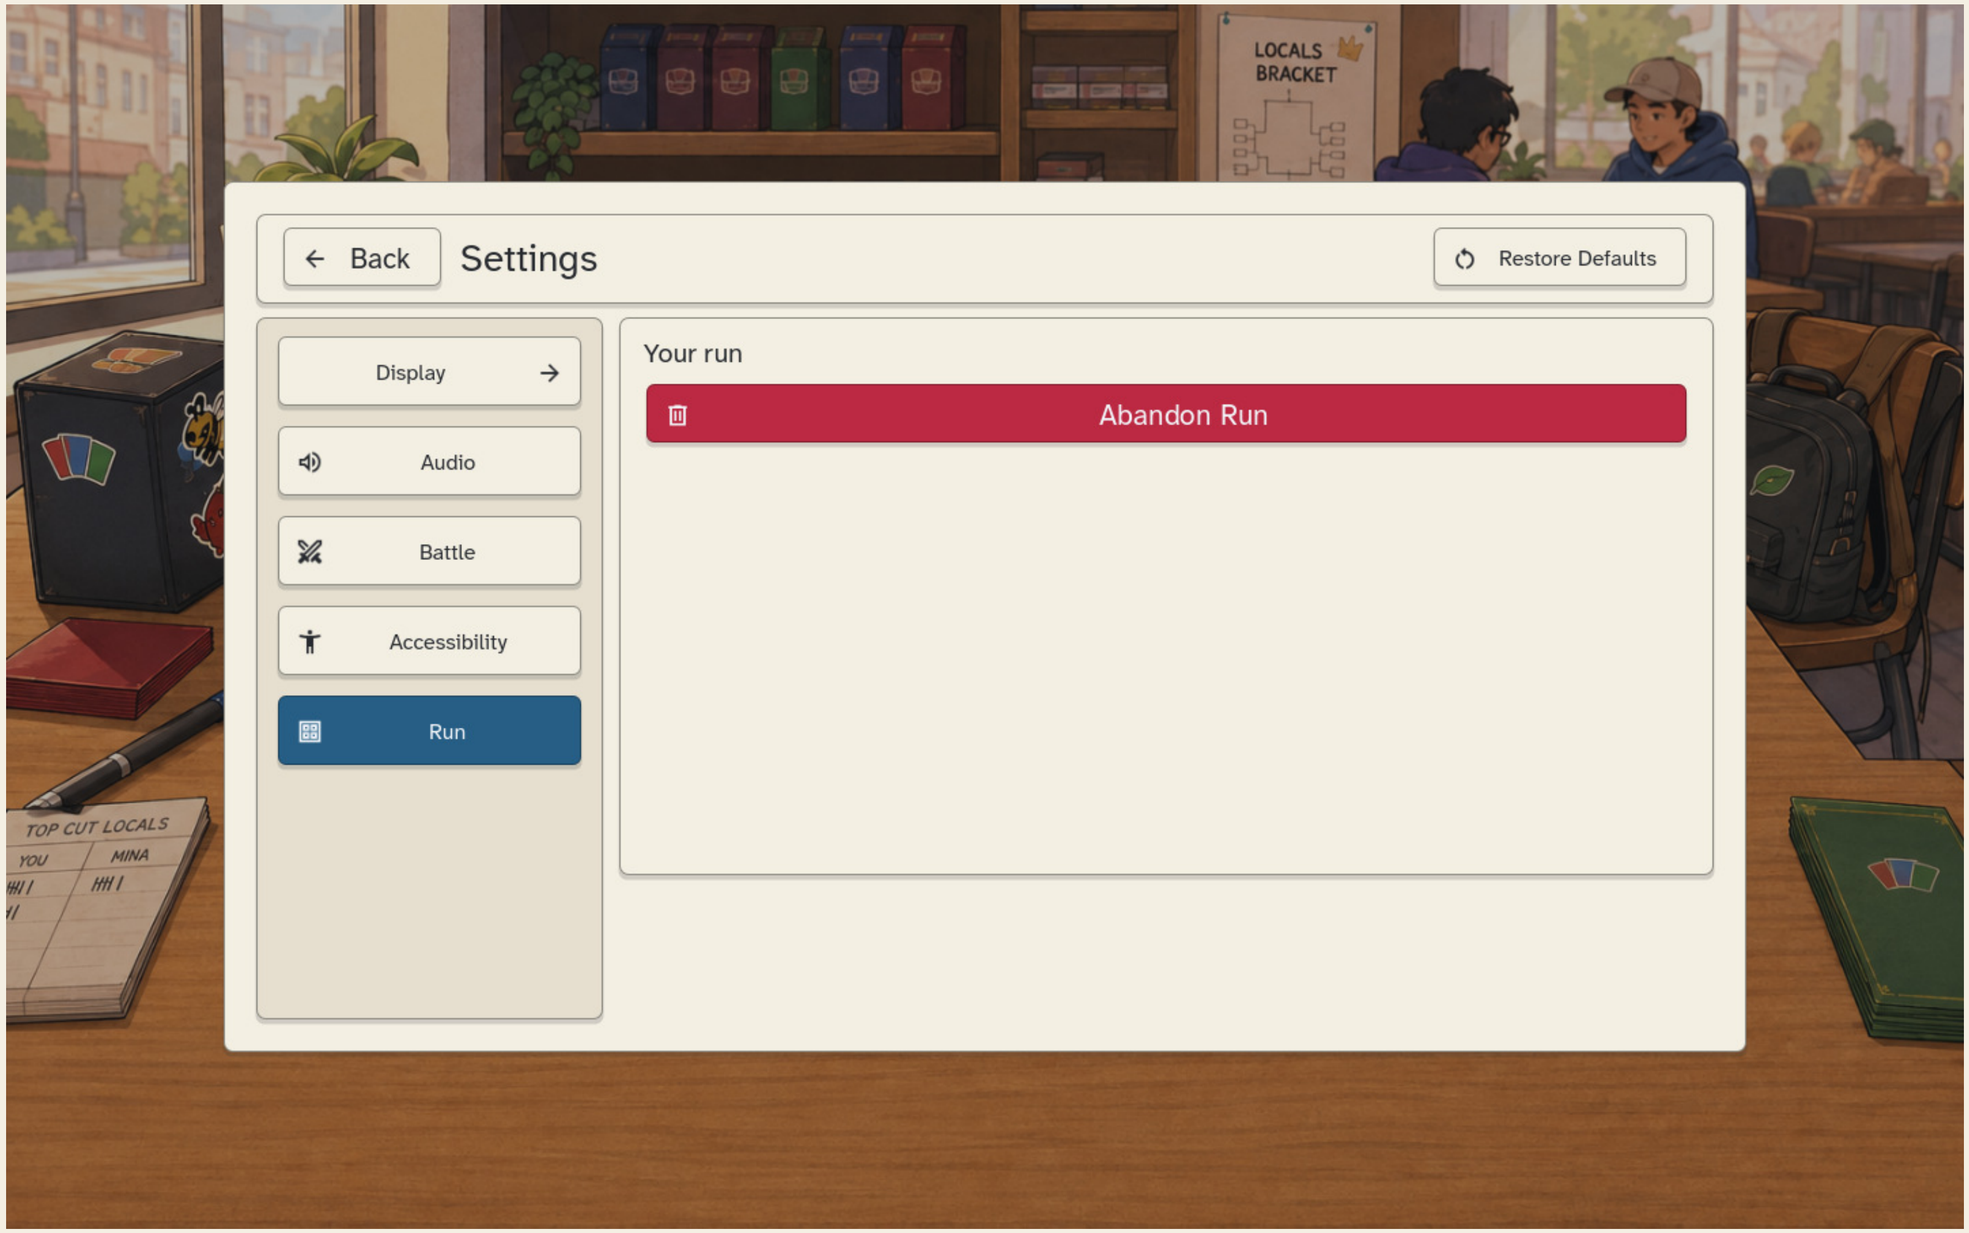
CURRENT



Current contrast, motion and readability controls.

# Settings: Your run

CURRENT

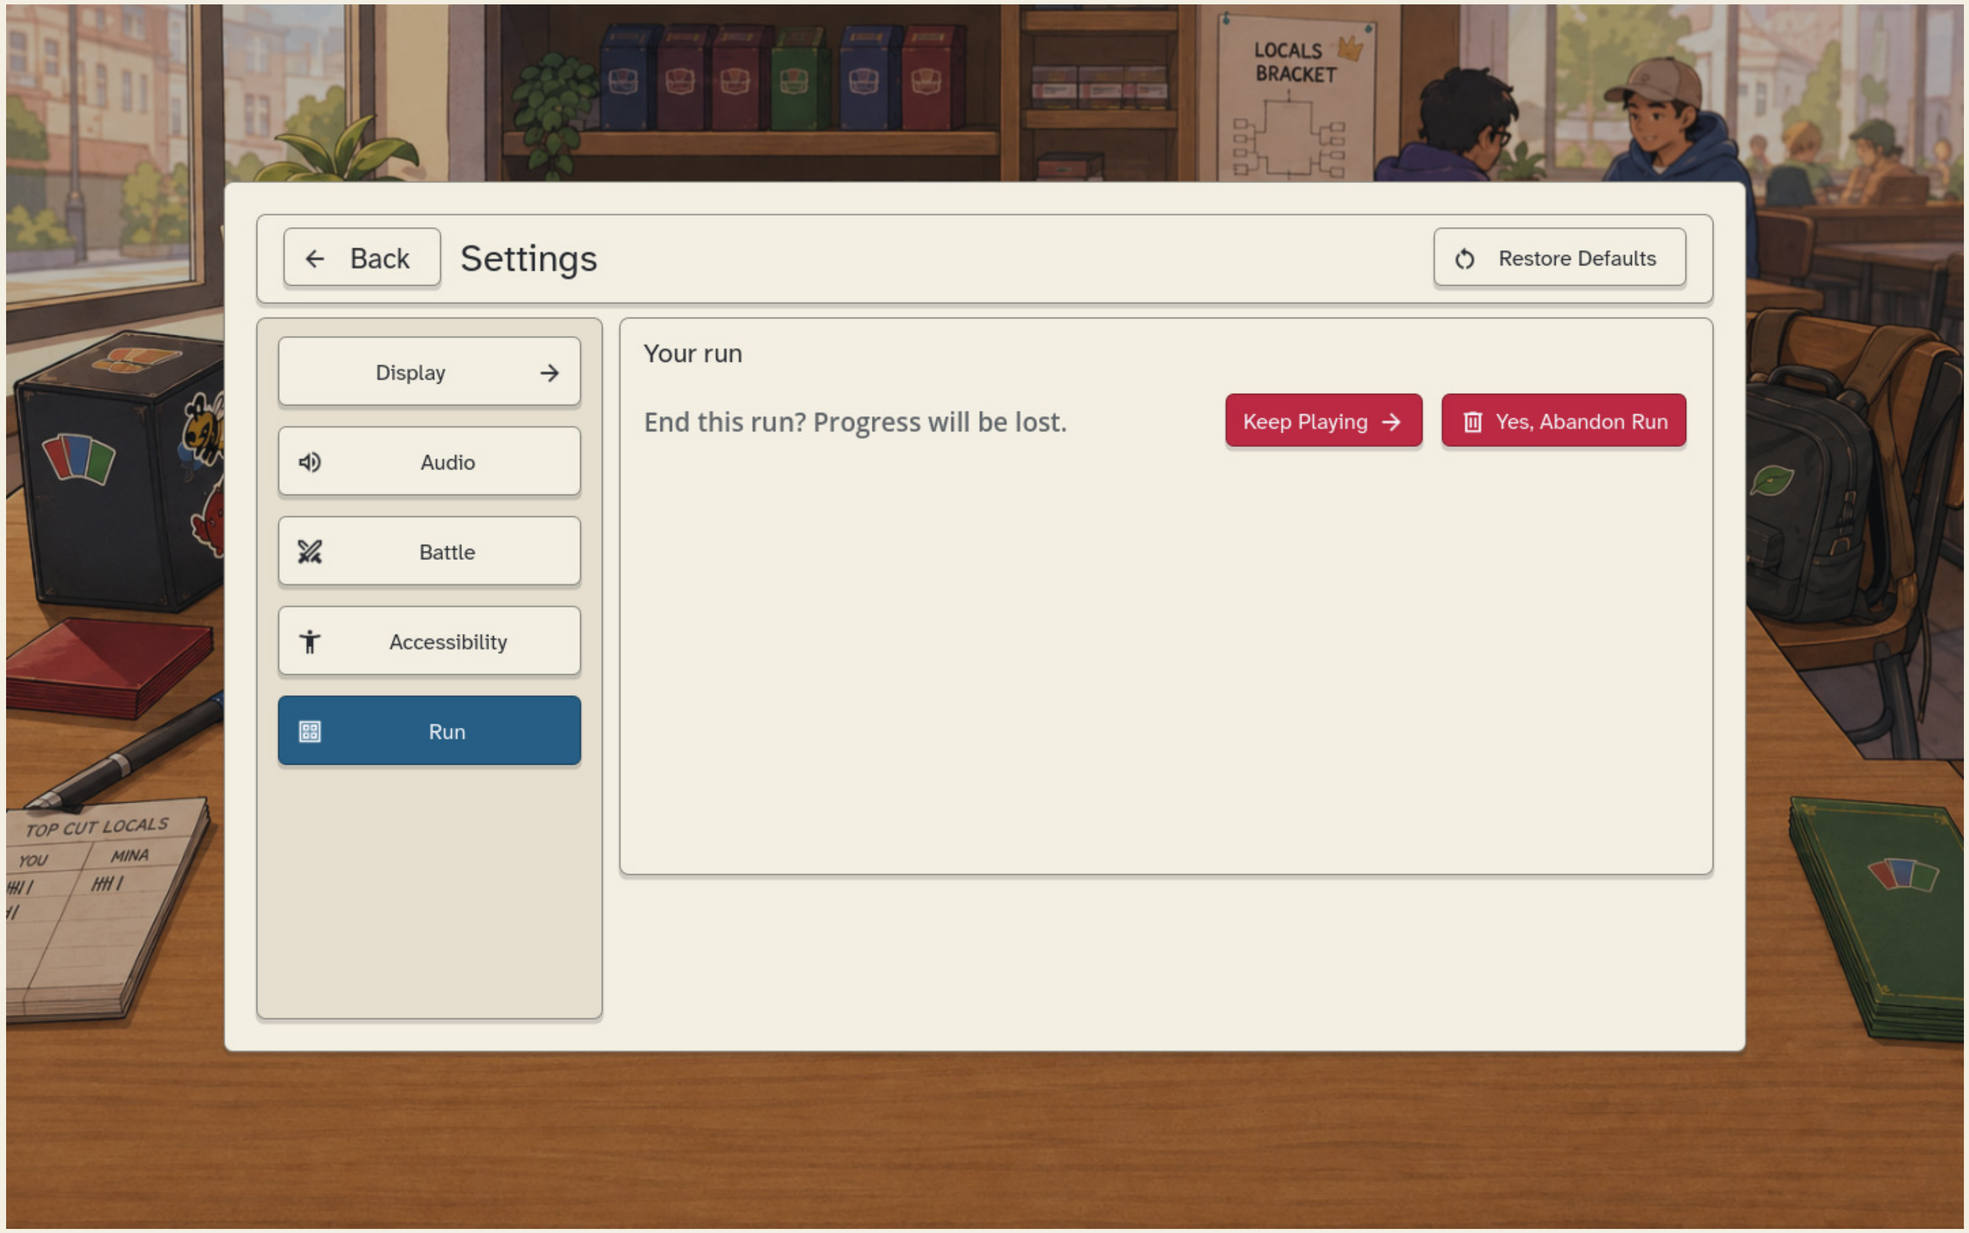


Current run actions, separated from the everyday display and audio controls.

Current in-game capture. No matching archived screenshot is claimed.

# Settings: abandon confirmation

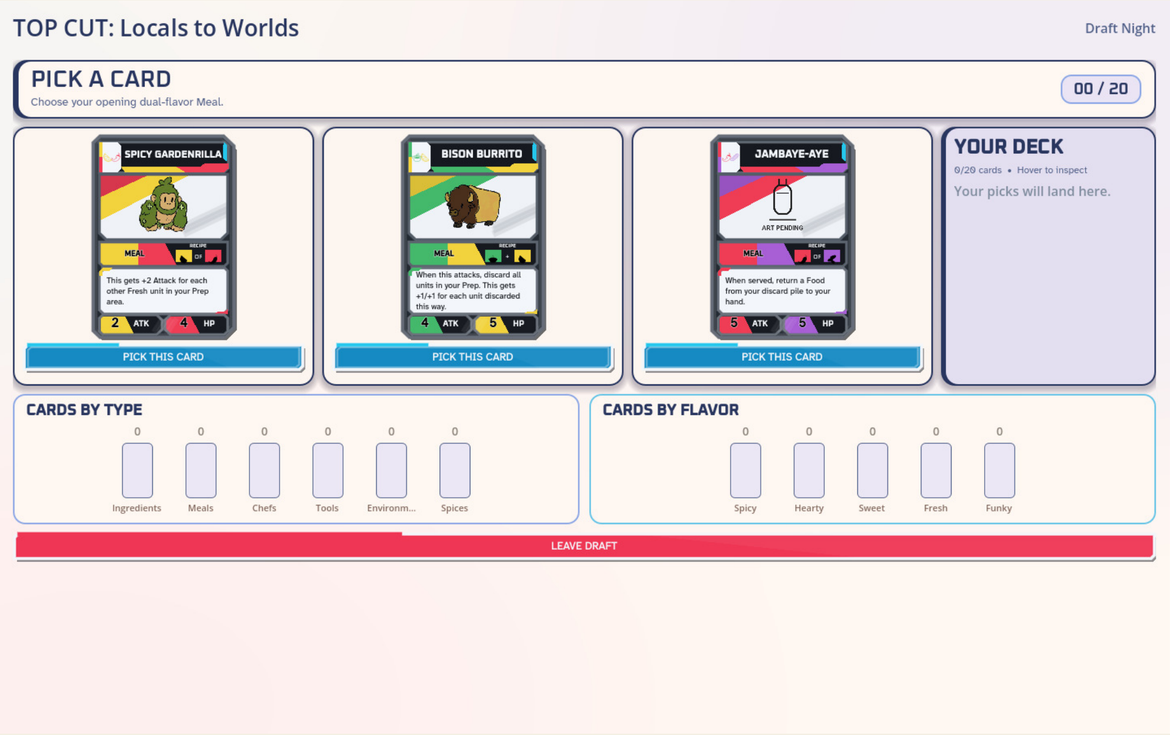
CURRENT



Inline confirmation before ending the run; the capture does not confirm it.

# Draft mode

EARLIER BUILD



CURRENT

Three large card choices over the table replace dashboard panels. Included for completeness; draft is not part of the public starter-to-hub flow.
